Generation Y in Consumer and Labour Markets Aug 22 2019 Generation Y in Consumer and Labour Markets explores the role of people born in the late 1970s and 1980s as consumers and coworkers in an emerging post-modernist society. Having grown up in a branded society overcrowded with commercial messages and a never-ending supply of choices and opportunities, Generation Y not only influences consumption patterns, they also bring their values to work life, thus changing the attitudes towards the employee-employer relationship and how work is being done. Generation Y particularly see work as a venue of self-realization and the boundaries between work and leisure time are becoming blurred--thus the consumer and labor markets converge in some critical dimensions. This book delves into the substantial research body on characteristics and behaviors of the Generation Y, including their relation to other generations and the role of understanding generations in developing effective and attractive organizations. It further outlines the experiences and best practice for attracting, recruiting, selling to, and communicating with Generation Y, based on the author's experiences from hundreds of organizations where he has been involved as a consultant - offering the reader a better understanding of generations in marketing research, and the impact of generations in employee-employer relations.

Mass Communications Research Resources Jan 19 2022 This reference book is designed as a road map for researchers who need to find specific information about American mass communication as expeditiously as possible. Taking a topical approach, it integrates publications and organizations into subject-focused chapters for easy user reference. The editors define mass communication to include print journalism and electronic media and the processes by which they communicate messages to their audiences. Included are newspaper, magazine, radio, television, cable, and newer electronic media industries. Within that definition, this volume offers an indexed inventory of more than 1,400 resources on most aspects of American mass communication history, technology, economics, content, audience research, policy, and regulation. The material featured represents the carefully considered judgment of three experts -- two of them librarians -- plus four contributors from different industry venues. The primary focus is on the domestic American print and electronic media industries. Although there is no claim to a complete census of all materials on print journalism and electronic media -- what is available is now too vast for any single guide -- the most important and useful items are here. The emphasis is on material published since 1980, though useful older resources are included as well. Each chapter is designed to stand alone, providing the most important and useful resources of a primary nature -- organizations and documents as well as secondary books and reports. In addition, online resources and internet citations are included where possible.

Language, Ideology and Education Apr 10 2021 This book examines the role textbooks play in the teaching of dominant and non-dominant (first and foreign) languages in a range of cultural contexts worldwide. Each chapter addresses important issues related to what constitutes "legitimate knowledge", the politics of learning materials, global cultural awareness, competing ideologies, and the development of multilingual literacies. *Language, Ideology and Education: The Politics of Textbooks in Language Education* comprehensively surveys theoretical perspectives and methodological issues in the critical examination of language textbooks. In particular, it looks at: *The Cultural Politics of Language Textbooks in the Era of Globalization* *The Politics of Instructional Materials for English for Young Learners* *Ideological Tensions and Contradictions in Lower Primary English Teaching Materials in Singapore* *Creating a Multilingual/multicultural Space in Japanese EFL: A Critical Analysis of Discursive Practices within a New Language Education Policy* The book is primarily addressed to those who teach and research in the areas of Foreign Language Education, TESOL, Applied Linguistics, Language Policy, Critical Pedagogy, and Textual Cultures. Although the book is focused on textbook and materials analysis, rather than evaluation, most chapters discuss implications for curriculum design and materials development and therefore will be relevant to scholars working in those fields.

Automation and Robotics in Construction XI Jul 21 2019 Sourced from international experts, this book presents papers dealing with a wide range of soft and hard research issues at various stages of development in the field. Some cover entirely new ground, whilst others reflect progress on the sometimes frustrating path to truly robust technology. Of particular interest are contributions discussing issues of exploitation and commercialisation, the integration of end products within the design and construction processes incorporating information technology (IT) and the impact of the emerging technology on the culture and organisation of the construction industry. A mark of growing maturity is apparent in the coverage of health and safety and related social issues. This is complemented by a clear commitment to the consideration of human factors and the environment. It is hoped that by promoting a wider debate on the matters of future technology and its horizons, on the identification of what industry needs from the research and development community and on building effective partnerships between academia, industry and government, the publication not only addresses the practical commercial obligation to seek robust solutions for today's problems, but will stimulate research for the years to come.

Electrical Safety and the Law Oct 04 2020 *Electrical Safety and the Law* describes the hazards and risks from the use of electricity, explaining with the help of case studies and accident statistics the types of accidents that occur and how they can be prevented by the use of safe installations, equipment and working practices. It describes the British legislation on the safety of electrical systems and electrotechnical machinery control systems, much of which stems from European Directives and which will therefore be affected by the UK's decision to leave the EU (Brexit), and the main standards and guidance that can be used to secure compliance with the law. There are detailed descriptions covering the risks and preventive measures associated with electrical installations, construction sites, work near underground cables and overhead power lines, electrical equipment and installations in explosive atmospheres, electrical testing and electrotechnical control systems. Duty holders' responsibilities for designing, installing, and maintaining safe systems are explained, as well as their responsibilities for employing competent staff. The fifth edition has been substantially updated to take account of considerable changes to the law, standards and guidance; it has been expanded to include: a new chapter on the Corporate Manslaughter and Corporate Homicide Act; a new chapter describing landlords' legal responsibilities for electrical safety in private rented properties and social housing; a new chapter on the Electricity Safety Quality and Continuity Regulations; new information on offences, penalties, sentencing guidelines, and relevant case law; a description of the main requirements of BS 7671:2008 and other principal standards, many of which have been amended in recent years; new cases studies to illustrate the hazards and risks; information on changes to GB's health and safety system.

