First Language Lessons for the Well-Trained Mind Level 4 Sep 27 2022 This simple-to-use scripted guide to grammar and composition makes successful teaching easy for both parents and teachers. It uses the classical techniques of memorization, copywork, dictation, and narration to develop a child's language ability in the first years of study.

Teaching Secondary History May 31 2020 This book provides an introduction to the theory and practice of teaching History to years 7-12 in Australian schools.

Touchstone Level 4 Full Contact May 23 2022 Touchstone, together with Viewpoint, is a six-level English program based on research from the Cambridge English Corpus. Touchstone Second Edition Full Contact with DVD, Level 4 includes four key components of the Touchstone Second Edition series: Student's Book, Level 4; Workbook, Level 4; Level 4 Video Activity Pages; and Video on DVD.

Losing a million minds : confronting the tragedy of Alzheimer's disease and other dementias. Aug 14 2021

Crash Course General Medicine Oct 24 2019 Crash Course – your effective every-day study companion PLUS the perfect antidote for exam stress! Save time and be assured you have the essential information you need in one place to excel on your course and achieve exam success. A winning formula now for over 20 years, each series volume has been fine-tuned and fully updated – with an improved full-colour layout tailored to make your life easier. Especially written by senior students or junior doctors – those who understand what is essential for exam success – with all information thoroughly checked and quality assured by expert Faculty Advisers, the result are books which exactly meet your needs and you know you can trust. Each chapter guides you succinctly through the full range of curriculum topics, integrating clinical considerations with the relevant basic science and avoiding unnecessary or confusing detail. A range of text boxes help you get to the hints, tips and key points you need fast! A fully revised self-assessment section matching the latest exam formats is included to check your understanding and aid exam preparation. The accompanying enhanced, downloadable eBook completes this invaluable learning package. Series volumes have been honed to meet the requirements of today's medical students, although the range of other health students and professionals who need rapid access to the essentials of general medicine will also love the unique approach of Crash Course. Whether you need to get out of a fix or aim for a distinction Crash Course is for you! Provides the exam syllabus in one place - saves valuable revision time Written by senior students and recent graduates - those closest to what is essential for exam success Quality assured by leading Faculty Advisers - ensures complete accuracy of information Features the ever popular 'Hints and Tips' boxes and other useful aide-memoires - distilled wisdom from those in the know Updated self-assessment section matching the latest exam formats – confirm your understanding and improve exam technique fast

Strategic Management Jun 19 2019 A major textbook on strategic management which not only deals fully with the theoretical aspects of corporate planning, but also provides practical guidance on implementation. Now completely revised and updated this book is particularly suitable for the student or manager who needs to relate strategic thinking to current practice. The format has been enlarged and the interior of the book re-designed. The fourth edition treats both analytical and behavioural aspects of planning in depth. Strategic analysis is covered in particular detail, with examples reporting proven - and often original - applications of these theories. Six major case studies have been added to illustrate the application of strategic management theory in practice and a chapter discusses the impact of new approaches to strategy. With comprehensive reference lists, and a guide to research resources, this volume will prove invaluable to researchers and advanced students as well as to the practising manager. A lecturer's resource is available on the BH website which contains a Powerpoint presentation, additional case studies and notes and exercises for seminar use. Details are available by emailing bhmarketing@repp.co.uk 'a highly commendable piece of work, a true compendium for the practitioner and student of planning.' - Journal of Strategic Change (review of the third edition) Now includes international case studies showing strategy in action. Concentrates on developing capability for strategic thinking rather than just providing theory or list of techniques. Practical emphasis to allow readers to sharpen their skills.

Routledge Handbook of Arabic Second Language Acquisition Aug 22 2019 The Routledge Handbook of Arabic Second Language Acquisition introduces major current approaches in Arabic second language acquisition (SLA) research and offers empirical findings on crucial aspects and issues to do with the learning of Arabic as a foreign language and Arabic SLA. It brings together leading academics in the field to synthesize existing research and develops a new framework for analyzing important topics within Arabic SLA. This handbook will be suitable as a reference work for advanced undergraduate and postgraduate students and scholars actively researching in this area and is primarily relevant to sister disciplines within teacher training and Arabic applied linguistics. The themes and findings should, however, also be attractive to other areas of study, including theoretical linguistics, psycholinguistics, cognition, and cognitive psychology.

