[In Another Time](#) May 22 2022 There are no paradoxes in time, only looped back versions of history we call alternate realities. Under the sands of Egypt and near the Sphinx, two amateur archeologists make a most unexpected find. Instead of a Pharaoh's tomb, they uncover an ancient, dust-choked room filled with books, computers and modern equipment. The tomb is at least five thousand years old. Slowly, the young spelunkers unravel the mystery of the apparent paradox. They also discover a working Time Machine. Time itself has taken an alternate course. The powerful European Trade Confederation bullies a depressed, non-nuclear United States. The British Empire controls their colonial possessions with an iron fist. Time for the young discoverers is running out. Global events are slowly colliding where retaining the secret of their discovery is almost impossible. A race develops to get the secrets of time travel out of the country.

[The Shroud Conspiracy](#) Jan 06 2021 In this intense and “ absolutely brilliant thriller ” (#1 New York Times bestselling author Brad Thor), a forensic anthropologist sets out to prove that the Shroud of Turin is a fake, but quickly discovers the opposite—and must race to stop the evil forces who want to use traces of blood in the fabric to clone Jesus Christ and bring on the second coming of their own design. Throughout his career, forensic anthropologist and outspoken atheist Dr. Jon Bondurant has investigated many religious artifacts said to be real, but he knows better. Only weak minds rely on such obviously false relics to maintain their silly, pointless faith. So when he is invited by the Vatican to examine the Shroud of Turin, said to be the burial cloth that covered the body of Christ—and the most revered of all Christian artifacts—he is delighted for the opportunity to prove once and for all that the Shroud is a fake. But when he meets Domenika Josef, the beautiful and devout Vatican representative who finds him arrogant and self-important, he realizes his task will not be as straightforward as he once imagined. Domenika believes that the relic is real, and wants nothing more than to rescue the tarnished reputation of the church by announcing the good news. As Bondurant and his team examine every element of the Shroud, he and Domenika begin to see each other in a whole new light. And as the evidence about the origin of this highly contested piece of fabric starts to pile up, he begins to realize that he ' s been seeing a lot of things incorrectly. But when a sample of the blood from the Shroud—believed to be the real blood of Jesus Christ—vanishes, he realizes his problems are just beginning. The DNA in that sample could have earth-shattering consequences if it falls into the wrong hands. When Domenika vanishes too, Bondurant is caught in a globe-spanning chase to rescue the woman he loves—and stop the evil forces who have their own motives for bringing on the Second Coming.

The Leaves of Time Sep 14 2021 The Gorgon came from some time line far across the multiple worlds. It moved among men, looking always as though it was one of them. But it was not a man; it was a destroyer! This creature would willingly destroy the universe, in all its alternate world-lines. It could not tolerate other forms of life, could not permit them to exist. The first a world knew of the beast in its midst was when its citizens began dying, horribly, and then it was already too late.

Cloned Lives Jul 12 2021 This debut sci-fi novel by the Nebula and Locus Award – winning author of *The Shore of Women* follows five human clones in an unforgiving world. Shock and outrage greet Paul Swenson's announcement of the success of his latest and most controversial scientific endeavor. Having taken advantage of a brief lull in legislative restrictions, the renowned astrophysicist and a team of bioscientists have created five human clones—four males and one female—from Swenson's own genetic material. From the moment Michael, Edward, Albert, James, and Kira Swenson are revealed to the world, they are viewed with hostility and suspicion. Growing up under the heavy yoke of specialness, the five exceptional human "experiments" have no one but each other to turn to for emotional support. Then tragedy strikes and everything falls apart. . . Now Kira and her brothers must follow their destinies down separate, divergent paths. Heading out into a world that never welcomed them, each clone is intent on pursuing knowledge, career, family—all the desired elements of a so-called normal life. But they cannot escape their shared past, because the true purpose behind Paul Swenson's remarkable achievement remains shrouded in shadow. And his children are prepared to travel to the ends of the Earth and beyond for an answer to the question that has always haunted them: Why were we made?

