[Corporate Reputation Decoded](#) Mar 12 2021 Corporate Reputation Decoded is the first book of its kind that traces the journey of Indian companies in building corporate reputation (CR). The book addresses CR in the Indian context and is in response to the growing interest of companies in this area. The book explains the process of building, maintaining and strategising for CR. It also discusses various aspects of CR—company's stakeholders, situations demanding CR interventions, and the impact of a company's culture, ethics and leadership on its CR. The book expounds on these using Indian cases (Tata, Infosys, HUL, Reliance, Aditya Birla Group, HDFC, among others), which enhance the understanding of CR in India as well as benchmark CR best practices in India. The book is of major significance to CR practitioners, scholars, teachers, students and C-Suite professionals who will also find the techniques proposed in the book interesting as they can assess, evaluate, adopt and adapt strategies followed by other companies for reputation enhancement.

[Soldier Repatriation](#) May 02 2020 Soldier repatriation from Afghanistan has impacted debate about the war. This study highlights this impact with particular focus on Britain, Denmark and Germany. All three countries deployed soldiers soon after the 9/11 attacks, yet their role in Afghanistan and the casualty rates suffered, have been vastly different. This book looks at how their casualties influenced the framing of the war by analysing the political discourse about the casualties, how the media covered the repatriation and the burials, and how the dead were officially recognised and commemorated. Explaining how bodies count is not done exclusively by focusing on the political leadership and the media in the three countries, the response from the men and women in Afghanistan to the official framing of the war is given particular weight. Martinsen contributes to our understanding of European strategic culture by showing how countries respond to the same security challenges.

[SpaceX's Dragon: America's Next Generation Spacecraft](#) Aug 05 2020 Dragon V2 is a futuristic vehicle that not only provides a means for NASA to transport its astronauts to the orbiting outpost but also advances SpaceX's core objective of reusability. A direct descendant of Dragon, Dragon V2 can be retrieved, refurbished and re-launched. It is a spacecraft with the potential to completely revolutionize the economics of an industry where equipment costing hundreds of millions of dollars is routinely discarded after a single use. It was presented by SpaceX CEO Elon Musk in May 2014 as the spaceship that will carry NASA astronauts to the International Space Station as soon as 2016. SpaceX's Dragon - America's Next Generation Spacecraft describes the extraordinary feats of engineering and human achievement that have placed this revolutionary spacecraft at the forefront of the launch industry and positioned it as the precursor for ultimately transporting humans to Mars. It describes the design and development of Dragon, provides mission highlights of the first six Commercial Resupply Missions, and explains how Musk hopes to eventually colonize Mars.

[The Israeli Peace Movement](#) Jan 28 2020 The Israeli peace movement has been in decline since the 2000s. In particular, the liberal Zionist groups, who call for peace for the sake of the security and continuity of Israel, have become paralysed and almost voiceless since the second Intifada. However, despite the stagnation around the Israeli-Palestinian Peace Process, this book argues that other important groups have emerged that present new ways to challenge the status quo. These are radical groups that act in solidarity with the Palestinians and human rights organisations and whose aim is to reveal the realities of the occupation and hold the government to account. Leonie Fleishmann argues that these groups have been, and remain, the agenda setters, pushing the more moderate groups to mobilise more quickly and encouraging them to take up more confrontational ideas. Using social movements theory, and based on 50 interviews and participant observation, this book sheds light on contemporary Israeli peace activism.

[Freedom of Speech and Islam](#) Sep 25 2019 Freedom of speech and expression is considered in the West a high public good and an important social value, underpinned by legislative and ethical norms. Its importance is not shared to the same extent by conservative and devout Muslims, who read Islamic doctrines in ways seemingly incompatible with Western notions of freedom of speech. Since the Salman Rushdie affair in the 1980s there has been growing recognition in the West that its cherished value of free speech and associated freedoms relating to arts, the press and media, literature, academia, critical satire etc. episodically clash with conservative Islamic values that limit this freedom for the sake of holding religious issues sacrosanct. Recent controversies - such as the Danish cartoons, the Charlie Hebdo affair, Quran burnings, and the internet film 'The Innocence of Muslims' which have stirred violent reactions in the Muslim world - have made the West aware of the fact that Muslims' religious sensitivities have to be taken into account in exercising traditional Western freedoms of speech. Featuring experts across a spectrum of fields within Islamic studies, Freedom of Speech and Islam considers Islamic concepts of blasphemy, apostasy and heresy and their applicability in the modern world.

