The Enemy Combatant Papers Jan 06 2021 The Enemy Combatants Papers presents the five major enemy combatant cases of the post-9/11 era. Presented in narrative form, these original documents tell the story that clarifies the questions at the heart of the American detention of alleged combatants in the war on terror. These documents discuss the right to counsel, the right to a trial, the right for the accused to see the evidence against him, and the intersection between domestic and international law. The book highlights the tension between the needs of national security and the liberties allotted to alleged enemies of the state by highlighting the basic question of what the U.S. Constitution guarantees and to whom. In these documents, the reader can follow the evolving arguments about presidential powers in time of war, habeas corpus, the Geneva Conventions, balance of powers, and matters of detention and prisoner treatment. Complemented with a comprehensive timeline and appendices that include the relevant cases from the Civil War, World War II, and the Korean War and the premises for setting up military commissions and Combatant Status Review Tribunals, this book is meant for those who seek to understand the issues - legal, political, and military - that have dominated the search for balance between justice and security in the war on terror.

Die Turner Tagebücher Apr 09 2021 Dieser Roman der Erwartung beschreibt einen Staatsstreich unter der Führung von Weißen in den Vereinigten Staaten. Die Protagonisten des Buches greifen die Regierung der Vereinigten Staaten an, aber auch Schwarze und Juden, letztere werden als Kontrolle des amerikanischen Staates beschrieben. Die Turner Tagebücher jedoch, welche uns einen Einblick in die Hintergründe der Großen Revolution verschaffen, sind aus zwei Gründen für uns von unschätzbarem Wert: Es handelt sich um ziemlich ins Detail gehende, fortlaufende, tägliche Aufzeichnungen der Ereignisse eines Teils der Kampfjahre kurz vor dem Höhepunkt der Revolution. Deswegen sind sie frei von Verzeichnungen, welche oft bei Rückblicken gemacht werden. Obgleich es auch Tagebücher anderer Teilnehmer in dieser gewaltigen Auseinandersetzung gibt, sind keine der bisher veröffentlichten so genau und vollständig wie die von Turner. Sie sind aus der Sicht eines einfachen Mitgliedes der Organisation geschrieben und obgleich sie infolgedessen manchmal einen engen Blickwinkel haben, stellen sie doch ein gänzlich unbefangenes Dokument dar. Im Gegensatz zu den Aufzeichnungen, welche uns einige Führer der Revolution überliefert haben, war dem Autor nicht daran gelegen, in die Analen der Geschichte einzugehen. Beim Lesen der folgenden Seiten bekommen wir ein besseres Verständnis als aus jeder anderen Quelle, über die wahren Gedanken und Gefühle der Männer und Frauen, deren Kampf und Opfer unsere Rasse im Augenblick der tödlichen Gefahr gerettet und damit die neue Zeit begründet haben.

New Technologies, New Risks? Sep 14 2021 New Technologies, New Risks? Innovation and Countering the Financing of Terrorism is part of the World Bank Working Paper series. These papers are published to communicate the results of the Bank's ongoing research and to stimulate public discussion. New financial and communication technologies offer a great opportunity to improve the lives of people everywhere. For instance, millions of impoverished people now have access to the financial system through stored value cards or mobile phones. However, some are concerned that governments are not always aware of these innovations in their jurisdictions. This has prompted fear that fast-moving terrorist groups could expand funding undetected. The fear has led some countries to take a restrictive stance on the technologies' use, either by outright prohibition or by placing unnecessary limitations that deter market development. Authorities are therefore challenged to tackle the double-sided nature of technological advancement: promoting security and economic growth. This paper explores how money flows via these mediums, risks they pose, and how governments have mitigated the risks. World Bank Working Papers are available individually or on standing order. This World Bank Working Paper series is also available by subscription to the World Bank e-Library (www.worldbank.org/newelibrary). Book jacket.

