This fourth edition of *Law in Context* not only updates the text by reference to the latest thinking and developments in the broad area of 'law in context', but also introduces readers to the wider social, political and regulatory contexts of law. Bottomley and Bronitt, as in previous editions, expose readers to the multitude of contexts (some explicit, others implicit) that affect how law is made, broken and enforced by the state or individual citizens. The fundamental ideals of law - such as the Rule of Law - rest on cherished liberal values, though the authors constantly encourage readers not to accept uncritically the rhetoric of law, but to test these assumptions through empirical eyes. This contextual and critical approach to law, laid out in Chapter 1 and 2, is further developed through specific studies of Gender and Race. Complementing these substantive critiques of law, later chapters examine some of the institutional limitation of law and justice through chapters on access to justice, the law-making process, and regulation. The final chapter, which serves as an epilogue, looks to the broader challenges for law in an age of globalisation through case studies on terrorism and global business regulation.

Basic Strategy in Context Feb 27 2020 *Basic Strategy in Context* centres on real-world firms and managers by giving each chapter's cases a higher weighting in importance and explanation than is normal. Given this emphasis on real-world as opposed to theoretical treatment the book enables the solving of practical business problems like those below. This emphasis on reality is cemented by the

book's treatment of diversity as being the norm highlighted through European business cases from different countries. Giving example answers and links from case to theory rams home further the expected usefulness of the book to students about to enter industry. Often theory and cases are treated as different and separated topics; we believe that our integrated didactic treatment is quite unique. Finally we use the basic theories of strategy and then show how these mainly simple concepts can be extended to solve tricky business problems anywhere in any industry. Here is a sample of specific practical problems to which this book can show solutions: Why are resources important and how are they leveraged? Using the case of a British failure (Railtrack) we show the fatal consequences of neglecting existing resources, and then in a completely different country and industry (Carlo Gavazzi Space in Italy) how resources can be utilised from outside the firm to achieve leverage. Given our emphasis on diversity we highlight successful change in a foreign and inflexible environment (Japan and Carlos Ghosn). But can change be planned? Sometimes events or luck sabotage the best intentions as shown in the Samsung case. The book differentiates itself from the competition in four ways: Cases form the highlight of the book. Taking European and some international cases as the starting point, the objective is to link themes or topics to a description of their effect on the firm. The linkage will occur at the relevant point in the case, not in a separate section or in another book. The author team has used several longitudinal cases spread over a 15-20 year period. The longitudinal cases are supported by some new, non-longitudinal cases selected from award winning cases associated with the LRP Journal and the Gate2Growth Academic Network. We feel such an emphasis on cases is a novel feature. The theory is explained using a range of modern didactic methods not usually found in competitive offerings. Examples include colour coded and highlighted links from the theory to the case, questions inside each theory section with model answers and unanswered questions to test the student's grasp of the concepts. The book features a mixture of cases from short specific to academically challenging ones. Too often, superficial cases are placed at the end of chapters in strategy theory books. They are picked to emphasize the topics of the preceding chapters. The result is spoon-feeding, with little need or motivation to provoke individual thought or learning. The cases in this book are comprehensive, approximately 20 pages in length, with ample quantitative and qualitative data, thus forcing a modicum of effort from the student. Shorter cases are also included for ease of understanding and instructor flexibility. Another differentiating feature is the emphasis on diversity hence the use of European as opposed to US based cases. "Thomson and Baden-Fuller have crafted a highly original and practical strategy textbook covering a wide range of strategic issues, debates, and frameworks. Their work contains a thorough overview of the strategy field, appealing cases of European firms such as Abrakebabra and Your cup of tea, as well as insightful treatises on the Brent Spar ignominy and the weapon industry. The clever combination of mini-cases, theory, questions and full-fledged cases, and a clear overall structure ensure that students obtain a representative image of strategy as it plays out in the 21st century." —Paul W.L. Vlaar, Associate Professor, Vrije Universiteit Amsterdam, Faculty of Economics and Business Management

