Nutritional Assessment of Athletes, Second Edition Dec 21 2021 Nutritional assessment is a key to determining the health and performance efficiency of professional, collegiate, and recreational athletes. Expanded to include new chapters, the second edition of Nutritional Assessment of Athletes examines the dietary, nutritional, and physical needs of athletes and describes critical biochemical and clinical assessment factors. Reflecting growing evidence on the importance of hydration and fluid replacement on physical performance, this edition includes a new chapter on this topic, as well as a new chapter on nutrigenomics and the molecular aspects of physical performance and nutritional assessment. The book gives detailed descriptions of the methods utilized in collecting assessment data and discusses the advantages and limitations of each method. It also summarizes evidence-based practical information relating to nutritional assessment of athletes. This volume is a valuable resource for nutritionists, dietitians, exercise scientists, coaches, trainers, and physicians, as well as athletes who wish to improve their performance.

Care in Mental Health-Substance Use Feb 20 2022 The Mental Health-Substance Use series provides clear guidance for professionals on this complex and increasingly recognised field. It concentrates on the concerns, dilemmas and concepts that impact on the life and well-being of affected individuals and those close to them, as well as the future direction of practice, education, research, services, intervention, and treatment. This volume is primarily about caring for individuals and families who turn to professionals at a time when their lives are unmanageable alone, but is also concerned with the care that these professions extend to their own members. It contends that these issues are closely interrelated, with appropriate communication and support being key to both. Its chapters draw from a variety of theories and treatments to provide practical advice on the challenge of providing appropriate care tailored to a wide scope of individuals and families. The volumes in this series are designed to challenge concepts and stimulate debate, exploring all aspects of the development in treatment, intervention and care response, and the adoption of research-led best practice. They are essential reading for mental health and substance use professionals, students and educators.

Organizational Assessment and Improvement in the Public Sector May 26 2022 Calls for

performance measures and metrics sound good, but public sector organizations often lack the tools required to assess the organization as a whole and create true change. In order to implement an integrated cycle of assessment, planning, and improvement, government agencies at all levels need a usable framework for organizational assessment that speaks to their unique needs. *Organizational Assessment and Improvement in the Public Sector* provides that framework, an understanding of assessment itself, and a methodology for assessment focused on the public sector. The book introduces the concept of organizational assessment, its importance, and its significance in public sector organizations. It addresses the organizational theory that underlies assessment, including change management, organizational and individual learning, and organizational development. Building on this, the author focuses on the processes and demonstrates how the communication that results from an assessment process can create a widely accepted case for change. She presents a model grounded in the Malcolm Baldrige National Quality Program criteria but adapted for the culture of government organizations. She also addresses the criteria that form the basis for assessment and implementation and provides examples and best practices. Facing decreasing budgets and an increasing demand for services, government agencies must increase their capabilities, maximize their available fiscal and human resources, and increase their effectiveness and efficiency. They often operate in an atmosphere that prizes effectiveness but measures it in silos assigned to individual programs and a structure that encourages people to do more with less while systematically discouraging efficiency. Stressing the significant and important differences between a business and a government, this book supplies the knowledge and tools necessary to create a culture of assessment in government organizations at all levels.

Enhancing Effective Instruction and Learning Using Assessment Data May 02 2020 This book introduces theories and practices for using assessment data to enhance learning and instruction. Topics include reshaping the homework review process, iterative learning engineering, learning progressions, learning maps, score report designing, the use of psychosocial data, and the combination of adaptive testing and adaptive learning. In addition, studies proposing new methods and strategies, technical details about the collection and maintenance of process data, and examples illustrating proposed methods and software are included. Chapters 1, 4, 6, 8, and 9 discuss how to make valid interpretations of results and achieve more efficient instructions from various sources of data. Chapters 3 and 7 propose and evaluate new methods to promote students' learning by using evidence-based iterative learning engineering and supporting the teachers' use of assessment data, respectively. Chapter 2 provides technical details on the collection, storage, and security protection of process data. Chapter 5 introduces software for automating some aspects of developmental education and the use of predictive modeling. Chapter 10 describes the barriers to using psychosocial data for formative assessment purposes. Chapter 11 describes a conceptual framework for adaptive learning and testing and gives an example of a functional learning and assessment system. In summary, the book includes comprehensive perspectives of the recent development and challenges of using test data for formative assessment purposes. The chapters provide innovative theoretical frameworks, new perspectives on the use of data with technology, and how to build new methods based on existing theories. This book is a useful resource to researchers who are interested in using data and technology to inform decision making, facilitate instructional utility, and achieve better learning outcomes.

