Impact evaluation of research by the International Food Policy Research Institute on agricultural trade liberalization, developing countries, and WTO's Doha negotiations Dec 27 2019 "This report assesses the impact of IFPRI's work on the agriculture negotiations in the WTO's Doha Round. It is set against the context of IFPRI's mission which emphasizes food security and the interests of poor people in low-income countries and underlines the importance of active engagement in policy communications to link research work to policy action. The report also traces briefly the evolution of IFPRI's work on international agricultural trade more generally, noting its broad disposition to market-oriented policy prescriptions while illuminating the very different impacts of agricultural trade liberalization on individual developing countries through detailed research at the national and household level." -- from Author's Abstract

Essays on Paula Rego: Smile When You Think about Hell Dec 07 2020 In these powerful and stylishly written essays, Maria Manuel Lisboa dissects the work of Paula Rego, the Portuguese-born artist considered one of the greatest artists of modern times. Focusing primarily on Rego's work since the 1980s, Lisboa explores the complex relationships between violence and nurturing, power and impotence, politics and the family that run through Rego's art. Taking a historicist approach to the evolution of the artist's work, Lisboa embeds the works within Rego's personal history as well as Portugal's (and indeed other nations') stories, and reveals the interrelationship between political significance and the raw emotion that lies at the heart of Rego's uncompromising iconographic style. Fundamental to Lisboa's analysis is an understanding that apparent opposites - male and female, sacred and profane, aggression and submissiveness - often co-exist in Rego's work in a way that is both disturbing and destabilising. This collection of essays brings together both unpublished and previously published work to make a significant contribution to scholarship about Paula Rego. It will also be of interest to scholars and students of contemporary painting, Portuguese and British feminist art, and the political and ideological aspects of the visual arts.

External Debt, Savings and Growth in Latin America Apr 30 2020 Edited by Ana María Martirena-Mantel, this volume, published in Spanish and English, contains the papers presented at a seminar sponsored jointly by the IMF and the Instituto Torcuato di Tella of Argentina. The seminar was held in Don Torcuato, near Buenos Aires. The volume consists of six papers, commentaries, and an overview by the editor, who also acted as moderator at the seminar.

The Collected Essays of Josephine J. Turpin Washington Oct 29 2022 Newspaper journalist, teacher, and social reformer, Josephine J. Turpin Washington led a life of intense engagement with the issues facing African American society in the post-Reconstruction era. This volume recovers numerous essays, many of them unavailable to the general public until now, and reveals the major contributions to the emerging black press made by this Virginia-born, Howard University-educated woman who clerked for Frederick Douglass and went on to become a writer with an important and unique voice. Written between 1880 and 1918, the work collected here is significant in the ways it disrupts the nineteenth-century African American literary canon, which has traditionally prioritized slave narratives. It paves the way for the treatment of race and gender in later nineteenth-century African American novels, and engages Biblical scriptures and European and American literatures to support racial uplift ideology. It also articulates shrewdly the aesthetic needs and responsibilities necessary for the black press to establish a reputable literary sphere. Part of a vibrant movement in recent scholarship to reclaim writings of nineteenth-century African American women writers, this expertly edited and annotated collection represents not only a valuable scholarly resource but a powerful example of the determination of a southern black woman to inspire others to improve their own lives and those of all African Americans.

Strategies of Containment Jun 13 2021 When *Strategies of Containment* was first published, the Soviet Union was still a superpower, Ronald Reagan was president of the United States, and the Berlin Wall was still standing. This updated edition of Gaddis' classic carries the history of containment through the end of the Cold War. Beginning with Franklin D. Roosevelt's postwar plans,

Gaddis provides a thorough critical analysis of George F. Kennan's original strategy of containment, NSC-68, The Eisenhower-Dulles "New Look," the Kennedy-Johnson "flexible response" strategy, the Nixon-Kissinger strategy of detente, and now a comprehensive assessment of how Reagan - and Gorbachev - completed the process of containment, thereby bringing the Cold War to an end. He concludes, provocatively, that Reagan more effectively than any other Cold War president drew upon the strengths of both approaches while avoiding their weaknesses. A must-read for anyone interested in Cold War history, grand strategy, and the origins of the post-Cold War world.