The Human Rights Fundamentals of Conservation in the Context of the Extraction of Energy Resources Nov 25 2019 English summary: Energy is the driving force of human development and economic growth. The ceaseless demand for energy resources has triggered the development of extraction projects around the world. This, in turn, has exerted a significant pressure on natural resources as well as on the environment. Since the performance of human rights depends on the environment and on access to natural resources, this Study aims to show the extent to which the negative environmental impact arising from extraction operations prevents the effective realization of human rights. The analysis of substantive and procedural human rights in the light of the case law of international human rights courts provides all stakeholders involved in an energy extraction project with the tools and mechanisms to prevent environmental damage and to ensure the protection of human rights. German description: Energie ist ein entscheidender Faktor für das Wirtschaftswachstum. Die unaufhörliche Nachfrage nach Energieressourcen hat die Entwicklung von Förderprojekten in der ganzen Welt ausgelöst. Dies wiederum hat sowohl einen erheblichen Druck auf die natürlichen Quellen als auch auf die Umwelt ausgeübt. Da die effektive Verwirklichung der Menschenrechte von einer sauberen und gesunden Umwelt abhängt, bezweckt diese Arbeit anhand unterschiedlicher Beispiele zu belegen, dass die Energierohstoffgewinnung sich negativ auf wichtige ökologische Voraussetzungen für die effektive Ausübung der Menschenrechte auswirkt. Im Lichte der Rechtsprechung internationaler Menschenrechtsgerichte zeigt diese Arbeit, dass die Gerichte auf Umweltgrundsätze und -normen zurückgegriffen haben, um Umweltschaden zu verhindern und den Schutz der Menschenrechte zu gewährleisten.

Integrative Approaches to Psychology and Christianity, Fourth Edition Aug 23 2019 Since the first edition of *Integrative Approaches to Psychology and Christianity* was published in 2004, this has become the standard textbook on the topic. Now in its fully revised fourth edition, Dr. Entwistle's book elucidates historical, philosophical, and practical issues in the integration of psychology and Christianity. As in previous editions, the current text provides an introduction to many of the worldview issues and philosophical foundations that frame the relationship of psychology and theology, includes scholarly reflection on the integration literature, and surveys six models of possible relationships between psychology and Christianity, ranging from those that are completely opposed to either religion or psychology, to intermediate models that assert that some limited interaction between them is possible, to viewpoints which suggest that a Christian worldview approach can be used to provide a context for exploring areas of overlapping interest between psychology and Christianity. The current edition considers recent advances in both Catholic and Protestant thinking on integration, including contemporary questions about what evangelicalism is (and is not) that shape evangelical reactions to the integration debate. New content ranges from information about the contrasting views of Tertullian and Augustine, to insights from contemporary psychology about factors that adversely affect the quality and reliability of human thinking, to how conflict over COVID-19 has entered contemporary religious debate. The book is designed to help readers become aware of the presuppositional backdrops that each of us brings to these issues. Questions at the end of each chapter are included to help readers evaluate both the material and their own burgeoning approach to integration. This book is ideal as a textbook for students of psychology and other behavioral and social sciences (social work, sociology, theology, counseling, pastoral counseling) at both the graduate and undergraduate level. It is also written for the broader readership of psychologists, counselors, pastors, and others who are interested in integration.

China - Opportunities for International Media Businesses: Giving Historical Context, Media Import and Export Jul 02 2020

"The presence of television is influencing the future of China in ways that no other technology or human agency can" (J. Lull). Given its' importance, both culturally and politically, the television industry is one of the most interesting industries in China. However, a quick review of regulations and market realities showed that there are virtually no foreign channels in the country and probably won't be for a while; therefore the focus of this report is foreign television content entering China - and, to a slightly lesser degree, Chinese content in global markets. All video genres are discussed here, with news and current affairs programming being a special case. The first part of this report is a short introduction that includes the history of political influence and a review of existing regulations. After

this overview, the industry and major players (namely CCTV, Xinhua, News Corp, Phoenix, Disney, Discovery, Viacom) are introduced and analyzed. Here, the issue of cultural imperialism, or Western media influence, is elaborated on. Then, the paper discusses the opportunities for international firms in the Chinese media market and the tension between Government control and market liberalisation. A compelling answer to the question of who will dominate the domestic market in ten years is developed. Finally, the impact of Chinese content on international markets will be assessed within the same timeframe. This is particularly interesting as media is not a traditional manufacturing industry and poses different challenges i.e. creative skills.

Psychology in Historical Context Oct 05 2020 Psychology, the study of mind and behaviour, has developed as a unique discipline in its brief history. Whether as it currently takes place, or how it has been conducted over the past 140 years or so since it became recognized as a separate field of study, there has been constant debate on its identity as a science. *Psychology in Historical Context: Theories and Debates* examines this debate by tracing the emergence of Psychology from parent disciplines, such as philosophy and physiology, and analyzes key topics such as: the nature of science, itself a much misunderstood human activity often equated with natural science; the nature of the scientific method, and the relationship between data gathering and generalization; the nature of certainty and objectivity, and their relevance to understanding the kind of scientific discipline Psychology is today. This engaging overview, written by renowned author Richard Gross, is an accessible account of the main conceptual themes and historical developments. Covering the core fields of individual differences, cognitive, social, and developmental psychology, as well as evolutionary and biopsychology, it will enable readers to understand how key ideas and theories have had impacts across a range of topics. This is the only concise textbook to give students a thorough grounding in the major conceptual ideas within the field, as well as the key figures whose ideas have helped to shape it.
