Restoring the Soul of the University Aug 24 2019 Has the American university gained the whole world but lost its soul? Christian universities must reimagine excellence in a time of exile, placing the liberating arts before the liberal arts and focusing on the worship, love, and knowledge of God as central to academia. This pioneering work charts the history of the university and casts an inspiring vision for the future of higher education.

Data Science in R Jun 02 2020 Effectively Access, Transform, Manipulate, Visualize, and Reason about Data and Computation Data Science in R: A Case Studies Approach to Computational Reasoning and Problem Solving illustrates the details involved in solving real computational problems encountered in data analysis. It reveals the dynamic and iterative process by which data analysts approach a problem and reason about different ways of implementing solutions. The book's collection of projects, comprehensive sample solutions, and follow-up exercises encompass practical topics pertaining to data processing, including: Non-standard, complex data formats, such as robot logs and email messages Text processing and regular expressions Newer technologies, such as Web scraping, Web services, Keyhole Markup Language (KML), and Google Earth Statistical methods, such as classification trees, k-nearest neighbors, and naïve Bayes Visualization and exploratory data analysis Relational databases and Structured Query Language (SQL) Simulation Algorithm implementation Large data and efficiency Suitable for self-study or as supplementary reading in a statistical computing course, the book enables instructors to incorporate interesting problems into their courses so that students gain valuable experience and data science skills. Students learn how to acquire and work with unstructured or semistructured data as well as how to narrow down and carefully frame the questions of interest about the data. Blending computational details with statistical and data analysis concepts, this book provides readers with an understanding of how professional data scientists think about daily computational tasks. It will improve readers' computational reasoning of real-world data analyses.

Immigrant Neighbors among Us Aug 29 2022 How do different Christian denominations in the United States approach immigration issues? In Immigrant Neighbors among Us, U.S. Hispanic scholars creatively mine the resources of their theological traditions to reflect on one of the most controversial issues of our day. Representative theologians from Roman Catholic, Lutheran, Reformed, Methodist/Wesleyan, Pentecostal, and Independent Evangelical church families show how biblical narratives, historical events, systematic frameworks, ethical principles, and models of ministry shape their traditions' perspectives on immigrant neighbors, law, and reform. Each chapter provides questions for dialogue.

Political Theory and Architecture Oct 07 2020 What can political theory teach us about architecture, and what can it learn from paying closer attention to architecture? The essays assembled in this volume begin from a common postulate: that architecture is not merely a backdrop to political life but a political force in its own right. Each in their own way, they aim to give countenance to that claim, and to show how our thinking about politics can be enriched by reflecting on the built environment. The collection advances four lines of inquiry, probing the connection between architecture and political regimes; examining how architecture can be constitutive of the ethical and political realm; uncovering how architecture is enmeshed in logics of governmentality and in the political economy of the city; and asking to what extent we can think of architecture-tributary as it is to the flows of capital-as a partially autonomous social force. Taken together, the essays demonstrate the salience of a range of political theoretical approaches for the analysis of architecture, and show that architecture deserves a place as an object of study in political theory, alongside institutions, laws, norms, practices, imaginaries, and discourses.

An Essential Guide to Public Speaking Mar 31 2020 Communication expert and popular speaker Quentin Schultze offers a practical, accessible, and inspiring guide to public speaking, showing readers how to serve their audiences with faith, skill, and virtue. This thoroughly rewritten and expanded four-color edition has been tested and revised with input from Christian undergraduates and contains new chapters on timely topics, such as speaking for video, conducting group presentations, and engaging society civilly. A complete public speaking textbook for Christian universities, it includes helpful sidebars, tips, and appendixes. Additional resources for students and professors are available through Textbook eSources.

The 21st Century Crossword Puzzle Dictionary Sep 29 2022 Finally, a crossword dictionary with all the words solvers need--and none of the ones they don't! When it comes to puzzle dictionaries, it's the "quality" of what's inside that counts. To make the dictionary even easier to use, the most popular answers stand out in easy-to-see red, while charts highlight frequently sought-after information such as Oscar winners and Popes' names. Crossword fans will keep this right next to their favorite puzzles!