The House of Great Spirit May 10 2021 The locales of these stories range from California and Utah to Massachusetts and Vermont. The characters seek a paradise of one kind or another but have to make do with the world such as it is -- and all attendant twists and turns. Had this book a motto, it would be, "Don't let the bastards grind you down." In *The House of Great Spirit*, the title story in this collection, the narrator lives "in a small room in a big three-story red brick boarding house in Salt Lake City" where the "live-in-manager was Jon Severs. Already, only in his mid-twenties, lanky Severs had found his calling. It was his job to scold the tenants at Jack Mead's house in Mead's stead — to bawl them out. On rent day he went room to room to collect money. If you didn't pay at once, he screwed his face up in a look of almost crushing contempt." Though there are also incidences of grace, courage, and joy along the way, things generally go from bad to worse. They say it's always good to touch bottom, in order to start over again. A female narrator once married to the character Eben Anders, admits "there were times I wished we'd never met. When we did first meet, I fell for him." She tells the story of how, as a younger man, Eben had found a treasure not only of money, but also of revelations. Finding himself in the role of prophet, Eben was "denounced as a madman, liar, scoundrel, false prophet, and the rest. He'd be accused of witchcraft, wizardry, demonism, and Freemasonry, with a mind to eventual world subjugation. He'd even be called the living Anti-Christ. 'Don't kill the messenger,' is all Eben would ever say to all of that." They say you can't win for losing. His ex-wife, having divorced Eben and renounced "Ebenism", is now accused of "destroying uncounted sacred privileges and worlds and futures." She's having none of that. In *With a View to The Sea*, librarian Lars Donnelly tells the story of his voyage from his west coast roots to his marriage and years of parenting in the east. Lars had explained it to his wife, "I don't want my kids to be asking me in future years, 'What did you do in the Internet Revolution, daddy?' and have to tell them that I'd just played it safe." He proposes going, with his teenage son Sean, to an important conference, "eBooks and Libraries," taking place in southern California, right on the oceanfront. "They reached the convention center around half past eight, giving them plenty of time to take advantage of the free Continental Breakfast while hobnobbing, or not, with the growing throngs of librarians, library trustees, heads of library Friends groups, chief executive officers, directors of operations, product managers, senior and junior business development managers, senior and junior systems analysts, and a broad swath of consultants, hackers, geeks, and gawkers." And maybe a ghost from the past. They say what goes around comes around, but what could possibly go wrong?

Saviour - After Earth: Ghost Stories (Short Story) Apr 09 2021 On a distant planet called Nova Prime, the United Ranger Corps defends the galaxy's remaining humans from an alien race known as the Skrel and their genetically engineered predators, the Ursa—and one Ranger will learn just how high the cost of victory can be. "Ghost Stories: Saviour" is the fifth of six eBook short stories that lead up to the events of *After Earth*, the epic science fiction adventure film directed by M. Night Shyamalan and starring Jaden Smith and Will Smith. Ranger Jon Blackburn wakes up from voluntary brain surgery, dazed and confused. He is a hero. . .

or at least he will be one, if the delicate operation to remove his sense of fear was successful. Blackburn consented to take part in the experimental initiative to increase the Rangers' reserve of " Ghosts, " soldiers whose lack of fear renders them invisible to the deadly Ursa. All indications are that it's a spectacular success—but Blackburn doesn't feel special; he doesn't feel honored when Cypher Raige, the Original Ghost, personally thanks him. In fact, he doesn't really feel much of anything. Doctors say that his fear is gone, but something else is missing, too; something Blackburn may not be able to get back, unless he can piece together this twisted jigsaw puzzle and find a way to become whole again.

