Music in The Girl's Own Paper: An Annotated Catalogue, 1880-1911 Oct 01 2021 Nineteenth-century British periodicals for girls and women offer a wealth of material to understand how girls and women fit into their social and cultural worlds, of which music making was an important part. The Girl's Own Paper, first published in 1880, stands out because of its rich musical content. Keeping practical usefulness as a research tool and as a guide to further reading in mind, Judith Barger has catalogued musical content found in the weekly and later monthly issues during the magazine's first thirty years, in music scores, instalments of serialized fiction about music-related nonfiction, poetry with a musical title or theme, illustrations depicting music making and replies to musical correspondents. The book's introductory chapter reveals how content in The Girl's Own Paper changed over time to reflect a shift in women's music making from a female accomplishment to an increasingly professional role within the discipline, using 'the piano girl' as a case study. A comparison with musical content found in The Boy's Own Paper over the same time offers additional insight into musical content chosen for the girls' magazine. A user's guide precedes the chronological annotated catalogue; the indexes that follow the magazine's diversity of approach to the subject of music.

Building the Old Time Religion Nov 23 2019 During the Progressive Era, a period of unprecedented ingenuity, women evangelists built the old time religion with brick and mortar, uniforms and automobiles, fresh converts and devoted protégés. Across America, entrepreneurial women founded churches, denominations, religious training schools, rescue homes, rescue missions, and evangelistic organizations. Until now, these intrepid women have gone largely unnoticed, though their collective, unchoreographed decision to build institutions in the service of evangelism marked a seismic shift in American Christianity. In this ground-breaking study, Priscilla Pope-Levison dusts off the unpublished letters, diaries, sermons, and yearbooks of these pioneers to share their personal tribulations and public achievements. The result is staggering. With an uncanny eye for essential details and a knack for historical nuance, Pope-Levison breathes life into not just one or two of these women, but a dozen. The evangelistic empire of Aimee Semple McPherson represents the pinnacle of this shift from itinerancy to institution building. Her name remains legendary because she built her institutions on the foundation of the work of women evangelists who preceded her. Their stories—untold until now—reveal the cunning and strength of the women who forged a path for every generation, including our own, to follow. Priscilla Pope-Levison is Professor of Theology and Assistant Director of Women's Studies at Seattle Pacific University. Her previous books include Sex, Gender, and Christianity; Turn the Pulpit Loose: Two Centuries of American Women Evangelists; Return to Babel: Global Perspectives on the Bible; Jesus in Global Contexts; and Evangelization in a Liberation Perspective.

Privacy and Security in the Digital Age Aug 28 2020 Privacy and data protection are recognized as fundamental human rights. Recent developments, however, indicate that security issues are used to undermine these fundamental rights. As new technologies effectively facilitate collection, storage, processing and combination of data, government agencies take advantage for their own purposes. Increasingly, and for other reasons, the business sector threatens the privacy of citizens as well. Contributions to this book explore the different aspects of the relationship between technology and privacy. The emergence of new technologies threaten increased privacy and/or data protection; however, little is known about the potential of these technologies that call for innovative and prospective analysis, or even new conceptual frameworks. Technology and privacy are two intertwined notions that must be jointly analyzed and faced. Technology is a social practice that embodies the capacity of societies to transform themselves by creating the possibility to generate and manipulate not only physical objects, but also symbols, cultural forms and social relations. In turn, privacy describes a vital and complex aspect of these social relations. Thus technology influences people's understanding of privacy, and people's understanding of privacy is a key factor in defining the direction of technological development. This book was originally published as a special issue of Innovation in the European Journal of Social Science Research.