The Handbook of Ad Hoc Wireless Networks Oct 26 2019 A relative newcomer to the field of wireless communications, ad hoc networking is growing quickly, both in its importance and its applications. With rapid advances in hardware, software, and protocols, ad hoc networks are now coming of age, and the time has come to bring together into one reference their principles, technologies, and techniques. The Handbook of Ad Hoc Wireless Networks does exactly that. Experts from around the world have joined forces to create the definitive reference for the field. From the basic concepts, techniques, systems, and protocols of wireless communication to the particulars of ad hoc network routing methods, power, connections, traffic management, and security, this handbook covers virtually every aspect of ad hoc wireless networking. It includes a section that explores several routing methods and protocols directly related to implementing ad hoc networks in a variety of applications. The benefits of ad hoc wireless networks are many, but several challenges remain. Organized for easy reference, The Handbook of Ad Hoc Wireless Networks is your opportunity to gain quick familiarity with the state of the art, have at your disposal the only complete reference on the subject available, and prepare to meet the technological and implementation challenges you'll encounter in practice.

Computing and Combinatorics Jun 22 2019 This book constitutes the refereed proceedings of the 19th International Conference on Computing and Combinatorics, COCOON 2013, held in Hangzhou, China, in June 2013. The 56 revised full papers presented were carefully reviewed and selected from 120 submissions. There was a co-organized workshop on discrete algorithms of which 8 short papers were accepted and a workshop on computational social networks where 12 papers out of 25 submissions were accepted.

The Wired Homestead Jul 04 2020 Multidisciplinary essays on the effects of the internet on family life, in particular parental oversight of children's use of the World Wide Web. The use of the internet in homes rivals the advent of the telephone, radio, or television in social significance. Daily use of the World Wide Web and e-mail is taken for granted in many families, and the computer-linked internet is becoming an integral part of the physical and audiovisual environment. The internet's features of personalization, interactivity, and information abundance raise profound new issues for parents and children. Most researchers studying the impact of the internet on families begin with the assumption that the family is the central influence in preparing a child to live in society and that home is where that influence takes place. In The Wired Homestead, communication theorists and social scientists offer recent findings on the effects of the internet on the lives of the family unit and its members. The book examines historical precedents of parental concern over "new" media such as television. It then looks at specific issues surrounding parental oversight of internet use, such as rules about revealing personal information, time limits, and web site restrictions. It looks at the effects of the web on both domestic life and entire neighborhoods. The wealth of information offered and the formulation of emerging issues regarding parents and children lay the foundation for further research in this developing field. Contributors Robert Kraut, Jorge Reina Schement, Ellen Seiter, Sherry Turkle, Ellen Wartella, and Barry Wellman

Juniper QFX10000 Series Jun 26 2022 Like the popular guides The MX Series and Juniper QFX5100 Series, this practical book—written by the same author—introduces new QFX10000 concepts in switching and virtualization, specifically in the core of the data center network. The rise of cloud computing with service providers and the need to create private clouds for enterprise, government agencies, and research institutions of all shapes and sizes is creating a high demand for high-density 40GbE and 100GbE in the core of the data center network. The Juniper QFX10000 Series was introduced by Juniper Networks to solve these challenges, and it is a game-changer. This new book by Douglas Hanks is the authoritative guide. Topics include: Device Architecture Flexible Deployment Scenarios Performance and Scaling Disaggregation of Software and Hardware Data Center API Next Generation QFabric Network-Based Overlay Fabric Network Analytics

