Put Baby Back in the Corner. Why neuroscience needs to slow down May 28 2020 Essay from the year 2013 in the subject Psychology - Methods, Jacobs University Bremen gGmbH, language: English, abstract: 1990-2000 was declared by the US Congress to be the 'Decade of the Brain'. With projects like the Human Brain Project and the American answer of the BRAIN Initiative recently in the news for the millions they received in funding, it appears evident that neuroscience has captured public attention. But those working within the field have begun to notice an alarming new trend. Every other day it appears that there is a new flavor of neuroscience. There is Neuroethology, Neurolinguistics, Paleoneurology, Cultural Neuroscience, Neuroeconomics, and the list goes on. Neuroscience is becoming full of these specialized niches of inquiry. The logic behind these specialties is that since everything comes from the brain, everything can be reduced to a neuroscientific argument eventually. In general, too much specification within in science can be bad. Scientists have the tendency to create categories in the world and put certain phenomena into boxes that are realms of study. Thus, there is chemistry, which is distinct from biology, which is distinct from psychology. It is easy to see that in reality there are no clear lines of what makes a problem a chemical, biological or psychological one and that to truly understand a problem it must be viewed from all levels. However, this fact is easily forgotten and scientists often find themselves trapped looking at a problem only through their personal science's paradigm. This categorization can lead to scientists forgetting the context of a problem which can actually influence and determine the nature of an issue all together (Barrett, Mesquita, & Smith, 2010). But this tendency to essentialism is not the main issue why the number of neurosciences should be constrained. It is impossible to say how many are needed exactly, but at present the number is far too high. Neuroscience is a new science that few people truly understand which makes it easy to abuse and it does not have the tools or ability yet to branch out too far beyond the individual brain.

Semiotik / Semiotics. 3. Teilband Mar 18 2022 Die Reihe HANDBÜCHER ZUR SPRACH- UND KOMMUNIKATIONSWISSENSCHAFT erschließt einen Wissensbereich, der sowohl die allgemeine Linguistik und die speziellen, philologisch orientierten Sprachwissenschaften als auch diejenigen Wissenschaftsgebiete umfasst, die sich in den letzten Jahrzehnten aus der immer umfangreicher werdenden Forschung über die vielfältigen Erscheinungen des kommunikativen Handelns entwickelt haben. In der klassischen Disziplin der Sprachwissenschaft erscheint eine Zusammenfassung des Wissensstandes notwendig, um der im Wechsel der Theorien rasch voranschreitenden Forschung eine Bezugsbasis zu geben; in den neuen Wissenschaften können die Handbücher dem Forscher Übersicht geben und Orientierung verschaffen. Um diese Ziele zu erreichen, wird in der Handbuchreihe, was · die Vollständigkeit in der Darstellung, · die Explizitheit in der Begründung, · die Verlässlichkeit in der Dokumentation von Daten und Ergebnissen und · die Aktualität im Methodischen angeht, eine Stufe der Verwirklichung angestrebt, die mit den besten Handbuchkonzeptionen anderer Wissenschaftszweige vergleichbar ist. Alle Herausgeber, die der Reihe und diejenigen der einzelnen Bände, wie auch alle Autoren, die in den Handbüchern ein Thema bearbeiten, tragen dazu bei, dieses Ziel zu verwirklichen. Veröffentlichungssprachen sind Deutsch, Englisch und Französisch. Wenngleich als Hauptzweck der Handbuchreihe die angemessene Darstellung des derzeitigen Wissensstandes in den durch die jeweiligen Handbuchbände abgedeckten Ausschnitten der Sprach- und Kommunikationswissenschaft zu gelten hat, so wird doch bei der Abgrenzung der wissenschaftlichen Bereiche, die jeweils in einem Handbuchband erschlossen werden sollen, keine starre Systematik vorausgesetzt. Die Reihe ist offen; die geschichtliche Entwicklung kann berücksichtigt werden. Diese Konzeption sowie die Notwendigkeit, dass zur gründlichen Vorbereitung jedes Bandes genügend Zeit zur Verfügung steht, führen dazu, dass die ganze Reihe in loser Erscheinungsfolge ihrer Bände vervollständigt werden kann. Jeder Band ist ein in sich abgeschlossenes Werk. Die Reihenfolge der Handbuchbände stellt keine Gewichtung der Bereiche dar, sondern hat sich durch die Art der Organisation ergeben: der Herausgeber der Reihe bemüht sich, eine Kollegin oder einen Kollegen für die Herausgabe eines Handbuchbandes zu gewinnen. Hat diese/r zugesagt, so ist sie/er in der Wahl der Mitherausgeber und bei der Einladung der Autoren vollkommen frei. Die Herausgeber eines Bandes planen einen Band inhaltlich unabhängig und werden dabei lediglich an bestimmte Prinzipien für den Aufbau und die Abfassung gebunden; nur wo es um die Abgrenzung zu anderen Bänden geht, ist der

Reihenherausgeber inhaltlich beteiligt. Dabei wird davon ausgegangen, dass mit dieser Organisationsform der Hauptzweck dieser Handbuchreihe, nämlich die angemessene Darstellung des derzeitigen Problem- und Wissensstandes in den durch die jeweiligen Handbuchbände abgedeckten Teilbereichen, am besten verwirklicht werden kann.

