iClone 4.31 3D Animation Beginner's Guide Jun 28 2020 Reallusion's iClone is an animated movie making application that allows hobbyists, machinimators, home-based animators, and professionals to visualize their story or an idea by seeing it in action. Years ago, creating animations and single images would require a team of trained artists to accomplish. Now, iClone real time rendering engine empowers its users to instantly view what is loaded into the 3D workspace or preview it as an animation, if you have the precise instructions. The *iClone 3D Animation Beginner's Guide* will walk you through the building and animating of a complete scene and several one-off projects. First we create a scene with sky, terrain, water, props and other assets. Then add two characters and manipulate their features and animate their movement. We will also use particles to create the effect of a realistic torch and animate cameras to give different views to the scene. Finally we will see how to quickly import images to enhance the scene with a mountain, barn, and water tank. It will cover some fun stuff such as playing with props, characters, and other scene assets. It will also demonstrate some advanced topics such as screen resolution, formats and codecs but mostly it will deal with doing hands on animation with precise instructions. Starting with a blank project using stock and downloadable assets you will learn to lay out and animate a scene and export that scene to both a single image and a movie. The main project will demonstrate many common and undocumented techniques, while each project introduces and examines tools and techniques for successful and fun animation of ideas or scripts. Each project of the book including the main project is designed to cover the aspects of 3D animation in a manner which anyone with basic computer skills can follow. Red Green's Beginner's Guide to Women Jul 30 2020 Red Green is celebrated as one of the handiest men in North America. But as well as being a purveyor of inventive practical advice on, for example, making a jetpack from two propane tanks, a hybrid car from recycled golf carts and satellite dishes, and a kiddie ride from a bar stool attached to the agitator of a washing machine, Red Green is also noted for his insights into that most difficult of assembly jobs, human relationships. His previous bestselling tome, *How to Do Everything*, showed Red dipping his toe into the self-help genre with such items as "How to make dinner more romantic" and "The easy way to raise children." Now Red Green -- a veteran husband (of Bernice), father, soul-searcher, philosopher and observer -- has devoted an entire book to sharing with other battle-weary and confused males all he has learned about the differences between the sexes. Set out in approximately chronological order, from teen dating to the last words of men ("You know, honey, in the last couple of years, you've really packed on the beef"), this is the testosterone owner's manual to every aspect of finding a mate and then learning to deal with her growing disappointment in you. The man who has already shared such morsels as "If you can't be handsome, be handy" and "Quando omni flunkus moritati" ("When all else fails, play dead") here presents a PhD in life-lessons about the most vexing problem facing mankind today, or any day: women.