Web Technologies and Applications Dec 21 2021 This LNCS double volume LNCS 9931-9932 constitutes the refereed proceedings of the 18th Asia-Pacific Conference APWeb 2016 held in Suzhou, China, in September 2016. The 79 full papers and presented together with 24 short papers and 17 demo papers were carefully reviewed and selected from 215 submissions. the focus of the conference was on following subjects: Spatio-temporal, Textual and Multimedia Data Management Social Media Data Analysis Modelling and Learning with Big Data Streaming and Real-time Data Analysis Recommendation System Data Quality and Privacy Query Optimization and

Scalable Data Processing

The Regional Impacts on Turkey's Zero Problems with Neighbors Policy Toward Iraqi Kurdistan May 14 2021 "This book has two specific objectives. First is to examine the Kurdish regional impacts by looking at the engagement of non-state actors such as Kurds in Syria, the PKK, and ISIS; second is to analyze the challenges and the opportunities raised after 2011 for implementation of the ZPN policy towards Iraqi Kurdistan by Turkey"--

Year Book of Pediatrics 2016, Apr 12 2021 Year Book of Pediatrics brings you abstracts of the articles that reported the year's breakthrough developments in pediatrics, carefully selected from more than 500 journals worldwide. Expert commentaries evaluate the clinical importance of each article and discuss its application to your practice. Articles are selected to cover the full breadth of the specialty, from gastroenterology, hematology, adolescent medicine, allergy and immunology, to urology, neurology, and therapeutics and toxicology.

Promoting Peace, Inciting Violence Apr 24 2022 This book explores the role that media and religion play in promoting peace and inciting violence, using a wide range of examples drawn from around the world.

Gentrification around the World, Volume I Nov 19 2021 Bringing together scholarly but readable essays on the process of gentrification, this two-volume collection addresses the broad question: In what ways does gentrification affect cities, neighborhoods, and the everyday experiences of ordinary people? In this first volume of Gentrification around the World, contributors from various academic disciplines provide individual case studies on gentrification and displacement from around the globe: chapters cover the United States of America, Spain, Brazil, Sweden, Japan, Korea, Morocco, Great Britain, Canada, France, Finland, Peru, India, Indonesia, Pakistan, Syria, and Iceland. The qualitative methodologies used in each chapter—which emphasize ethnographic, participatory, and visual approaches that interrogate the representation of gentrification in the arts, film, and other mass media—are themselves a unique and pioneering way of studying gentrification and its consequences worldwide.

All the GMAT Feb 20 2022 Publisher's Note: Products purchased from third-party sellers are not guaranteed by the publisher for quality, authenticity, or access to any online entitles included with the product. ‹ Manhattan Prep's All the GMAT set is an updated and expanded version of the 10-book Complete GMAT Strategy Guide Set (6th Ed). We've taken the 10 guides, consolidated them into three books, and expanded coverage of the content and strategies that will help you to get a higher score on the GMAT. Online bonus materials include 2 exclusive ebooks with harder content, an online study syllabus that tracks your progress, 6 full-length adaptive practice tests, and GMAT Navigator with full Official Guide solutions. All the GMAT comes with access to the Atlas online learning platform. Your Atlas All the GMAT study plan includes: Two exclusive e-books covering harder quant and verbal content, for those aiming for an especially high GMAT score A study syllabus, integrating reading, practice problem, and practice test assignments; we'll tell you what to do and when to do it Six full-length GMAT computer adaptive tests (CATs) Full access to Manhattan Prep's GMAT Navigator, which contains solutions for all problems in the main GMAT Official Guide book (book sold separately) from the makers of the official test Additional practice problems, interactive video lessons, strategies for time management, and more Lessons and practice problems created by expert instructors with 99th-percentile scores on the GMAT The All the GMAT book set includes three volumes: GMAT All the Quant guide GMAT All the Verbal guide GMAT Integrated Reasoning & Essay guide Executive Assessment (EA) test-takers: The IR guide is fully built out for both EA and GMAT test-takers. The All the Quant and All the Verbal guides are also effective for EA studiers; ignore the non-coordinate-plane geometry chapters in the Quant guide and study everything else. Manhattan Prep guides are the top-selling GMAT prep guides worldwide for a reason; we have the most in-depth, comprehensive, and effective materials available for GMAT studies. For an even bigger boost to your studies, check out Manhattan Prep's Self-Study Toolkit, which contains 100% of the study materials and resources that we give to students in our live courses.