[Adaptation in Contemporary Theatre](#) Aug 24 2019 Why are so many theatre productions adaptations of one kind or another? Why do contemporary practitioners turn so frequently to non-dramatic texts for inspiration? This study explores the fascination of novels, short stories, children's books and autobiographies for theatre makers and examines what 'becomes' of literary texts when these are filtered into contemporary practice that includes physical theatre, multimedia performance, puppetry, immersive and site-specific performance and live art. In [Adaptation in Contemporary Theatre](#), Frances Babbage offers a series of fresh critical perspectives on the theory of adaptation in theatre-making, focusing on meditations of prose literature within contemporary performance. Individual chapters explore the significance and impact of books as physical objects within productions; the relationship between the dramatic adaptation and literary edition; storytelling on the page and in performance; literary space and theatrical space; and prose fiction reframed as 'found text' in contemporary theatre and live art. Case studies are drawn from internationally acclaimed companies including Complicite, Elevator Repair Service, Kneehigh, Forced Entertainment, Gob Squad, Teatro Kismet and Stan's Cafe. [Adaptation in Contemporary Theatre](#) is a compelling and provocative resource for anyone interested in the potential and the challenges of using prose literature as material for new theatrical performance.

[Remembering the Cold War](#) Dec 21 2021 Remembering the Cold War examines how, more than two decades since the collapse of the Soviet Union, Cold War legacies continue to play crucial roles in defining national identities and shaping international relations around the globe. Given the Cold War's blurred definition - it has neither a widely accepted commencement date nor unanimous conclusion - what is to be remembered? This book illustrates that there is, in fact, a huge body of 'remembrance,' and that it is more pertinent to ask: what should be included and what can be overlooked? Over five sections, this richly illustrated volume considers case studies of Cold War remembering from different parts of the world, and engages with growing theorisation in the field of memory studies, specifically in relation to war. David Lowe and Tony Joel afford careful consideration to agencies that identify with being 'victims' of the Cold War. In addition, the concept of arenas of articulation, which envelops the myriad spaces in which the remembering, commemorating, memorialising, and even revising of Cold War history takes place, is given prominence.

[Bombing Germany: The Final Phase](#) Nov 19 2021 During 1942 and 1943 the striking power of RAF Bomber Command was transformed by the arrival of heavy bombers, advanced navigation and blind bombing systems, and new tactics to concentrate the bombers over the target and swamp the German defences. By October 1944 most of Germany's cities were in ruins, yet the bombing continued to intensify, reaching unprecedented levels in the final seven months of the air campaign. The value of further area raids was questioned during the opening months of 1945, yet the Allies destroyed the remaining cities in a bid to hasten the end of the war. The handful of German cities still largely unscathed in early February 1945 included Dresden, which was obliterated on 13 February. Ten days later, the South German city of Pforzheim was destined to suffer the same fate. This book commemorates the efforts of the aircrew members who risked their lives, consolidating a host of intriguing first-hand accounts. It also considers Pforzheim as a representative community under National Socialist rule. The city's survivors remember the horror of the raid and its aftermath, including eventual occupation by French Colonial troops and, subsequently, American forces. Tony does an admirable job of presenting historical context when considering actions in times of extreme trauma and his narrative offers an intriguing, engaging and poignant evocation of the closing months of Bomber Command's war.

[St. Kitts and Nevis](#) Jun 02 2020 This paper discusses St. Kitts and Nevis' Fifth and Sixth Reviews Under the Stand-by Arrangement (SBA) and Request for Waiver of Nonobservance of Performance Criterion. All fiscal program targets were met through end-March 2013, partly owing to strong receipts from the Citizenship by Investment program. The structural benchmark on drafting a proposal for a comprehensive pension reform, scheduled for end-June 2013, has been delayed to allow for further deliberations. The IMF Staff supports the authorities' request for the completion of the fifth and sixth reviews under the SBA and the waiver of applicability.