Essays in Liberalism Mar 22 2022 This book resulted from the series of lectures delivered at the Liberal Summer School at Oxford in the first ten days of August 1922. Being devoid of any influences of the political representatives of the Liberal Party, these readings were inspired and organized by individuals who concluded that it was desirable to create a platform upon which such discussion could be carried on. Accordingly, the lectures touch upon such important topics as free trade, unemployment, regulation of wages, the balance of power, colonies, land, and agriculture.

Triumvirate Mar 30 2020 From noted historian Bruce Chadwick—acclaimed as "a writer incapable of dull storytelling"—Triumvirate is the dramatic story of the uniting of a nation and the unlikely alliance at the heart of it all. When the smoke cleared from Revolutionary War battlefields, independent-minded Americans turned against each other. Strong individuals with wildly different personalities, Alexander Hamilton, James Madison, and John Jay joined forces to convince wary Americans and thirteen headstrong states to unite as one. Together they wrote the startlingly original Federalist Papers not as an exercise in governmental philosophy, but instead aimed at overcoming the common man's fears. Their relentless efforts laid the groundwork for ratifying the Constitution against rampant opposition. United by an intense love for their emerging nation, Hamilton, Madison, and Jay forged its legacy in pen and ink. "Dr. Chadwick tells an exciting story. His analysis will provoke further debate about this momentous period in American history." Dr. Paul Clemens, the Chairman of the Rutgers University Department of History PRAISE FOR

TRIUMVIRATE "The author effectively details the fierce debates in Massachusetts, Virginia, and New York and the serpentine political machinations that helped bring about the birth of a nation...Not just a history lesson, but an examination of the fundamental ideas that gave birth to the United States." Kirkus Reviews "Chadwick tells an exciting story...His analysis will provoke further debate about this momentous period in American history." Dr. Paul Clemens, Rutgers University "If you think you know how America's founding document came about, think again. In this remarkable new book, Bruce Chadwick reminds us of the three extraordinary men who worked state by state, individual by individual, to ensure passage of the Constitution. It's a fascinating tale, well told." Terry Golway, author of Washington's General and Ronald Reagan's America PRAISE FOR BRUCE CHADWICK "A writer incapable of dull storytelling." Kirkus Reviews "Chadwick vividly brings to life a time of turmoil and hope in a book that should endure as a fine example of historical journalism." Results Not Receipts Jun 20 2019 In the aftermath of the invasion of Afghanistan, the U.S. Agency for International Development supported the Afghan Ministry of Public Health to deliver basic healthcare to 90 percent of the population, at a cost of \$4.50 a head. The program played a vital role in improving the country's health; the number of children dying before the age of five dropped by 100,000 a year. But accounting standards at the Ministry of Public Health concerned the United States Special Investigator General for Afghanistan. There was no evidence of malfeasance, nor argument about the success of the program. For all that the results were fantastic, receipts were not in order. The investigator called for the health program to be suspended because of "financial management deficiencies" at the ministry. This case illustrates a growing problem: an important and justified focus on corruption as a barrier to development has led to policy change in aid agencies that is damaging the potential for aid to deliver results. Donors have treated corruption as an issue they can measure and improve, and from which they can insulate their projects at acceptable costs by controlling processes and monitoring receipts. Results Not Receipts highlights the weak link between donors' preferred measures of corruption and development outcomes related to our limited ability to measure the problem. It discusses the costs of the standard anti-corruption tools of fiduciary controls and centralized delivery, and it suggests a different approach to tackling the problem of corruption in development: focus on outcomes.

African Economies in Transition Feb 21 2022 An authoritative assessment of the reform efforts in African economies during the 1980s and early 1990s, with the focus on economic liberalization in those socialist countries which began from a position of pervasive state intervention. A companion theoretical volume (0-333-66545-7) examines the changing role of the state during the period of transition. This volume examines the important debate on agricultural reforms in the period, and provides in-depth country studies of the transition economies, covering Congo, Madagascar, Tanzania and the impact of war on transition in Angola and Mozambique. These books are the first in an important new series in association with the Centre for the Study of African Economies,

University of Oxford.

The Federal Principle in American Politics, 1790-1833 Mar 10 2021 In the early republic, constitutional debates over federal-state relations were fundamental to party battles and divergent conceptions of republicanism. Then, as now, theories about the sources and nature of federal power informed public debate, policy, and judicial decisions. In examining the conflicts of the revolutionary era, Lenner's work provides a ground-breaking overview of the 'culture of constitutionalism'—the clash of ideas about the nature and structure of Union—that pervaded the early republic.