Why R the Big Boys Stalking Me? May 02 2020

Good Neighbors Aug 17 2021 The moral principles prescribed for friendship, civil society, and democratic public life apply imperfectly to life around home, where we interact day to day without the formal institutions, rules of conduct, and means of enforcement that guide us in other settings. This work explores how encounters among neighbours create a democracy of everyday life, which has been with us since the beginning of American history and is expressed in settler, immigrant, and suburban narratives and in novels, poetry, and popular culture.

Monthly Catalog of United States Government Publications Jul 24 2019

Integrating Freight Facilities and Operations with Community Goals Feb 08 2021 TRB's National Cooperative Highway Research Program (NCHRP) Synthesis Report 320: Integrating Freight Facilities and Operations with Community Goals identifies practices that have been or are being used by private-sector freight companies and public transportation agencies in citing their facilities, modifying their operations, and managing their community relations. "Good neighbor initiatives" and balancing practices employed by metropolitan planning and economic development organizations, local governments, and others are also recognized. The report covers water, truck, rail, and air freight facilities and operations. Although the report does not include pipelines, several of the issues and practices discussed are relevant to pipeline facilities and operations.

Biotechnology in Healthcare, Volume 1 Mar 24 2022 Biotechnology in Healthcare, Technologies and Innovations, Volume One presents up-to-date knowledge on the emerging field of biotechnology as applied to the healthcare industry. Sections cover 3D printing, tissue engineering, synthetic biology, nano-biotechnology, omics, precision medicine, gene therapy, vaccine development, predictive healthcare, entrepreneurship, financing, business models, product development and marketing in the sector. This is a valuable source for biotechnologists, bioinformaticians, clinicians and members of biomedical and healthcare fields who need to understand more about the promising developments of the emerging field of biotechnology in healthcare. Presents the progress and innovations that biotechnology has accomplished in the field of healthcare Discusses the impact of healthcare biotechnology in global economics and business prospects Explains how biotechnology revolutionizes future healthcare approaches

Structure and Evolution Jan 10 2021 The three volume set provides a systematic overview of theories and technique on social network analysis. Volume 1 of the set mainly focuses on the structure characteristics, the modeling, and the evolution mechanism of social network analysis. Techniques and approaches for virtual community detection are discussed in detail as well. It is an essential reference for scientist and professionals in computer science.

Proceedings of the Twenty-second AAAI Conference on Artificial Intelligence Dec 09 2020

Breaking Cycles of Violence in Israel and Palestine Sep 05 2020 Victimization narratives arise out of the experience of historical and ongoing injury, and often intersect or, in part, constitute identity narratives. Unless transformed through reconciliation, these narratives can be used by political leaders to mobilize and perpetuate violence. Victimization narratives are grounded in lived experiences, whether by contemporary generations or passed on from one generation to another as a historical narrative about the prior experience of victimization. Therefore, cycles of violence cannot be ended sustainably unless those narratives are transformed; and first, narratives of victimization and cycles of violence must be disrupted. This is the work of many peace activists in Israel and Palestine whose relationships are built on empathic engagement. This book reviews theories of empathy across a broad range of scholarly work. It then applies a framework of political psychology to understand the role of empathy in the accounts of peace activists whose identities as victims were transformed by their empathic engagement. It includes a chapter providing historical background, and concludes with a consideration of alternative futures for the Israeli and Palestinian people and communities.