The Discourse of Public Participation Media Sep 22 2019 *The Discourse of Public Participation Media* takes a fresh look at what 'ordinary' people are doing on air - what they say, and how and where they get to say it. Using techniques of discourse analysis to explore the construction of participant identities in a range of different public participation genres, Joanna Thornborrow argues that the role of the 'ordinary' person in these media environments is frequently anything but. Tracing the development of discourses of public participation media, the book focusses particularly on the 1990s onwards when broadcasting was expanding rapidly: the rise of the TV talk show, increasing formats for public participation in broadcast debate and discussion, and the explosion of reality TV in the first decade of the 21st century. During this period, traditional broadcasting has also had to move with the times and incorporate mobile and web-based communication technologies as new platforms for public access and participation - text and email as well as the telephone - and an audience that moves out of the studio and into the online spaces of chat rooms, comment forums and the 'twitterverse'. This original study examines the shifting discourses of public engagement and participation resulting from these new forms of communication, making it an ideal companion for students of communication, media and cultural studies, media discourse, broadcast talk and social interaction.

Understanding Bacteria Mar 09 2021 The discipline of microbiology that deals with an amazingly diverse group of simple organisms, such as viruses, archaea, bacteria, algae, fungi, and protozoa, is an exciting field of Science. Starting as a purely descriptive field, it has transformed into a truly experimental and interdisciplinary science inspiring a number of investigators to generate th a wealth of information on the entire gamut of microbiology. The later part of 20 century has been a golden era with molecular information coming in to unravel interesting insights ofthe microbial world. Ever since they were brought to light through a pair of ground glasses by the Dutchman, Antony van Leeuwenhoek, in later half of 17th century, they have been studied most extensively throughout the next three centuries, and are still revealing new facets of life and its functions. The interest in them, therefore, continues even in the 21 st century. Though they are simple, they provide a wealth of information on cell biology, physiology, biochemistry, ecology, and genetics and biotechnology. They, thus, constitute a model system to study a whole variety of subjects. All this provided the necessary impetus to write several valuable books on the subject of microbiology. While teaching a course of Microbial Genetics for the last 35 years at Delhi University, we strongly felt the need for authentic compiled data that could give exhaustive background information on each of the member groups that constitute the microbial world.

Credit Rating durch internationale Agenturen Dec 26 2019 An den nationalen und internationalen Geld-, Kredi t- und Kapitalmärkten ist seit einigen Jahren eine Reihe von Ent wicklungstendenzen beobachtbar, die die Funktionsweise die ser Märkte offenbar nachhaltig beeinflussen. Deregulie rungs- und Liberalisierungsmaßnahmen ermöglichen die Eröff nung neuer Märkte, so in der Bundesrepublik Deutschland etwa den Markt für DMark-Commercial-paper. zugleich stellen sich veränderte Anforderungen an die Art und die Institu tionalisierung der Beschaffung, Verarbeitung und Verbre- tung von Informationen auf diesen Märkten. Das im Zuge der Internationalisierung und Globalisierung der Märkte gewach sene

Spektrum der Anlage- und Finanzierungsfazilitäten erweitert die Handlungsmöglichkeiten der Marktteilnehmer, birgt aber zugleich neue Risiken. Die Beurteilung des Bonitätsrisikos wird auf den Wertpapiermärkten in zunehmendem Maße auch spezialisierten Agenturen übertragen, die in der Form eines Rating - meist auf den einzelnen Finanztitel bezogene - Meinungen über die Fähigkeit und rechtliche Bindung von Emittenten abgeben, den zwingend fälligen Zahlungsverpflichtungen vollständig und rechtzeitig nachzukommen. Mit der vorliegenden Arbeit, die von der wirtschafts- und sozialwissenschaftlichen Fakultät der Universität zu Köln als Dissertation angenommen wurde, greift mein früherer Mitarbeiter, Herr Dipl.-Kfm. Dr. Oliver Everling, ein im deutschsprachigen Raum bisher kaum ausreichend bearbeitetes Thema auf, das vor dem Hintergrund der nicht zuletzt von deutschen Initiatoren getragenen Bemühungen um die Einrichtung einer europäischen Ratingagentur besondere Relevanz besitzt.

Credit to the Community: Community Reinvestment and Fair Lending Policy in the United States Oct 24 2019 This book provides the most comprehensive examination of community reinvestment and fair lending problems and policies currently available. It outlines the history of lending discrimination and redlining in U.S. mortgage and small business lending markets, and documents the persistence of such problems today. The author explains the role that government has played in developing banking and credit markets in the United States, from the creation of Alexander Hamilton's First Bank of the United States to the ongoing support government provides through the subsidization of secondary markets and through maintenance of critical regulatory infrastructure. Immergluck takes issue with those calling for deregulation of financial services - especially in the arena of fair lending and consumer protection - and gives new voice to rationales for social contract policies such as the Community Reinvestment Act. He provides new long-term analysis of the failure of federal bank regulators to enforce the CRA, and also shows how increased community activism and media attention have led to sporadic periods of stronger CRA enforcement. Finally, he recommends a number of policy changes that are needed to modernize the nation's fair lending and community reinvestment laws and make them more relevant for the 21st century.