Radiological and Nuclear Terrorism Dec 05 2020 This book discusses multiple aspects of radiological and nuclear terrorism. Do you know what to do if there is a radiological or nuclear emergency in your city? These accidents are not common, but they have happened – and even though we have not seen an attack using these weapons, governments around the world are making plans for how to prevent them – and for how to respond if necessary. Whether you are an emergency responder, a medical caregiver, a public health official – even a member of the public wanting to know how to keep yourself and your loved ones safe – there is a need to understand how these weapons work, how radiation affects our health, how to stop an attack from taking place, how to respond appropriately in the event of an emergency, and much more. Unfortunately, the knowledge that is needed to accomplish all of this is lacking at all levels of society and government. In this book, Dr. Andrew Karam, an internationally respected expert in radiation safety and multiple aspects of radiological and nuclear emergencies, discusses how these weapons work and what they can do, how they can affect our health, how to keep yourself safe, and how to react appropriately whether you are a police officer investigating a suspect radiological weapon, a firefighter responding to a radiological or nuclear attack, a nurse or

physician caring for potentially contaminated patients, or a governmental official trying to keep the public safe. To do this, he draws upon his extensive experience in the military, the several years he worked directly with emergency responders, his service on a number of advisory committees, and multiple trips overseas in the aftermath of the Fukushima accident and on behalf of the International Atomic Energy Agency, Interpol, and the Health Physics Society. *Public Papers of the Presidents of the United States Sep 02 2020 "Containing the public messages, speeches, and statements of the President", 1956-1992.*

Terrorism: Documents of International and Local Control May 10 2021 Terrorism: Documents of International and Local Control is a hardbound series that provides primary-source documents on the worldwide counter-terrorism effort. Chief among the documents collected are transcripts of Congressional testimony, reports by such federal government bodies as the Congressional Research Service and the Government Accountability Office, and case law covering issues related to terrorism. Most volumes carry a single theme, and inside each volume the documents appear within topic-based categories. The series also includes a subject index and other indices that guide the user through this complex area of the law. Volume 86 constitutes the inaugural edition of the enhanced version of Terrorism: 1st Series. With this new volume, Oxford Law introduces the expert commentary and editing of Professor Douglas C. Lovelace, Director of the Strategic Studies Institute at the Army War College. Professor Lovelace's high-ranking experience in authoring national securities directives makes him the perfect addition to this Terrorism project. Lovelace's expansive background offers readers access to invaluable commentary which has been sensibly organized to aid research. Volume 86 explores the large body of national security and military strategies currently in effect for the U.S. The topical organization of these "National Strategies" and the expert introductions provided for these documents, validates Lovelace's expertise in this area as well as his extensive inside knowledge of U.S. security policy. For readers and researchers in need of a thorough but concise guide to current government plans in the war on terror, Volume 86 will prove indispensable.

Terrorism and Disaster Aug 01 2020 Since 9.11 scholars have been asking new questions about catastrophe and made important and interesting innovations in methods, concepts, and theories regarding disaster and terror. This volume brings together a creative set of papers, most of which are about the 9.11 attacks.

Terror, Violence, and the Impulse to Destroy Dec 25 2019 Papers from the 2002 North American Conference of Jungian Analysts and Candidates. These papers address the process of terror as it confronts us in international situations and in outbreaks of violence in homes and schools. The thirteen contributors, seasoned Jungian analysts and psychotherapists, have often faced the reality of undermining destructiveness in their work with clients. Here they offer their theoretical and therapeutic insights, drawing from their experience of the psyche's healing resources to identify the consciousness we need if we are to survive and reverse the contagion of hostility. This book provides an opportunity to learn what can inform the human spirit to prevail over the forces that threaten its integrity and compassion.

Terrorism, Globalization & Mass Communication Jun 11 2021 Nineteen papers are drawn from the first conference sponsored by the Center for Global Media Studies, held in Spokane, Washington, in July of 2002. Only two of the contributions are directly related to questions of terrorism and the media, with one discussing mass-mediated violence as a form of terrorism and the other exploring the social control role of mass media after September 11th. The others examine such issues as the media companies and policies in Europe and Asia, the globalization of the public relations industry, transnational media management structures, the transformation and structural changes in the advertising industry, and the terminology of media consumed by the democratic globalization movement.

The Dynamic Terrorist Threat Jan 26 2020 As the war on terrorism wages on, our nation's policymakers will continue to face the challenge of assessing threats that various terrorist groups pose to the U.S. homeland and our interests abroad. As part of the RAND Corporation's yearlong "Thinking Strategically About Combating Terrorism" project, the authors of this report develop a way to assess and analyze the danger posed by various terrorist organizations around the world. The very nature of terrorism creates a difficulty in predicting new and emerging threats; however, by establishing these types of parameters, the report creates a fresh foundation of threat analysis on which future counterterrorism strategy may build.