[Under Construction: Logics of Urbanism in the Gulf Region](#) Jun 26 2022 Interdisciplinary in approach, this volume explores and deciphers the symbolic value and iconicity of the built environment in the Arab Gulf Region, its aesthetics, language and performative characteristics. Bringing together a range of studies by artists, curators and scholars, it demonstrates how Dubai appeared - at least until the financial crisis - to be leading the construction race and has already completed a large number of its landmark architecture and strategic facilities. In

contrast, cities like the Qatari capital Doha still appear to be heavily 'under construction' and in countries like the Sultanate of Oman, ultra-luxury tourism projects were started only recently. While the construction of artificial islands, theme parks and prestige sport facilities has attracted considerable attention, much less is known about the region's widespread implementation of innovative infrastructure such as global container ports, free zones, inter-island causeways and metro lines. This volume argues that these endeavours are not simply part of a strategy to prepare for the post-oil era for future economic survival and prosperity in the Lower Gulf region, but that they are also aiming to strengthen identitarian patterns and specific national brands. In doing so, they exhibit similar, yet remarkably diverse modes of engaging with certain global trends and present - questionably - distinct ideas for putting themselves on the global map. Each country aims to grab attention with regard to the world-wide flow of goods and capital and thus provide its own citizens with a socially acceptable trajectory for the future. By doing that, the countries in the Gulf are articulating a new semiotic and paradigm of urban development. For the first time, this volume maps these trends in their relation to architecture and infrastructure, in particular by treating them as semiotics in their own right. It suggests that recent developments in this region of the world not only represent

Lady Gaga and Popular Music Feb 29 2020 This book is a multi-faceted, interdisciplinary examination of the music and figure of Lady Gaga, combining approaches from scholars in cultural studies, art, fashion, and music. It represents one of the first scholarly volumes devoted to Lady Gaga, who has become, over a few short years, central to both popular (and, indeed, populist) as well as more scholarly thought in these areas and who, the contributors argue, is helping to shape—directly and indirectly—thought and culture both in the fields of the "scholarly" and the "everyday." Lady Gaga's output is firmly embedded in a self-consciously intellectual pop culture tradition, and her music videos are intertextually linked to icons of pop culture intelligentsia like Alfred Hitchcock and open to multiple interpretations. In examining her music and figure, this volume contributes both to debates on the status of intertextuality, held in tension with originality, and to debates on the figuring of the sexualized female body, and representations of disability. There is interest in these issues from a wide range of disciplines: popular musicology, film studies, queer studies, women's studies, gender studies, disability studies, popular culture studies, and the burgeoning sub-discipline of aesthetics and philosophy of fashion.

European Welfare State Constitutions after the Financial Crisis Feb 08 2021 Hit by the European financial and economic crisis in 2008, several Member States of the European Monetary Union (EMU) were unable to refinance their public debt through the financial markets. As a result, they asked for financial assistance from international institutions and European financial assistance mechanisms. That assistance often came at a high price for citizens, cuts in pensions and social assistance, and controversial reforms in public healthcare. These far-reaching reforms were, in many cases, experienced as violations of people's human rights. National constitutional courts, the Court of Justice of the EU, and the European Court of Human Rights issued a series of rulings on the conformity of the reforms in social protection initiated during the Eurozone crisis. This book offers a holistic analysis of the specific reforms in social protection introduced during the European financial crisis and their implications for constitutional law. Focusing on the social reforms of nine European countries that were greatly affected by the financial crisis, the volume seeks to address the legacy of the financial crisis on the application of constitutional law and the welfare state. The book will act as a helpful tool to legal academics interested in the challenges of constitutional and social law initiated by financial assistance conditionality, to advocates in quest of sound legal bases for the protection of individuals affected by social security reforms, and to national and international judges who are confronted with cases that question the legality and legitimacy of the crisis-related reforms.

Constructing the Welfare State in the British Press Oct 07 2020 Analysing political discourse in the British press during a time of crisis and austerity, this book examines how the concept of the welfare state has been constructed between 2008 and 2015. At a time when the financial crisis and government policies have put the welfare state under increased pressure, a corpus from four British newspapers from across the political spectrum - the Guardian, Daily Mirror, Daily Mail, and Daily Telegraph - is brought together to investigate the political debate on its evaluation and the ambiguity about its exact definition. Combining two theoretical approaches, Malgorzata Paprota outlines the figurative models and scenarios relevant to this element of the political system. The discourse-historical approach to discourse analysis is used to establish what the welfare state is, tracing the boundaries of the concept and which elements of political reality are explicitly associated with it. Conceptual metaphor theory is then used to explore the figurative conceptualisations of the welfare state. Together, this book shows the discursive construction, and shifting boundaries and metaphors, of the welfare state by the British press and its use in current political debates.