Assessing Medical Technologies Jan 10 2021 New drugs, new devices, improved surgical techniques, and innovative diagnostic procedures and equipment emerge rapidly. But development of these technologies has outpaced evaluation of their safety, efficacy, cost-effectiveness, and ethical and social consequences. This volume, which is "strongly recommended" by The New England Journal of Medicine "to all those interested in the future of the practice of medicine," examines how new discoveries can be translated into better care, and how the current system's inefficiencies prevent effective health care delivery. In addition, the book offers detailed profiles of 20 organizations currently involved in medical technology assessment, and proposes ways to organize U.S. efforts and create a coordinated national system for evaluating new medical treatments and technology.

Clinical Assessment of Child and Adolescent Personality and Behavior Apr 24 2022 Psychologists offer an increasing variety of services to the public. Among these services, psychological assessment of personality and behavior continues to be a central activity. One main reason is that other mental health professionals often do not possess a high level of competence in this area. And when dealing with children and adolescents, psychological assessment seems to take on an even greater role. Therefore, it

follows that comprehensive graduate-level instruction in assessment should be a high priority for educators of psychologists who will work with these youth. This textbook is organized into three sections, consistent with the authors' approach to teaching. Part I provides students with the psychological knowledge base necessary for modern assessment practice, including historical perspectives, measurement science, child psychopathology, ethical, legal, and cultural issues, and the basics of beginning the assessment process. Part II gives students a broad review of the specific assessment methods used by psychologists, accompanied by specific advice regarding the usage and strengths and weaknesses of each method. In Part III, we help students perform some of the most sophisticated of assessment practices: integrating and communicating assessment results and infusing assessment practice with knowledge of child development and psychopathology to assess some of the most common types of behavioral and emotional disorders in youth. A text focusing on assessment practices must be updated every four to six years to keep pace with advances in test development. For example, several of the major tests reviewed in the text, such as the Behavioral Assessment System for Children and the Child Behavior Checklist, have undergone major revisions since the publication of the last edition making the current content outdated. Further, another major test, the Conners' Rating Scales, is undergoing substantial revisions that should be completed before publication of the next edition. Finally, the evidence for the validity of the tests and the recommendations for their appropriate use evolve as research accumulates and requires frequent updating to remain current. For example, there was a special issue of the *Journal of Clinical Child and Adolescent Psychology* published focusing on evidenced-based assessment of the major forms of childhood psychopathology that will need to be integrated into the chapters in Part 3. This latter point reflects an important trend in the field that should influence the marketing of the book. That is, there are several initiatives being started in all of the major areas of applied psychology (e.g., school, clinical, and counseling) to promote evidenced-based assessment practices. These initiatives have all emphasized the need to enhance the training of graduate students in this approach to assessment. This has been the orientation of this textbook from its first edition: that is, *Clinical Assessment of Child and Adolescent Personality and Behavior* has focused on using research to guide all recommendations for practice. The ability of the textbook to meet this training need should be an important focus of marketing the book to training programs across all areas of applied psychology.

Developing Assessment-Capable Visible Learners, Grades K-12 Jun 26 2022 "When students know how to learn, they are able to become their own teachers." —Nancy Frey, Douglas Fisher, and John Hattie Imagine students who describe their learning in these terms: "I know where I'm going, I have the tools I need for the journey, and I monitor my own progress." Now imagine the extraordinary difference this type of ownership makes in their progress over the course of a school year. This illuminating book shows how to make this scenario an everyday reality. With its foundation in principles introduced in the authors' bestselling *Visible Learning for Literacy*, this resource delves more deeply into the critical component of self-assessment, revealing the most effective types of assessment and how each can motivate students to higher levels of achievement.

Planning for Power Advertising Jun 22 2019 This book is a step-by-step guide to producing a sound foundation for advertising: one that will serve as the springboard to inspire powerful creative expression. Rich in cases from the evolving Indian context, Planning for Power Advertising offers an understanding of how strategic advertising is created. It takes the reader through cases and analyses of what worked or did not work in the marketplace. Anand Halve involves the reader throughout in exercises with Action Points at the end of most chapters—an approach that brings alive the concepts within, and helps readers discover the theory in practice. For advertising professionals, this is a manual to create a robust advertising brief. For students of advertising and marketing, Planning for Power Advertising is a simulation exercise from which they will learn how to apply the principles that will help them in their future careers. And for professionals in areas related to advertising—such as media, event management and PR—this book provides an insight into how the strategic underpinning of advertising is built.

Needs Assessment Apr 12 2021 In 1995, Witkin and Altschuld proposed a three phase process model of needs assessment: - Preassessment (learning as much as possible from existing, inexpensive sources) - Assessment (collecting new information about the needs in consideration) - Postassessment (prioritizing needs, understanding their causes, and translating priorities into action plans for organizations). The model has been extensively re-conceptualized and forms the basis for this book. The content includes a user-oriented approach to a comprehensive overview of the three phases and the 14 key steps necessary to implement them. Numerous examples and practical illustrations are given throughout the text as guidance for needs assessors and those who do research on the topic. An extensive glossary of needs-related terms and an outline of a final report are also provided. The book is the first one in the Needs Assessment KIT with connections to the other four.