**Semiotics Feb 17 2022** This series of HANDBOOKS OF LINGUISTICS AND COMMUNICATION SCIENCE is designed to illuminate a field which not only includes general linguistics and the study of linguistics as applied to specific languages, but also covers those more recent areas which have developed from the increasing body of research into the manifold forms of communicative action and interaction. For "classic" linguistics there appears to be a need for a review of the state of the art which will provide a reference base for the rapid advances in research undertaken from a variety of theoretical standpoints, while in the more recent branches of communication science the handbooks will give researchers both an overview and orientation. To attain these objectives, the series will aim for a standard comparable to that of the leading handbooks in other disciplines, and to this end will strive for comprehensiveness, theoretical explicitness, reliable documentation of data and findings, and up-to-date methodology. The editors, both of the series and of the individual volumes, and the individual contributors, are committed to this aim. The languages of publication are English, German, and French. The main aim of the series is to provide an appropriate account of the state of the art in the various areas of linguistics and communication science covered by each of the various handbooks; however no inflexible pre-set limits will be imposed on the scope of each volume. The series is open-ended, and can thus take account of further developments in the field. This conception, coupled with the necessity of allowing adequate time for each volume to be prepared with the necessary care, means that there is no set timetable for the publication of the whole series. Each volume will be a self-contained work, complete in itself. The order in which the handbooks are published does not imply any rank ordering, but is determined by the way in which the series is organized; the editor of the whole series enlist a competent editor for each individual volume. Once the principal editor for a volume has been found, he or she then has a completely free hand in the choice of co-editors and contributors. The editors plan each volume independently of the others, being governed only by general formal principles. The series editor only intervenes where questions of delineation between individual volumes are concerned. It is felt that this (*modus operandi*) is best suited to achieving the objectives of the series, namely to give a competent account of the present state of knowledge and of the perception of the problems in the area covered by each volume.

**Facets of Systems Science May 08 2021** This book has a rather strange history. It began in Spring 1989, thirteen years after our Systems Science Department at SUNY -Binghamton was established, when I was asked by a group of students in our doctoral program to have a meeting with them. The spokesman of the group, Cliff Joslyn, opened our meeting by stating its purpose. I can closely paraphrase what he said: "We called this meeting to discuss with you, as Chairman of the Department, a fundamental problem with our systems science curriculum. In general, we consider it a good curriculum: we learn a lot of concepts, principles, and methodological tools, mathematical, computational, heuristic, which are fundamental to understanding and dealing with systems. And, yet, we learn virtually nothing about systems science itself. What is systems science? What are its historical roots? What are its aims? Where does it stand and where is it likely to go? These are pressing questions to us. After all, aren't we supposed to carry the systems science flag after we graduate from this program? We feel that a broad introductory course to systems science is urgently needed in the curriculum. Do you agree with this assessment?" The answer was obvious and, yet, not easy to give: "I agree, of course, but I do not see how the situation could be alleviated in the foreseeable future."

**Thirteenth Year in Zion Jul 22 2022** Growing up in Cortez, Colorado, I was only forty miles from the Utah border. What societal differences those forty miles represent. I was quite oblivious to the history of the settlement and the societies that developed in the two corners of Utah and Colorado until I became a student at Brigham Young University in 1958. With Thirteenth Year in Zion, the LDS confront science, the ideals of America's separation of religion and government, and multicultural America. Chapters begin with a personal memoir from my time in Utah. The memoirs hold the reader's interest. But the book is much more than personal memoirs. I use the stories of my encounters to tie with Mormon behaviors that for nearly two centuries have isolated the Saints from mainstream America

**Digital Media in Teaching and its Added Value Aug 23 2022** This book project was initiated in fall 2013 at the University of Nebraska at Omaha (UNO), Nebraska during a Global Engagement Research and Teaching Workshop between faculty from UNO and the University of Agder (UiA), Norway. The anthology presents articles that center on the application of digital technologies that add value to the teaching and learning process in a globalized context. The unique focus of the book is the intersection between pedagogy and technology, specifically the innovative use of technology to improve higher education teaching and learning. With the increased mobility of faculty and students, more diversity among our students and faculty, increased cross-disciplinary designs, alternative environments enabled by technology, and greater demand from the millennial generation for increased access and flexibility, it is important to share accounts where technology has made a positive impact on the instructional process. Topics that are discussed are local studies with implications for the global environment and the innovative use of technology to improve higher education teaching and learning. The target audiences for the book are researchers, teachers and stakeholders in learning organizations interested in using IT for teaching and learning.