The Routledge Companion to Ethnic Marketing Apr 12 2021 The globalization of marketing has brought about an interesting paradox: as the discipline becomes more global, the need to understand cultural differences becomes all the more crucial. This is the challenge in an increasingly international marketplace and a problem that the world's most powerful businesses must solve. From this challenge has grown the exciting discipline of ethnic marketing, which seeks to understand the considerable opportunities and challenges presented by cultural and ethnic diversity in the marketplace. To date, scholarship in the area has been lively but disparate. This volume brings together cutting-edge research on ethnic marketing from thought leaders across the world. Each chapter covers a key theme, reflecting the increasing diversity of the latest research, including models of culture change, parenting and socialization, responses to web and advertising, role of space and social innovation in ethnic marketing, ethnic consumer decision making, religiosity, differing attitudes to materialism, acculturation, targeting and ethical and public policy issues. The result is a solid framework and a comprehensive reference point for consumer researchers, students, and practitioners.

Crime, Law and Justice in New Zealand Jun 14 2021 Crime, Law and Justice in New Zealand examines the recent crime trends and the social, political, and legal changes in New Zealand from the end of the twentieth century to the present. Serving as the only New Zealand-specific criminal justice text, this book takes a direct look at what is unique about the country's criminal justice system and recent crime trends. Crime rates peaked in the early 1990s and have fallen since. Newbold considers why this happened through factors such as economy, ethnic composition, changing cultural trends, and legislative developments in policing and criminal justice. He unpacks various types of crime separately—violent crime, property crime, drug crime, gang crime, organised crime, etc.—and examines each in terms of the various complex factors affecting it, using illustrative examples from recent high-profile cases. The cover photo for Crime, Law and Justice in New Zealand was taken by Jono Rotman.

Political Insults Jul 24 2019 Five women entered the Cathedral of Christ the Saviour in Moscow and began a performance of a "Punk Prayer." Young people fried eggs on the eternal flame near the Tomb of the Unknown Soldier in Ukraine. A small island in the Japan Sea provoked a diplomatic spat between the leadership of Japan and South Korea. All of these incidents are examples of politically motivated insults that escalated into surprisingly significant clashes. While the field of conflict analysis has looked extensively at the dynamics of insults between individuals, it has largely ignored the more complicated dynamics of insult committed between groups, often of uneven political and social power. In this book, Karina V. Korostelina offers a novel framework for analyzing the ways in which seemingly minor insults between ethnic groups, nations, and other types of groups escalate to disproportionately violent behavior and political conflict. Insult can take many forms. Yet, as this book shows, it is always a social act mutually defined between groups, and it has the power to destabilize and redefine social and power hierarchies. Korostelina identifies six different drivers of political insults, producing a theoretical model for analyzing intergroup insult and conflict. She uses her model to explore each of the incidents above, among other recent conflicts, to explicate the complicated dynamics that figure within them. The book concludes with practical suggestions for analyzing and resolving complex conflict situations.

Aspirations, Access and Attainment Oct 19 2021 It is perhaps ironic that as the global financial crisis has, in some cases, led governments and institutions to pull back from and/or set more modest goals and associated funding around widening participation, there is an ever-growing sense that the ideals buttressing the widening participation movement are becoming more universally acknowledged by educators across the globe. That acknowledgement has translated into action on the ground via such means as policy formulation, strategic planning and target setting - each of which often reflects local contexts and manifests a regional 'flavour'. There is also, however, an increasing realisation that there are commonalities in the challenges involved with national or regional initiatives to increase the participation of non-traditional groups in higher education and that the drivers of such initiatives - and ultimately the cohorts they target - stand to benefit considerably from an open exchange of ideas and sharing of experience. This book brings together current regional perspectives on widening participation as presented by prominent academics, researchers, policy-makers, and students from across the globe. It will create for policy-makers, institutions, and individuals interested in enabling access, a useful and informative resource that will introduce, formulate, shape and reinforce the ideas and aims of the World Congresses on widening access. As the contributors maintain, in an increasingly globalised market economy and in the face of recent seismic economic, political and social change around the world, it is imperative to both secure existing talent within our populations and uncover and nurture new sources of talent. The series of essays featured in this book will explore, anticipate, and highlight themes underpinning a global movement towards a step-change in thinking, strategies, and policies - one that places youth and students from around the world at its heart.

Wild Law - In Practice Oct 26 2019 Wild Law - In Practice aims to facilitate the transition of Earth Jurisprudence from theory into practice. Earth Jurisprudence is an emerging philosophy of law, coined by cultural historian and geologist Thomas Berry. It seeks to analyse the contribution of law in constructing, maintaining and perpetuating anthropocentrism and addresses the ways in which this orientation can be undermined and ultimately eliminated. In place of anthropocentrism, Earth Jurisprudence advocates an interpretation of law based on the ecocentric concept of an Earth community that includes both human and nonhuman entities. Addressing topics that include a critique of the effectiveness of environmental law in protecting the environment, developments in domestic/constitutional law recognising the rights of nature, and the regulation of sustainability, Wild Law - In Practice is the first book to focus specifically on the practical legal implications of Earth Jurisprudence.