Thinking Like a Historian Mar 09 2021 Thinking Like a Historian: Rethinking History Instruction by Nikki Mandell and Bobbie Malone is a teaching and learning framework that explains the essential elements of history and provides "how to" examples for building historical literacy in classrooms at all grade levels. With practical examples, engaging and effective lessons, and classroom activities that tie to essential questions, Thinking Like a Historian provides a framework to enhance and improve teaching and learning history. We invite you to use Thinking Like a Historian to bring history into your classroom or to re-energize your teaching of this crucial discipline in new ways. The contributors to Thinking Like a Historian are experienced historians and educators from elementary through university levels. This philosophical and pedagogical guide to history as a discipline uses published standards of the American Historical Association, the Organization of American Historians, the National Council for History Education, the National History Standards and state standards for Wisconsin and California.

Managerial Strategies for Business Sustainability During Turbulent Times Jan 19 2022 As the economy fluctuates, so does the need for resilient business practices. If organizations can remain strong and steady during difficult times, they will be more fruitful during successful periods as well. Managerial Strategies for Business Sustainability During Turbulent Times is a crucial resource that discusses successful methods and techniques for building sturdy company practices. Featuring pertinent topics such as sustainable supply chains, knowledge management, information sharing, and performance evaluations, this is an ideal scholarly reference source for CEOs, managers, business students, and researchers that would like to discover more unique and engaging ways to build a strong business foundation.

Thinking History, 4-14 Aug 26 2022 In this book the author looks at the past, present and the future of history teaching in primary schools in an attempt to provide a practical framework for teachers. Section one reviews relevant literature with an aim to clarify the dilemmas and advance present thinking and practice in history teaching in primary schools. Section two offers case studies, curriculum materials and designs, teaching ideas and methods, teacher-development and curriculum development materials, at the same time as tying it in to the existing knowledge-base. Section three considers the 'perennial dilemmas' for school history in the 21st century, including: how can history survive in an increasingly over-crowded and competitive school curriculum? How can history be harnessed to improvements in literacy and numeracy? What should the primary history curriculum contain? How can IT secure easier access to historical information and evidence?

Activities for a Differentiated Classroom Level 4 Jul 25 2022 Easily implement grade appropriate lessons suitable for Grade 4 classrooms. Based on current research, these easy-to-use lessons are based on a variety of strategies to differentiate your instruction. Activities are included to allow access to all learners. Includes interactive whiteboard-compatible Resource CD with sample projects, templates, and assessment rubrics. 160pp. plus Teacher Resource CD.

Prioritization, Delegation, and Assignment Sep 22 2019 Prioritization, Delegation, and Assignment: Practice Exercises for the NCLEX® Examination is the only review book on the market with a focus on prioritization and management of care-just like the current NCLEX Examination itself! The workbook's unique approach establishes your foundational knowledge and then provides exercises of increasing difficulty to help you build confidence in your prioritization, delegation, and patient assignment skills. It offers unique preparation for the NCLEX Examination and effectively equips you to practice in today's fast-paced healthcare environment. UNIQUE! Emphasis on the NCLEX Management-of-Care Focus: LaCharity is the only workbook available that focuses on the NCLEX Exam's management-of-care focus No other book on the market addresses the heavy management-of-care emphasis - consisting of prioritization, delegation, and patient assignment - of the current NCLEX Examination (17-23% of the 2013 NCLEX-RN Exam). Graduating seniors report that LaCharity has been invaluable in preparing them to pass the NCLEX Exam and enter into practice. UNIQUE! Three-Part Organization: The book consists of three parts, each of which builds on the previous one: . Part 1: Introduction; Part 2: Prioritization, Delegation, and Assignment in Common Health Scenarios; Part 3: Prioritization, Delegation, and Assignment in Complex Health Scenarios. This organization establishes foundational knowledge and then provides exercises of increasing difficulty to help students build confidence in their prioritization, delegation, and patient assignment skills. It also helps students move from passing the NCLEX-RN Exam to "hitting the ground running" as they transition into clinical practice. Part 1: Introduction: Part 1, consisting of a chapter by delegation expert Ruth Hansten, provides guidelines for prioritization, delegation, and patient assignment decisions. The Introduction provides a concise, practical foundation on which Parts 2 and 3 build. Part 2: Prioritization, Delegation, and Assignment in Common Health Scenarios: Organized by body system, the chapters in Part 2 begin to give students practice in applying the principles from Part 1 to relatively straightforward scenarios involving single patients or simple patient assignments. Straightforward NCLEX-style multiple-choice, multiple-select, ordering, and short-answer questions help students develop and build confidence in prioritization, delegation, and patient assignment skills while working within the confines of relatively simple health scenarios. Part 3: Prioritization, Delegation, and Assignment in Complex Health Scenarios: Unfolding cases in Part 3 gradually immerse students in realistically complex clinical situations involving patients with complicated health problems or challenging assignment issues. These unfolding cases build on the skills learned in Part 2 to equip students to make sound decisions in realistic, complex health scenarios involving complicated health problems and/or challenging patient assignment decisions. The "unfolding" nature of each case realistically demonstrates the progression of typical health scenarios and helps students learn to "think like nurses" by developing what Benner (2010) calls "clinical imagination." Answer Key: The in-depth Answer Key at the back of the book provides not only the correct answer but also a detailed rationale and an indication of the focus of the question, whether prioritization, delegation, supervision, or patient assignment. Detailed rationales encourage formative assessment, in which students learn as much from answering incorrectly as they do from answering correctly. Expanded content focus to include psychiatric/mental health, OB/maternity, and pediatrics along with med-surg areas New chapters on infection control and obstetrics