The League of Nations, International Terrorism, and British Foreign Policy, 1934-1938 May 22 2022 This book examines the League of Nations, state-supported terrorism, and British foreign policy after the rise of Hitler in the 1930s. It argues that with strong leadership from Britain and France, the League made it possible for states to preserve the peace of Europe after terrorists aided by Italy and Hungary killed the King of Yugoslavia in 1934. This achievement represents the League at its most effective and demonstrates that the organization could carry out its peacekeeping functions. The League also made it possible to draft two international conventions to suppress and punish acts of terrorism. While both conventions were examples of productive collaboration, in the end, few governments supported the League's anti-terrorism project in itself. Still, for Britain, Geneva served the cause of peace by helping states to settle their differences by mediation and concession while promoting international cooperation, a central conviction of British "appeasement" policy in the 1930s.

The Iraq Papers Jun 30 2020 This work is a comprehensive document collection of America's misadventure in Iraq. The editors have organized the book around the concept of pre-emption, a policy that represented a significant break with past American foreign policy.

*America's Achilles' Heel Jun 18 2019 Nuclear, biological, and chemical (NBC) weapons delivered covertly by terrorists or hostile governments pose a significant and growing threat to the United States and other countries. Although the threat of NBC attack is widely recognized as a central national security issue, most analysts have assumed that the primary danger is military use by states in war, with traditional military means of delivery. The threat of covert attack has been imprudently neglected. Covert attack is hard to deter or prevent, and NBC weapons suitable for covert attack are available to a growing range of states and groups hostile to the United States. At the same time, constraints on their use appear to be eroding. This volume analyzes the nature and limits of the covert NBC threat and proposes a measured set of policy responses, focused on improving intelligence and consequence-management capabilities to reduce U.S. vulnerability. Fear of Terrorism in Western Societies. An Essay Feb 25 2020 Essay from the year 2021 in the subject Sociology - Miscellaneous, grade: 1,0, University of Wrocław, language: English, abstract: This essay deals with a culture of fear in the West, which provides a perfect breeding ground for the fear of terrorism. Terrorism is a global phenomenon and omnipresent in Western societies, such as the European Union or the United States. The goal of terrorism is to produce a climate of fear and to disrupt the social cohesion. Since the attacks on the World Trade Center on 11 September 2001, terrorism has been attracting more and more attention within Western society and their mass media. It gave rise to a universal awareness of vulnerability of the West (Beck, 2009, p. 14). After Islamic terrorist attacks on Germany and France in 2015 (Charlie Hebdo attack, Bataclan attack, Berlin attack), 44% of the people surveyed stated that terrorism was the greatest threat within the European Union, according to Eurobarometer 87 in the following spring (Eurobarometer, 2017). In the United States, the public concern about Islamic terrorism was even higher, half of the US population were worried about themselves or a family member becoming the victim of terrorism after the attacks (OWD, 2019). These surveys illustrate that terrorism is perceived by the Western public as a major threat to social life. In this essay I will argue that we have established a culture of fear in the West, which provides a perfect breeding ground for the fear of terrorism. Terrorism in fact is dangerous, but my point is that the danger is massively exaggerated, and we fear the wrong things. I will deal with the culture of fear and how it influences the perception of risk in terms of terrorism. Furthermore, I argue that media and terror maintain a symbiotic relationship that benefits from each other and this leads to a reinforced distortion of perception in the public. The excessive coverage of terrorism in the mass media is disproportionate to the numbers of death and leads to a staged threat. To put it in the words of Ulrich Beck: "Whether it be the mass media broadcasting the images of bloodstained victims across the world, or American President Bush declaring war on terrorism, or NATO declaring a case of legitimate defence after 9/11: only when such reactions follow the deed does every terrorist's dream of a meteoric rise from obscure petty criminality to the 'number one enemy', the 'global danger' – in short, to 'terrorist world stardom' – become a reality." (Beck, 2009).