Choosing a Sustainable Future Oct 31 2022 A small city's big vision that can help transform your own community. We all want a sustainable future, but what does it look like, and how do we get there? In Ithaca, NY a new culture is blossoming-one that values cooperation, local production, environmental stewardship, social justice andcreativity. Ithaca is showing the way to meet the challenges of the day with a wide variety of practical, real-world solutions. Filled with inspiring examples, Choosing a Sustainable Future provides readers with a remarkable sense of possibility. Explore Ithaca's: bustling, vibrant farmers markets, overflowing with fresh, local produce award-winning community credit union that triples the savings of low-income people flagship college sustainability programs pioneering alternative transportation programs, such as Ithaca Carshare innovative efforts by coalitions of local business, university, government and activists to create transformation in areas as diverse as green building, city planning, health and wellness, and honoring cultural diversity. Taken together, these examples of citizen engagement are a taste of what life could be like in a sustainable city of the future. In a time of overwhelming economic, social and environmental crises, Choosing aSustainable Future provides a quiet, authoritative voice of hope.

Algorithmic Aspects in Information and Management Aug 05 2020 This volume constitutes the proceedings of the 14th International Conference on Algorithmic Aspects in Information and Management, AAIM 2020, held in Jinhua, China in August 2020. The 39 full papers and 17 short papers presented were carefully reviewed and selected from 76 submissions. The papers deal with emerging important algorithmic problems with a focus on the fundamental background, theoretical technology development, and real-world applications associated with information and management analysis, modeling and data mining. Special considerations are given to algorithmic research that was motivated by real-world applications.

Proceedings of the 21st EANN (Engineering Applications of Neural Networks) 2020 Conference Sep 25 2019 This book gathers the proceedings of the 21st Engineering Applications of Neural Networks Conference, which is supported by the International Neural Networks Society (INNS). Artificial Intelligence (AI) has been following a unique course, characterized by alternating growth spurts and "AI winters." Today, AI is an essential component of the fourth industrial revolution and enjoying its heyday. Further, in specific areas, AI is catching up with or even outperforming human beings. This book offers a comprehensive guide to AI in a variety of areas, concentrating on new or hybrid AI algorithmic approaches with robust applications in diverse sectors. One of the advantages of this book is that it includes robust algorithmic approaches and applications in a broad spectrum of scientific fields, namely the use of convolutional neural networks (CNNs), deep learning and LSTM in robotics/machine vision/engineering/image processing/medical systems/the environment; machine learning and meta learning applied to neurobiological modeling/optimization; state-of-the-art hybrid systems; and the algorithmic foundations of artificial neural networks.

Intelligent Retail Nov 27 2019 This book shows stationary retail a way to reinvent itself after Corona, in order to be able to survive against the strong competition of online retail. The focus is on the central issues that will shape the retail of the future. For example, brick-and-mortar retail in particular must now work with intelligent systems based on data and adopt or even surpass methods that the large online marketplaces have been using successfully for a very long time. In this regard, artificial intelligence also plays a major role in retail. This is not just about automation and robots taking over tasks, but also about instruments and machines being able to learn and draw conclusions themselves in all retail functions. This is becoming increasingly difficult because our shopping and search behavior is constantly changing. Therefore, a customer should receive intelligent recommendations in the store, which are also based on his already known interests and behavior patterns. Gerrit Heinemann shows how intelligent action can save stationary retail in city centers and shopping centers. The content From stationary retail to intelligent retail

Threats to the stationary retail trade Basic requirements and manifestations of intelligent retail Examples of intelligent retail of the future Risks for intelligent retail The author Prof. Dr. Gerrit Heinemann is Professor of Business Administration, Management and Commerce and Head of the eWeb Research Center at Niederrhein University of Applied Sciences. This book is a translation of an original German edition. The translation was done with the help of artificial intelligence (machine translation by the service DeepL.com). A subsequent human revision was done primarily in terms of content, so that the book will read stylistically differently from a conventional translation.

