[Me, Me, Me](#) Apr 09 2021 Many commentators tell us that, in today's world, everyday life has become selfish and atomised—that individuals live only to consume. But are they wrong? In *Me, Me, Me*, Jon Lawrence re-tells the story of England since the Second World War through the eyes of ordinary people—including his own parents—to argue that, in fact, friendship, family, and place all remain central to our daily lives, and whilst community has changed, it is far from dead. He shows how, in the years after the Second World War, people came increasingly to question custom and tradition as the pressure to conform to societal standards became intolerable. And as soon as they could, millions escaped the closed, face-to-face communities of Victorian Britain, where everyone knew your business. But this was not a rejection of community per se, but an attempt to find another, new way of living which was better suited to the modern world. Community has become personal and voluntary, based on genuine affection rather than proximity or need. We have never been better connected or able to sustain the relationships that matter to us. *Me, Me, Me* makes that case that it's time we valued and nurtured these new groups, rather than lamenting the loss of more 'real' forms of community—it is all too easy to hold on to a nostalgic view of the past.

[Hidden in Plain Sight](#) May 30 2020 Many of us take for granted that what we perceive is a completely accurate representation of the world around us. Yet we have all had the experience of suddenly realizing that the keys or glasses that we had been looking for in vain were right in front of us the whole time. The capacity of our sense organs far exceeds our mental capabilities, and as such, looking at something does not guarantee that we will notice it. Our minds constantly prioritize and organize the information we take in, bringing certain things to the foreground, while letting others - that which we deem irrelevant - recede into the background. What ultimately determines what we perceive, and what we do not? In this fascinating book, noted sociologist Eviatar Zerubavel argues that we perceive things not just as human beings but as social beings. Drawing on fascinating examples from science, the art world, optical illusions, and all walks of life, he shows that what we notice or ignore varies across cultures and throughout history, and illustrates how our environment and our social lives - everything from our lifestyles to our

professions to our nationalities - play a role in determining how we actually use our senses to access the world. A subtle yet powerful examination of one of the central features of our conscious life, this book offers a way to think about all that might otherwise remain hidden in plain sight.

**The Emergence of Video Processing Tools Volumes 1 & 2** Jul 20 2019 The Emergence of Video Processing Tools presents stories of the development of early video tools and systems designed and built by artists and technologists during the late 1960s and 70s. Split over two volumes, the contributors examine the intersection of art and science and look at collaborations among inventors, designers and artists trying to create new tools to capture and manipulate images in revolutionary ways. The contributors include 'video pioneers,' who have been active since the emergence of the aesthetic, and technologists, who continue to design, build and hack media tools. The book also looks at contemporary toolmakers and the relationship between these new tools and the past. Video and media production is a growing area of interest in art and this collection will be an indispensable guide to its origins and its future.

**TV Snapshots** Oct 03 2020 In TV Snapshots, Lynn Spigel explores snapshots of people posing in front of their television sets in the 1950s through the early 1970s. Like today's selfies, TV snapshots were a popular photographic practice through which people visualized their lives in an increasingly mediated culture. Drawing on her collection of over 5,000 TV snapshots, Spigel shows that people did not just watch TV: women used the TV set as a backdrop for fashion and glamour poses; people dressed in drag in front of the screen; and in pinup poses, people even turned the TV setting into a space for erotic display. While the television industry promoted on-screen images of white nuclear families in suburban homes, the snapshots depict a broad range of people across racial, ethnic, and class backgrounds that do not always conform to the reigning middle-class nuclear family ideal. Showing how the television set became a central presence in the home that exceeded its mass entertainment function, Spigel highlights how TV snapshots complicate understandings of the significance of television in everyday life.

*Active Listening 2 Teacher's Manual with Audio CD* Sep 26 2022 Active Listening, Second Edition, is grounded in the theory that learners are more successful listeners when they activate their prior knowledge of a topic. Teacher's Manual 2 contains step-by-step practical teaching notes, optional speaking activities and listening strategies, culture notes, and suggested times for completing lessons. Photocopiable unit quizzes, two complete tests with Audio CD, and complete answer keys are also included.

*Microinteractions* Nov 16 2021 It's the little things that make the difference between a good digital product and a great one. In this insightful book, author Dan Saffer shows you how to design microinteractions: the small details that exist inside and around features. How do you turn on mute? How do you know you have a new email message? How can you change a setting? These moments can change a product from one that's tolerated into one that's treasured. Learn how to create effective and enjoyable microinteractions by using triggers, rules, loops and modes, and feedback.