TERRORISM: COMMENTARY ON SECURITY DOCUMENTS VOLUME 143 Nov 04 2020 Terrorism: Commentary on Security Documents is a series that provides primary source documents and expert commentary on various topics relating to the worldwide effort to combat terrorism, as well as efforts by the United States and other nations to protect their national security interests. Volume 143, The Evolution of the Islamic State, focuses on the U.S. response to the Islamic State (IS) both in Syria and Iraq from a foreign policy standpoint and a military strategy perspective, as well as considering the impact of the rise of IS on the broader global jihadist movement. Consideration is also given to the importance of information warfare in countering IS's worldwide recruiting efforts via the Internet. This volume also includes documents examining related issues of great importance, including a report considering IS's financing, a report on the legal issues arising in connection with U.S. military action against IS, the role of Shia warlords and militias in Iraq in opposing IS, and the lessons that can be learned from the support provided to IS by European fighters.

Contemporary Terror Apr 21 2022 First published in 1981, this book contains papers on terrorism, presented to the International School on Disarmament and Research on Conflicts (ISODARCO). The subject is a complex one as one man's terrorist is another man's freedom-fighter. No simple solution exist to the threat to domestic and international stability posed by the increased use of violence employed by various politically-motivated groups, challenging the authority of sovereign states. Many of the world's leading authorities on terrorism and sub-state violence are among the contributors here, including J. Bowyer Bell, Jillian Becker, and Alessandro Silj, and participants come from a wide range of countries and professions. This book will be of interest to students of conflict and international relations, as well as policy-makers at many levels, and the general public in many countries. "

Albert Camus the Algerian Sep 21 2019 This original reading of Albert Camus' novels, short stories, and political essays concentrates on Camus' conflicted relationship with his Algerian background and finds important critical insights into issues of justice, the effects of colonial oppression, and the deadly cycle of terrorism and counterterrorism that characterized the Algerian War and continues to surface in the devastation of postcolonial wars today. David Carroll emphasizes the Algerian dimensions of Camus' literary and philosophical texts and highlights his understanding of both the injustice of colonialism and the tragic nature of Algeria's struggle for independence. By refusing to accept that the sacrifice of innocent human lives can ever be justified, even in the pursuit of noble political goals, and by rejecting simple, ideological binaries (West vs. East, Christian vs. Muslim, "us" vs. "them," good vs. evil), Camus' work offers an alternative to the stark choices that characterized his troubled times and continue to define our own.

TERRORISM: COMMENTARY ON SECURITY DOCUMENTS VOLUME 144 May 30 2020 *Terrorism: Commentary on Security Documents* is a series that provides primary source documents and expert commentary on various topics relating to the worldwide effort to combat terrorism, as well as efforts by the United States and other nations to protect their national security interests. Volume 144, *Autonomous and Semiautonomous Weapons Systems*, examines the impact of robots and autonomous and semiautonomous weapons systems on the waging of modern warfare. It considers the likely effects of emerging technological innovations in this area from both a political and strategic standpoint, in addition to considering the implications of such technologies within the context of the law of armed conflict and international humanitarian law. This volume is divided into three sections: (1) U.S. policy and approaches to the use of autonomous and semiautonomous weapons systems; (2) U.S. armed forces use of such weapons systems; and (3) potential terrorist use of such weapons systems. Official policy documents from the DoD and the U.S. Army and Air Force are complemented by reports from the Strategic Studies Institute/Army War College Press and other U.S. military sources.

Anti-Money Laundering and Combating the Financing of Terrorism (AML/CFT) - Review of the Effectiveness of the Program Mar 08 2021 The Fund's Anti-Money Laundering and Combating the Financing of Terrorism (AML/CFT) program has significantly contributed to the international community's response to money laundering and the financing of terrorism. This paper reviews how the Fund's AML/CFT program has evolved during the past five years and discusses how the Fund could move forward in this area. The past five years have witnessed significant changes to the Fund's AML/CFT technical assistance program. It is now being delivered more strategically than in the past and is almost exclusively funded by external resources. Its central pillar is now the AML/CFT Topical Trust Fund.

TERRORISM: Commentary on Security Documents Volume 106 Jul 24 2022 Volume 106 of *Terrorism: Commentary on Security Documents, Terrorist Financing and Money Laundering*, guides readers through the complex legal terrain of terrorist financing and money-laundering. Researchers will benefit from the diversity of this volume's selection: from U.S. agency reports on how to implement the recommendations of the 9/11 Commission to the efforts of the European Parliament in seizing assets to two perspectives on how well Saudi Arabia is combating terrorist financing within its borders: the U.S. perspective and the perspective of Saudi Arabia itself. Equally important for researchers is this volume's extensive treatment of U.N. measures on terrorist financing and money laundering. The volume concludes with the full text of the model rules for regulating terrorism-related financial transactions, as promulgated by a joint body of the U.N. and the International Monetary Fund.