Techno-Sapiens in a Networked Era Sep 17 2021 Techno-Sapiens gathers together leading scholars of technology, theology, and religion in order to explore the ways in which modern technology is neither solely a dehumanizing force in the world nor a mere instrument for evangelizing the world, but rather the very means by which incarnation happens—the media in and through which humans love the (digital) other. The essays explore the question of how technology encourages and/or inhibits the human capacity to love our neighbor through asking the following questions: Who is my (digital) neighbor? How does social media in particular allow us to love our (digital) neighbor? How does one become a (digital) neighbor?

Taking Our Country Back Nov 07 2020 Taking Our Country Back presents the previously untold history of the uptake of new media in Democratic electoral campaigning over the last decade. Drawing on open-ended interviews with more than fifty political staffers, fieldwork during the 2008 primaries and general election, and archival research, Daniel Kreiss shows how a group of young, technically-skilled internet staffers came together on the Howard Dean campaign and created a series of innovations in organization, tools, and practice that have changed the campaign game. After the election, these individuals founded an array of consulting firms and training organizations and staffed prominent Democratic campaigns. In the process, they carried their innovations across Democratic politics and contributed to a number of electoral victories, including Barack Obama's historic bid for the presidency. In revealing this history, the book provides a rich empirical look at the communication tools, practices, and infrastructure that shape contemporary online campaigning. Through a detailed history of new media and political campaigning, Taking Our Country Back contributes to an interdisciplinary body of scholarship from communication, sociology, and political science. The book theorizes processes of innovation in online electoral politics and gives readers a new understanding of how the internet and its use by the Dean campaign have fundamentally changed the field of political campaigning. Kreiss shows how these innovations, exemplified by the Dean and Obama campaigns, were the product of the movement of staffers between industries and within organizational structures. Such movement provided a space for technical development and incentives for experimentation. Taking Our Country Back is a serious and vital analysis, both on-the-ground and theoretical, of how a small group of internet staffers transformed what campaigning means today and how cultural work mobilizes and motivates supporters to participate in collective action.

Journal of the Physical Society of Japan Jul 16 2021

How to Love Your Neighbor Without Being Weird Jul 28 2022 "I want to love my neighbor, but I don't know how." Most of us feel guilty about Christ's command to love our neighbor, but let's be honest--we don't even know most of the people living around us. How can we love people we don't even know? Besides, doesn't it count as "loving our neighbor" when we send money to missionaries and put out yard signs for our church? Are we supposed to just knock on our neighbors' doors and tell them about Jesus? "They'll think I'm weird." How to Love Your Neighbor Without Being Weird helps you overcome fears about getting to know your neighbors and sharing your faith. You'll learn simple, practical ways to get to know your neighbors, using your God-given personality. As you venture out of the comfort of your living room and into the lives of your neighbors, you'll form authentic friendships, create a safer community, and find fulfillment in obeying Christ's #2 command. Loving your neighbor isn't a random command; it's God's perfect plan. "A very timely book for a very isolated culture. Amy Lively offers practical help and guidance in the neglected practice of hospitality."--Dr. Dennis Rainey, president, FamilyLife "This ministry is changing lives. Amy has followed God's leading into an untapped area of people that need Jesus. What a simple idea of reaching out to your neighborhood--the area that God placed you in for His purposes. Amy's ideas and excellent resources have offered a no-excuse zone for this ministry. The Lord said, 'Love me and love your neighbor.' He chose Amy to show us the way. Thank you for this amazing resource!"--Chrissy Dunham, director of women's ministry at Prestonwood Baptist Church, Plano, Texas "Amy knows God has given each of us a corner of the world to share the love of Jesus and the hope found in His Word. Her book equips women, spiritually and practically, to answer this call and open their hearts and homes to friends and neighbors."--Wendy Blight, Proverbs 31 Ministries speaker and author "Amy's brilliant approach to engaging our neighbors is natural, fun, and life-changing! She provides every single thing you will need, including courage. This book and practice is a must for everyone desiring to honor and obey the Lord."--Debbie Stuart, church and leadership development director, Women of Faith " Amy gives us the keys to really connect with those who live around us--not with an agenda, but with a heart toward real relationships. A must-read for anyone who believes that 'Love thy neighbor' really starts at your front door."--Kathi Lipp, coauthor of The Cure for the Perfect Life and author of The Husband Project "With hundreds of friends on social media, why are we so lonely? In her amazing book, Amy Lively identifies the heart-need for deep connection that's not being met through a screen and offers a simple solution: Actually meet the people who live near you. Amy's openness to share her successes and failures at reaching out will inspire you to try it yourself.'"--Glynnis Whitwer, author of Everyday Confetti; executive director of communications, Proverbs 31 Ministries "Amy shows us, step-by-step, how to conquer our fears, connect with our neighbors, and have fun too! Highly recommend!"--Cindy Bultema, speaker, Bible teacher, and author of Red Hot Faith "What does 'love your neighbor as yourself' really mean? In this book, Amy Lively will give you the tips, tools, and techniques you need to love your neighbor in your own unique way."--Jennifer Rothschild, author of Lessons I Learned in the Dark; founder of Fresh Grounded Faith events and womensministry.net

