Science on Form Apr 10 2021 This book is the Proceedings of the First International Symposium for Science on Form. The Symposium was held on November 26 through 30, 1985 at the University of Tsukuba, Japan. It was organized by The Society for Science on Form, Japan, and sponsored by the Foundation for Advancement of International Science (FAIS). The purpose of the Symposium was to discuss interdisciplinary science aspects of form. "Form", to exhibit its tremendous characters, depends on the material and the changes. But, it is the form that appears evident at once and endures. Form is absorbed from every field as media of information. Thirty years and more ago, interdisciplinary problems between earthethics and science were submitted to a symposium on Form in Nature and Art. The relation between form and function had been emphasized philosophically and psychologically. In this quarter century, information theory had exactly decided figures, electronic computer had easily calculated graphics, and laser hologram had completely contained the objective image and reconstructed it.

Science, Form, and the Problem of Induction in British Romanticism Oct 28 2022 Exploring a topic at the intersection of science, philosophy and literature in the late eighteenth century Dahlia Porter traces the history of induction as a writerly practice - as a procedure for manipulating textual evidence by selective quotation - from its roots in Francis Bacon's experimental philosophy to its pervasiveness across Enlightenment moral philosophy, aesthetics, literary criticism, and literature itself. Porter brings this history to bear on an omnipresent feature of Romantic-era literature, its mixtures of verse and prose. Combining analyses of printed books and manuscripts with recent scholarship in the history of science, she elucidates the compositional practices and formal dilemmas of Erasmus Darwin, Robert Southey, Charlotte Smith, Maria Edgeworth, and Samuel Taylor Coleridge. In doing so she re-examines the relationship between Romantic literature and eighteenth-century empiricist science, philosophy, and forms of art and explores how Romantic writers engaged with the ideas of Enlightenment empiricism in their work.

Guess! Mar 21 2022 A hypothesis is an educated guess, and this volume breaks down the necessary steps to forming a good one. Chapters focus on showing kids how to make scientific observations, how to find good sources for research, and tips for staying organized. Students will learn how to test and revise a hypothesis for a science project, and how this part of the process leads to scientific discovery.

International Legal Theory Apr 29 2020 Nicholas Onuf's International Legal Theory: Essays and Engagements 1966-2007 is a collection of the author's articles and book reviews from the period, including some previously unpublished material. The book records the author's efforts to address important problems in international legal theory and to engage other scholars who were also addressing these problems. As well as demonstrating Onuf's own constructivist contribution to the theoretical dimension of international law and international relations, each piece is preceded by a short introduction which highlights the wider themes and developments which have occurred in the field of international law in the last forty years.

*Science-Slam* Apr 22 2022 Der Science-Slam ist eine weitverbreitete Form der populären Wissenschaftskommunikation in Deutschland. Science-Slam-Veranstaltungen erfreuen sich großer Beliebtheit beim Publikum, stehen aber mitunter auch in der Kritik, da die Verbindung von Unterhaltung und Wissenschaftskommunikation als problematisch eingeschätzt wird. Der Band vereint Beiträge, die aus unterschiedlichen disziplinären Perspektiven Science-Slams in den Blick nehmen. Auf diese Weise werden Science-Slams sowohl in ihrer Mikrostruktur analysiert als auch hinsichtlich ihrer Relevanz für die gesellschaftsbezogenen Ziele von Wissenschaftskommunikation beleuchtet.