Violence and Terror in the Mass Media Aug 13 2021 Originally a Unesco project, this annotated bibliography results from more than 4,600 requests to media scholars and researchers for research reports, publications, and other information relating to violence and terrorism. Although there is an international cast to the materials, most are from the U.S. Even though violence and terrorism permeate our myths and legends, there is increasing concern with their effect on viewers. This bibliography is particularly timely, with entries through spring 1987. The sections of the work (mass media content, mass media effects, pornography and the media, terrorism and the media) give a better idea of the work's scope than does the title. Choice [T]he annotations are clearly written, succinctly descriptive of the original work's research with test groups, and evaluative of research results. Reference Books Bulletin This bibliography focuses on research and scholarly works relating to violence and terror. Consisting primarily of articles published in scholarly journals and books, this comprehensive work examines major topics such as violence and mass media content, violence and mass media effects, terrorism and the mass media, and pornography. Also included are articles from popular journals, reports published by the United States and other governments, conference papers, and dissertations. Each entry consists of the bibliographic citation and a short abstract; many of the sources include studies from other countries where relevant research has been conducted. The compilers' introduction provides a clear definition of violence and terrorism as they are dealt with in this volume and offers an interesting overview of various aspects of the subject.

High-Impact Terrorism Dec 17 2021 In June 2001 the National Academies and the Russian Academy of Sciences held a bilateral workshop in Moscow on terrorism in a high-technology society and modern methods to prevent and respond to it. The purpose of the workshop was to begin a dialogue on high-impact terrorism that could lead to further U.S.-Russian

collaboration. This volume includes papers presented at the workshop by 31 Russian and American experts on various types of high-impact terrorism, including biological and agricultural terrorism, nuclear and electromagnetic terrorism, explosives, chemical, and technological terrorism, and cyber terrorism. The papers also address legal issues, Russian internal affairs, and the future of international cooperation in this area.

On the Ethics of War and Terrorism Jul 20 2019 Steinhoff deals with topical and urgent questions: When is a war just, and when not?, describing and explaining the basic tenets of just war theory and giving a succinct, precise and highly critical account of the present status of the theory and of the most important and controversial current debates surrounding it.

Nonprofit Organizations and the Combatting of Terrorism Financing Feb 19 2022 *Nonprofit Financing and the Combatting of Terrorism Financing* is part of the World Bank World Bank Working Paper series. These papers are published to communicate the results of the Bank's ongoing research and to stimulate public discussion. One of the ways in which terrorist organizations raise and transfer funds is by using nonprofit organizations (NPOs); however NPOs are also an important way to deal with the conditions conducive to the spread of terrorism. In trying to address one problem---terrorism financing---it is important not to diminish the important work of NPOs. This paper discusses the threat and how to address it without tainting the entire NPO sector and concludes that it is inefficient and counterproductive to devise an entirely new regulatory framework. The ultimate objective is to enhance the transparency of the NPO sector---the people in charge of NPOs, NPO funding sources, and how funds are spent. The NPO sector has a stake in being clean and being regarded as such by others, thus NPOs are indispensable partners in drawing up regulatory policies, including self-regulatory policies. World Bank Working Papers are available individually or on standing order. The World Bank Working Paper series is also available online through the World Bank e-library (www.worldbank.org/eLibrary).

Terrorism, Radicalisation & Countering Violent Extremism Feb 07 2021 This book brings together research that covers perspectives and case studies on terrorism, radicalisation and countering violent extremism (CVE). Written by experts involved in these issues at the grassroots, the book bridges the academic-practitioner gap in the field. The proliferation of academic studies and conferences devoted to these subjects has meant that policymakers and practitioners in the same fields sometimes struggle to digest the sheer volume of academic output. The same critical questions keep coming up, but it is debatable the level to which there have been tangible improvements to our real state of knowledge: knowledge in especially in terms of what "best practices" exist in the field (and what can be translated, versus what approaches remain context and location specific). Written in an accessible manner for the general interested reader, practitioners, and policymakers in the field, this volume comprises edited versions of papers presented at CVE workshops run by the Centre of Excellence for National Security (CENS) at the S.Rajaratnam School of International Studies (RSIS), Nanyang Technological University, Singapore, in 2016 and 2017.
