Nobility, Faith and Masculinity Mar 30 2020 This is an important study of elite European noblemen who joined the Order of Malta. The Order - functioning in parallel with the convents that absorbed the surplus

daughters of the nobility - provided a highly respectable outlet for sons not earmarked for marriage. The process of becoming a Hospitaller was a semi-structured one, involving clear-cut (if flexible) social and financial requirements on the part of the candidate, and a mixture of formal and informal socialization into the ways of the Order. Once enrolled, a Hospitaller became part of a very hierarchical and ethnically mixed organisation, within which he could seek offices and status. This process was delineated by a complex interaction of internal factors - hierarchy, patriarchy and age - set within external mechanisms such as papal patronage and interference. This book is innovative in its methodology, drawing on a wide range of sources and applying historiographical approaches not previously brought to bear on the Order.

Child Development with PowerWeb Feb 27 2020 John Santrock's Child Development is widely considered the most accurate and up-to-date, topically-organized text in the field. more about:• Cognitive development• Identity formation• Social development• Emotional development• Physiological development• Sexological maturation• Faith formation

New Trends and Applications in Internet of Things (IoT) and Big Data Analytics Dec 07 2020 This book focuses on the use of The Internet of Things (IoT) and big data in business intelligence, data management, Hadoop, machine learning, cloud, smart cities, etc. IoT and big data emerged from the early 2000s data boom, driven forward by many of the early internet and technology companies. The Internet of Things (IoT) is an interconnection of several devices, networks, technologies, and human resources to achieve a common goal. There are a variety of IoT-based applications being used in different sectors and have succeeded in providing huge benefits to the users. The generation of big data by IoT has ruptured the existing data processing capacity of IoT and recommends to adopt the data analytics to strengthen solutions. The success of IoT depends upon the influential association of big data analytics. New technologies like search engines, mobile devices, and industrial machines provided as much data as companies could handle—and the scale continues to grow. In a study conducted by IDC, the market intelligence firm estimated that the global production of data would grow 10x between 2015 and 2020. So, the proposed book covers up all the aspects in the field discuss above.

Self-Help That Works Jan 20 2022 Self-help is big business, but alas, not always a scientific one. Self-help books, websites, and movies abound and are important sources of psychological advice for millions of Americans. But how can you sift through them to find the ones that work? Self-Help That Works is an indispensable guide that enables readers to identify effective self-help materials and distinguish them from those that are potentially misleading or even harmful. Six scientist-practitioners bring careful research, expertise, and a dozen national studies to the task of choosing and recommending self-help resources. Designed for both laypersons and mental-health professionals, this book critically reviews multiple types of self-help resources, from books and autobiographies to films, online programs, support groups, and websites, for 41 different behavioral disorders and life challenges. The revised edition of this award-winning book now features online self-help

resources, expanded content, and new chapters focusing on autism, bullying, chronic pain, GLB issues, happiness, and nonchemical addictions. Each chapter updates the self-help resources launched since the previous edition and expands the material. The final chapters provide key strategies for consumers evaluating self-help as well as for professionals integrating self-help into treatment. All told, this updated edition of Self-Help that Works evaluates more than 2,000 self-help resources and brings together the collective wisdom of nearly 5,000 mental health professionals. Whether seeking self-help for yourself, loved ones, or patients, this is the go-to, research-based guide with the best advice on what works.

Human-Centred Web Adaptation and Personalization Oct 05 2020 This book focuses on the importance of adaptation and personalization in today's society and the upgraded role computational systems and the Internet play in our day-to-day activities. In this era of wireless communication, pervasive computing and the Internet of Things, it is becoming increasingly critical to ensure humans remain central in the developmental process of new technologies to guarantee their continued usefulness and a positive end-user experience. Organized into three clear parts - theory, principles and practice, a holistic approach to designing and developing adaptive interactive systems and services has been adopted. With an emphasis on distinct human factors, both basic and applied research topics are explored, extending from human-centred user models, driven by user's individual differences in cognitive processing and emotions, to the creation of smart interfaces that can handle the ever increasing volume and complexity of information to the benefit of the end-user. Human-Centred Web Adaptation and Personalization – From Theory to Practice is meticulously crafted to serve researchers, practitioners, and students who wish to have an end-to-end understanding of how to convert pure research and scientific results into viable user interfaces, system components and applications. It will serve to bridge the knowledge gap that still remains by suggesting interaction design and implementation guidelines for areas like E-Commerce, E-Learning and Usable Security.
