Fascial Dysfunction Dec 09 2020 Fascial dysfunction is now recognised as one of the main underlying causes of musculoskeletal pain leading to impaired and reduced mobility. These are the symptoms which confront all practitioners of manual therapy in their everyday practice. In this second edition of his very successful book, Leon Chaitow brings together contributions from 20 leading practitioners and researchers from many different fields of manual therapy. Fascial Dysfunction - Manual Therapy Approaches, Second Edition aims to help those practitioners to assess more precisely the dysfunction of their clients and its cause and to increase practitioner awareness of the various techniques which may help them in their attempts to alleviate their clients' problems. New features of the Second edition include: Descriptions of new research evidence and its implications for practice: The dependence of collagen health on a mixture of balanced internal and external tension The importance of adequate hydration The possible role of the telocyte The importance of 'dosage' of therapies in management of fascial dysfunction New chapters on: Gua Sha and cupping Global postural re-education Scar remodelling The book is in two sections. Section I, written by Chaitow with a contribution by Tom Myers, presents a review of the current understanding of the function of fascia in the human body and describes what can go wrong - the causes and effects of fascial dysfunction and disease, and how to assess the problem and remove obstacles to the success of treatment. Section II contains chapters by experts in different types of manual therapy including three by Chaitow. Each practitioner describes their own approach to the problem of assessing and treating fascial dysfunction and explains their specialist therapeutic approach. These approaches include: * Bowen Therapy * Connective Tissue Manipulation and Skin Rolling * Fascia oriented training applications in sports and movement therapy * The Fascial Manipulation® method applied to low back pain * Fascial Unwinding * Balanced Ligamentous Tension Technique * Gua sha (press-stroking) and Ba guan (cupping): traditional East Asian instrument- assisted manual therapies * Muscle Energy Techniques (MET) * Myofascial Induction Therapy (MIT®) * Neuromuscular Technique and associated Soft Tissue Manipulation Modalities * Positional Release Techniques - (including counterstrain) * Global Postural Re-education: Souchard Method * Rolfing® Structural Integration * Management of Scars and Adhesions * Manual Matrix Remodeling in myofascial injuries: scar modeling technique * Massage Therapy and Fascia * Trigger Point release methods including dry needling

Overdiagnosis in Psychiatry Sep 05 2020 "This book, now revised in a section edition, examines the problem of over-diagnosis in psychiatry, focusing on problems with current diagnostic systems. It will show that diagnosis is not always a good guide to treatment selection, and that diagnoses have been expanded in scope to justify currently popular methods of pharmacotherapy or psychotherapy. The most important categories that are over-diagnosed are bipolar disorders, major depression, attention-deficit hyperactivity disorder, and post-traumatic stress disorder. The boundary of pathology and normality remains unclear. This edition will also discuss dimensional systems that are

transdiagnostic, and show how over-diagnosis is linked to the practice of aggressive psychopharmacology"--

Hypnose und Hypnotherapie - Modul 3: Praxis Nov 19 2021 Die Basis für eine hohe Qualität der therapeutischen Praxis bildet die Aus- und Weiterbildung in Hypnose und Hypnotherapie. Dieses dreiteilige Manual führt durch alle Phasen einer solchen Qualifizierung, von den Grundlagen über einzelne Methoden bis zur Praxis in den unterschiedlichsten Anwendungen. Seine Herausgeberin Agnes Kaiser Rekkas gehört zu den erfahrensten Ausbildern der Deutschen Gesellschaft für Hypnose (DGH). Unterstützt wird sie von Kolleginnen und Kollegen, die zu speziellen Themen ihr Wissen und ihre Erfahrung einbringen. Das reichhaltige Praxismodul demonstriert auf fundierte Weise die Anwendung der Hypnose in den verschiedenen psychotherapeutischen und medizinischen Einsatzgebieten - von Allergie bis Zwangsstörung. Nach einer theoretischen Einführung werden jeweils bewährte Hypnosetechniken und -anleitungen exemplarisch dargestellt, immer verbunden mit der Ermunterung zur Gestaltung eigener Texte. Das Kapitel zur Hypnose mit Kindern und Jugendlichen zeichnet ein Bild von der belebenden, fantasievollen, entlastenden und erfolgreichen Arbeit mit jungen Menschen. Der Abschnitt zum Hypnocoaching versammelt klare, zielgerichtete Techniken zur Performance und Leistungssteigerung u. a. bei Prüfungen, künstlerischen Darbietung und im Leistungssport. Der Hypnose in der Zahnmedizin ist ein eigenes Kapitel gewidmet. Mit Beiträgen von: Rainer Arendt • Andrea Beetz • Mechthild Bodmann-Bambach • Karlheinz Brandt • Heidi Caspari-Oberegelsbacher • Tobias Conrad • Peter Dünninger • Hansjörg Ebell • Elisabeth Eißner • Sabine Fruth • Elisabeth Gödde • Gabriele Griebner • Harry Leon Grossmann • Eberhard Hansen • Ernil Hansen • Klaus Hönig • Franz Hötschl • Michael Hübner • Elisabeth Lamm • Renate Lechner • Cordula Leddin • Norbert Loth • Claudia Möhring • Stephan Mulzer • Andreas Neundörfer • Wolfgang Oswald • Ulrike Patalla • Gisela Perren-Klingler • Anke Precht • Maria Rime • Reza Schirmohammadi • Irina Schlicht • Anna Schoch • Irmtraud Teschner • Michael Teut • Michael Wiklund • Martina Wittels • Konstanze Wortmann.