The Key to My Neighbor's House Dec 29 2019 Interviewing war criminals and their victims, Neuffer explains, through the voices of people she follows over the course of a decade, how genocide erodes a nation's social and political environment. Her characters' stories and their competing notions of justice-from searching for the bodies of loved ones, to demanding war crime trials, to seeking bloody revenge-convinces readers that crimes against humanity cannot be resolved by simple talk of forgiveness,or through the more common recourse to forgetfulness.

Diary of a Neighbor May 26 2022 A frustrated college student records her miserable days she spends in apartments with no-so perfect neighbors and a low income. She manages to keep her sanity by working on college studies and reading the bible.

Japanese Journal of Applied Physics Jan 22 2022

Computer-Aided Intelligent Recognition Techniques and Applications Feb 29 2020 Intelligent recognition methods have recently proven to be indispensable in a variety of modern industries, including computer vision, robotics, medical imaging, visualization and the media. Furthermore, they play a critical role in the traditional fields such as character recognition, natural language processing and personal identification. This cutting-edge book draws together the latest findings of industry experts and researchers from around the globe. It is a timely guide for all those require comprehensive, state-of-the-art advice on the present status and future potential of intelligent recognition technology. Computer-Aided Intelligent Recognition Techniques and Applications: Provides the user community with systems and tools for application in a very wide range of areas, including: IT, education, security, banking, police, postal services, manufacturing, mining, medicine, multimedia, entertainment, communications, data visualization, knowledge extraction, pattern classification and virtual reality. Disseminates information in a plethora of disciplines, for example pattern recognition, AI, image processing, computer vision and graphics, neural networks, cryptography, fuzzy logic, databases, evolutionary algorithms, shape and numerical analysis. Illustrates all theory with real-world examples and case studies. This valuable resource is essential reading for computer scientists, engineers, and consultants requiring up-to-date comprehensive guidance on the latest developments in computer-aided intelligent recognition techniques and applications. Its detailed, practical approach will be of interest to senior undergraduate and graduate students as well as researchers and industry experts in the field of intelligent recognition.

Advances in Computers Jan 28 2020 Advances in Computers covers new developments in computer technology. Most chapters present an overview of a current subfield within computer science, with many citations, and often include new developments in the field by the authors of the individual chapters. Topics include hardware, software, theoretical underpinnings of computing, and novel applications of computers. This volume emphasizes software engineering issues in the design of new software systems. The use of the new emerging agile methods is presented as well as timeboxing and model based software engineering (MBASE) as techniques to manage large scale developments. The book series is a valuable addition to university courses that emphasize the topics under discussion in that particular volume as well as belonging on the bookshelf of industrial practitioners who need to implement many of the technologies that are described. In-depth surveys and tutorials on new computer technology Well-known authors and researchers in the field Extensive bibliographies with most chapters Important chapters on new technologies for software development: agile methods, time boxing, MBASE
