[Drone Dogs](#) Dec 16 2021 Autumn, 2017. Chicago's skies are clogged with drones. Drones which deliver tacos, tasers or terror. The Super Cyclops facial-recognition drone, incendiary Vulcan Twister and tiny Mosquito, which can inoculate, inject or irk. Due to the popular Drone-O-LimpX reality show, everyone's droning: TV crews, oppo researchers, drone-peepers, gang-bangers, dronie-snapping tweens. But when a drone graphically kills a beloved giraffe, the public turns against the unrestricted industry. Big Drone battles SAFE ("Skies Are For Everyone"), which would ban armed drones and impose drone taxes. Epic rumbles rage in the Halls of Congress and Skies of Chicago, where a local cop and FBI agent take to the sky to end a gang drone war. Drone Dogs is a parable about technology in the hands of idiots and call for public debate about new technologies.

Building the Steam Navy May 29 2020 By the end of the Napoleonic wars, the Royal Navy's shore-based facilities employed nearly 16,000 people in Great Britain and formed the greatest manufacturing complex in the world. This volume recounts the development of the dockyards and their infrastructure, logistics, and operations as the introduction of new technology forged a revolution in ship design and construction. It spans the construction of the first purpose-built workshops for maintenance and repair in 1830 to the symbolic end of the Victorian era in the Royal Navy with the completion of HMS Dreadnought in 1906. The book includes chapters on Woolwich and the first steam factory; iron construction; the technological edge; Greene, Scamp and the integrated factory; HMS Volcano and the development of mobile logistics; mechanization; building the first iron warships; and coaling the navy. Fully illustrated with plans, drawings, engravings, and maps, this comprehensive history is both an essential reference and fascinating reading.