Stahl's Illustrated Sleep and Wake Disorders Aug 05 2020 Stahl's Illustrated Sleep and Wake Disorders is a concise and highly illustrated guide to the environmental, neurobiological and genetic factors that influence sleep and wakefulness, with evidence-based guidance for the accurate diagnosis and optimal treatment of various sleep/wake disorders. All of the titles in the Stahl's Illustrated series are designed to be fun. Concepts are illustrated by full-color images that will be familiar to all readers of Stahl's Essential Psychopharmacology and The Prescriber's Guide. The visual learner will find that these books make psychopharmacology concepts easy to master, while the non-visual learner will enjoy a shortened text version of complex psychopharmacology concepts. Within each book, each chapter builds on previous chapters, synthesizing information from basic biology and diagnostics to building treatment plans and dealing with complications and comorbidities.

Groundwater Vulnerability and Pollution Risk Assessment Oct 07 2020 This volume offers detailed comparisons and validations of different methods of assessing groundwater vulnerability (DRASTIC, GOD, PI, RTt, AVI, SINTACS, COP). It contains new aspects of vulnerability assessment for the evaluation of coastal aquifer vulnerability and aquifer vulnerability to methane gas leakage from shale gas wells. The book also contains the results of studies on intrinsic and specific vulnerability assessment (migration of antibiotics and nitrate, groundwater surface water interaction), with examples of the different national approaches to groundwater vulnerability mapping in Poland, Ireland, Italy and elsewhere. There are 15 chapters derived from two IAH conferences held in Ustron, Poland in 2015 and 2018. The book is valuable for those interested in groundwater vulnerability, in risk assessment, and in environmental issues. It is aimed at land use planners, water managers, the environmental industry, regional and local environmental protection councils and students studying hydrogeology and environmental sciences.

Trichotillomania Mar 12 2021 Trichotillomania (TTM) is a complex disorder that has long been considered difficult to treat as few effective therapeutic options exist. The empirically-supported treatment approach described in this innovative guide blends traditional behavior therapy elements of habit reversal training and stimulus control techniques with the more contemporary behavioral elements of Acceptance and Commitment Therapy (ACT). With this breakthrough approach, clients learn to be aware of their pulling and warning signals, use self-management strategies for stopping and preventing pulling, stop fighting against their pulling-related urges and thoughts, and work toward increasing their quality of life.

Identification and Treatment of Alcohol Dependency Nov 27 2019 Colin Martin has brought together an excellent set of contributors to produce a truly comprehensive text that will ensure all interested professionals can not only update their knowledge but also better understand each other's roles and how best to help patients and clients through shared working to achieve a common goal of better health. This book is not just for people who see themselves as having a primary role in the field, but also for those – teachers, the police and family members – who live daily with its effects. Professor Dame Betty Kershaw University of Sheffield, UK Alcohol dependency represents an enduring problem for both the individual and wider society. Despite contemporary media coverage on increasingly dangerous levels of drinking in the United Kingdom, the fact remains that excessive alcohol consumption has been a distinguishing feature of Western society for generations. This book is arranged by a number of themed parts, largely representing the key areas in the process of facilitating access to effective clinical management. The book will also be of interest to the wider public who have an interest or concern in relation to alcohol dependency. Contents include: Part 1: Identification Part 2: Medical interventions Part 3: Psychological interventions Part 4: Contemporary issues in the identification and treatment of alcohol dependency Part 5: Clients with complex needs Part 6: Reproductive and developmental concerns

Assessment in Education Jan 22 2022 This book provides key insights into how educational leaders can successfully navigate the turbulence of political debate surrounding leading student assessment and professionalised practice. Given the highly politicised nature of assessment, it addresses leaders and aspiring leaders who are open to being challenged, willing to explore controversy, and capable of engaging in informed critical discourse. The book presents the macro concepts that these audiences must have to guide optimal assessment policy and practice. Collectively, the chapters highlight important assessment purposes and models, including intended and unintended effects of assessment in a globalised context. The book provides opportunities to explore cultural similarities and particularities. It invites readers to challenge taken-for-granted assumptions about ourselves and colleagues in other settings. The chapters highlight the cultural clashes that may occur when cross-cultural borrowing of assessment strategies, policies, and tools takes place. However, authors also encourage sophisticated critical analyses of potential lessons that may be drawn from other contexts and systems. Readers will encounter challenges from authors to deconstruct their assessment values, beliefs, and preconceptions. Indeed, one purpose of the book is to destabilise certainties about assessment that prevail and to embrace the assessment possibilities that can emerge from cognitive dissonance.