SALVORS Aug 13 2021 **SALVORS - UNCUT AND UNFINISHED.** The story covers three time frames, 1942 the middle of the Second World War, the ensuing years, and finally the present day. It tells of how the lives of several men, their families and friends are linked in a deadly mystery involving the loss of life, a large quantity of uncut diamonds and gold bullion, and how they become drawn into another far greater loss. In 1942 a British unarmed Liberator aircraft leaves the Belgian Congo carrying not only uncut diamonds and gold but five high ranking United States Army officers on a secret visit to Britain. They had joined the aircraft in Egypt but towards the end of its journey the aircraft is shot down by two spitfires who mistake it for an enemy plane, all on board are lost, no efforts were made to recover the aircraft or its contents, the relatives of those on board were informed their loved ones were lost in action, this is based on a true event. After the loss is known a senior member of the Ministry of Mines in the Congo, removes all records of the transaction from the files. A family member of one of the US officers promises the widow that one day he would make sure her husband's remains will be returned to the USA for burial. He dies before he can achieve this so his son undertakes to carry out the task, as his chosen profession is that of Marine Engineer he feels qualified to achieve this. It is not until many years later he can obtain any information about his Grandfather's death, there is a limit to what the records show in the US archives, so he plans a trip to England to meet an old friend from Cambridge to gather more details. Two other parties develop a great interest in the aircraft and contents, they show they will go to any lengths necessary to achieve their objectives. These individuals clash sometimes violently, involving innocent members of the families and their friends in this battle for what they hold dearest, family or greed. The international fight attracts the interest of many parties involved in the initial movement of the aircraft and its contents, they want part of the action this leaves a trail of dead and injured bodies. The attempts to find and salvage the remains of the aircraft and its contents is one of immense hardship, fighting the physical elements above the water, and the never ending struggle to get the sea to give up its secrets, the lives of those involved will never be the same again. On Complementation in Icelandic Aug 01 2020 This study deals with the complementation of verbs in Icelandic. The main emphasis is on clausal complements of verbs and the syntactic rules that operate in and on such complements. This study is written with two kinds of readers in mind. First, it is written for the theoretical linguist who is looking for phenomena of general theoretical interest, i.e. facts about Icelandic syntax that bear on the question what an adequate general linguistic theory must be like and hence shed some light on the nature of human language. Second, the study is also written with a different kind of reader in mind, namely a reader who is interested in Icelandic syntax in particular, perhaps from a more descriptive point of view.

The Southern Cross Oct 23 2019 Since before the Panama Canal was constructed, America has enjoyed a strong presence throughout Latin America. With military spending cuts and focusing more on the Middle East and the Balkans, this stabilizing presence has been critically reduced. The once dominant Southern Command is now headquartered in Florida. The region below the Rio Grande is ripe for widespread revolution: peasant uprisings in Mexico; civil war in Guatemala; thirty thousand demobilized soldiers and guerrillas in El Salvador; border disputes with Honduras; riots in Nicaragua; heavy rebel fighting along the Colombian and Panamanian border; rampant drug smuggling with drug lords protected by armies of mercenaries. As the U.S. has pulled out, the Japanese have quietly moved in, buying up mineral rights from Mexico to Venezuela. Potentially rich oil fields have been discovered that could make its owners completely independent of Western Trade, not to mention immense wealth and power. Out of the flames of the invasion of Panama, one conspiracy was destroyed. But now, it is about to come full circle.

Multiplex and Multilevel Networks Aug 21 2019 The science of networks represented a substantial change in the way we see natural and technological phenomena. Now we have a better understanding that networks are, in most cases, networks of networks or multi-layered networks. This book provides a summary of the research done during one of the largest and most multidisciplinary projects in network science and complex systems (Multiplex). The science of complex networks originated from the empirical evidence that most of the structures of systems such as the internet, sets of protein interactions, and collaboration between people, share (at least qualitatively) common structural properties. This book examines how properties of networks that interact with other networks can change dramatically. The authors show that, dependent on the properties of links that interconnect two or more networks, we may derive different conclusions about the function and the possible vulnerabilities of the overall system of networks. This book presents a series of novel theoretical results together with their applications, providing a comprehensive overview of the field.
