Eyes Everywhere Aug 05 2020 In many countries camera surveillance has become commonplace, and ordinary citizens and consumers are increasingly aware that they are under surveillance in everyday life. Camera surveillance is typically perceived as the archetype of contemporary surveillance technologies and processes. While there is sometimes fierce debate about their introduction, many others take the cameras for granted or even applaud their deployment. Yet what the presence of surveillance cameras actually achieves is still very much in question. International evidence shows that they have very little effect in deterring crime and in 'making people feel safer', but they do serve to place certain groups under greater official scrutiny and to extend the reach of today's 'surveillance society'. Eyes Everywhere provides the first international perspective on the development of camera surveillance. It scrutinizes the quiet but massive expansion of camera surveillance around the world in recent years, focusing especially on Canada, the UK and the USA but also including less-debated but important contexts such as Brazil, China, Japan, Mexico, South Africa and Turkey. Containing both broad overviews and illuminating case-studies, including cameras in taxi-cabs and at mega-events such as the Olympics, the book offers a valuable oversight on the status of camera surveillance in the second decade of the twenty-first century. The book will be fascinating reading for students and scholars of camera surveillance as well as policy makers and practitioners from the police, chambers of commerce, private security firms and privacy- and data-protection agencies.

Surveillance in the Time of Insecurity Jul 16 2021 Threats of terrorism, natural disaster, identity theft, job loss, illegal immigration, and even biblical apocalypse--all are perils that trigger alarm in people today. Although there may be a factual basis for many of these fears, they do not simply represent objective conditions. Feelings of insecurity are instilled by politicians and the media, and sustained by urban fortification, technological surveillance, and economic vulnerability. Surveillance in the Time of Insecurity fuses advanced theoretical accounts of state power and neoliberalism with original research from the social settings in which insecurity dynamics play out in the new century. Torin Monahan explores the counterterrorism-themed show 24, Rapture fiction, traffic control centers, security conferences, public housing, and gated communities, and examines how each manifests complex relationships of inequality, insecurity, and surveillance. Alleviating insecurity requires that we confront its mythic dimensions, the politics inherent in new configurations of security provision, and the structural obstacles to achieving equality in societies.

This level of engagement is both welcome and timely, particularly in a climate of growing public mistrust of State surveillance activities and business predisposition to monetize information relating to the online activities of users. This volume is informed by the range of discussions currently conducted at scholarly and policy levels.