Assisting Reform in Post-Communist Ukraine, 2000?2012 Jul 16 2021 Duncan Leitch exposes the unexpected consequences of international aid for post-communist transitions. Examining the efforts to reform relations between Kiev and the regions of Ukraine, Duncan Leitch explores how and why fiscal decentralization and regional policy programs initiated by the Ukrainian government and supported by the Western donor community failed to achieve a sustainable outcome. Drawing on concepts from institutional theory, comparative politics, and development studies, Leitch explains the complex interactions between external donors and the domestic recipients of their advice. His findings shed light on the narrow circumstances under which short-term success can be achieved, but also point towards the failings of the donor community to lay the groundwork for lasting reform. A valuable resource for anyone working in the development sector in Eastern Europe or beyond, this book provides a new outlook on the political realities of the reform process, the relevance of international advice, and the domestic pressures leading to the Maidan uprising of 2013.

Holistic Perspectives on Trauma Dec 09 2020 Children with a history of significant neglect and/or physical, sexual, and/or emotional abuse are at higher risk for developing long-term emotional, behavioral, and mental health concerns, which have implications past childhood and into adulthood. Early trauma impacts individuals' health in ways that reach far past the obvious and immediate damage. It correlates with higher incidences of various mental health disorders, it can alter brain structures, and it can make individuals more susceptible to a variety of diseases, including cancer, cardiovascular disorders, fibromyalgia, and diabetes, among others. The research collected in this compendium offers vital guideposts to professionals across a wide spectrum of disciplines. It provides a foundation for ongoing research into this area of study, which is so vital for the well-being of our children and their futures. Understanding the long-term effects of childhood trauma is now integral to the daily clinical practice of professionals from many fields, including educators, social workers, mental health professionals, family and substance abuse counselors, police, caregivers, and criminal justice service providers. The boundaries between social workers and other professionals are blurred or nonexistent. This insightful book provides a nuanced look at the outcomes of childhood trauma and provides a greater understanding to help build more effective cross-disciplinary intervention strategies.

The Future of Religious Leadership Jun 22 2019 The chapters collected in this book, prepared by a think tank of the Elijah Interfaith Academy, address the subject of religious leadership. The subject is of broad relevance in the training of religious leaders and in the practice of religious leadership. As such, it is also germane to religious thought, where reflections on religious leadership occupy an important place. What does it mean to be a religious leader in today's world? To what degree are the challenges that confront religious leadership today the same perennial challenges that have arrested the attention of the faithful and their leaders for generations, and to what degree do we encounter challenges today that are unique to our day and age? One dimension is surely unique, and that is the very ability to explore these issues from an interreligious perspective and to consider challenges, opportunities, and strategies across religious traditions. Studying the theme across six faith traditions—Christianity, Islam, Judaism, Sikhism, Hinduism, and Buddhism—The Future of Religious Leadership: World Religions in Conversation recognizes the common challenges to present-day religious leadership. Contributors: Awet Andemicael, Timothy J. Gianotti, Alon Goshen-Gottstein, Anantanand Rambachan, Maria Reis Habito, Meir Sender, Balwant Singh Dhillon, Miroslav Volf

Producing Women Jul 04 2020 Producing Women examines the ways femininity is produced through new media. Michele White considers how women are constructed, produce themselves as subjects, form vital production cultures on sites like Etsy, and deploy technological processes to reshape their identities and digital characteristics. Incorporating a range of examples across numerous forms of media—including trash the dress wedding photography, Internet how-to instructions about zombie walk brides, nail polish blogging, DIY crafting, and reborn doll production—Producing Women elucidates women's production cultures online, and the ways that individuals can critically study and engage with these practices.

Encounters with World Affairs Mar 31 2020 This book is designed to familiarise students with leading International Relations (IR) theories and their explanation of political events, phenomena, and processes which cross the territorial boundaries of the state. Thus, students will be exposed to the interplay between power, interest, ideas, identity, and resistance, in explaining continuity and change in international relations. Equipping students with the proficiency:  $\phi$  to understand and interpret the dynamics, patterns, and issues of global affairs  $\phi$  to know how to get more information about particular questions  $\phi$  to evaluate that information independently and effectively.