Pictures from the Past (Oxford Read and Imagine Level 4) Oct 28 2022 When Rosie and Ben wanted to understand an old cave painting, Grandpa took them back in time in his amazing van. Soon they were in a cold place with mammoths and wolves – and the van was in a hole. How could they get home? And why was there light in the cave? Read and Imagine provides great stories to read and enjoy, with language support, activities, and projects. Follow Rosie, Ben, and Grandpa on their exciting adventures . . .

Hunger in Groups Nov 05 2020 A test of underfeeding in the Arctic during the summer of 1960 is presented. The experiment used two replicated cycles, each consisting of a five-day control phase followed by two five-day experimental phases during which subjects trekked over the Greenland Icecap man-hauling sleds. Variables included eight sub-groups paired into five-man teams, two feeding conditions, and two work conditions. Reliable confirmation of previous reports was provided for some phenomenological effects: e.g., weakness, sensitivity to minor task increments, and concern about health and hygiene. Alleged sensitivity to cold was unconfirmed, and sexuality appeared to be a concomitant of the general stress situation rather than a specific correlate of hunger. That time passes more slowly for hungry men also was not supported by subjects' reports. Social effects of hunger on groups included reduced talk and humor, and increased complaining about minor strains. Contrast between effects of external demand stress and hunger deprivation stress was notable.

Criminal Justice in Action Jan 07 2021 As you study criminal justice today, it's likely that you do not want to simply learn about the world; you want to change it. Gaines/Miller's CRIMINAL JUSTICE IN ACTION, 11E provides a template for that change. This magazine-style presentation focuses on big questions that you've probably already been asking yourself about police tactics, incarceration policies and other major issues in criminal justice. Captivating content, lifted from the latest headlines, and numerous smaller investigations help you better understand how criminal justice in the U.S. impacts everyone. You learn to think critically, ethically and practically about key criminal justice issues. You also gain skills beneficial for a career in criminal justice or any other field, as you actively explore the counterbalancing interests, concepts and theories that characterize today's criminal justice system. Master the concepts, techniques and soft skills necessary for professional success with this riveting book. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

Na Klar! 1 - Teacher's Book 1 Apr 29 2020 Covers the objectives of the National Framework for Modern Foreign Languages and the latest teaching requirements. Includes all the answers to the Students' Book and Worksheets' activities, the transcript for the listening material, teaching notes and support to implement the National Framework for teaching German.

Diagnosis and Treatment of Senile Dementia Jul 13 2021 Senile dementia is one of the major health problems confronting mankind in this century. To some extent the problem has, of course, always existed. The condition was sufficiently troubling to classical philosophers and jurists to have apparently provoked comments by Solon in approximately 500 B. C. and Plato in the fourth century B. C. (Plutarch 1967 translation; Plato 1921 translation). Medical recognition can be traced at least as far back as the second century A. D. (Adams 1861). However, several factors have converged in this century to extend the absolute dimensions of the problem of senile dementia and to increase societal, medical, and scientific recognition of the magnitude of the condition. Perhaps the most important factor relating to the present importance of senile dementia is demographic. Although the human population has been increasing since the mid-eighteenth century, it has only been since the advent of the twentieth century that a decrease in mortality has been noted for those over the age of 45 (McKeown 1976). Consequently, the absolute number of aged persons and the proportion of increasingly aged persons in the populations of the world's industrial nations have been steadily increasing. For example, in the United States, 4% of the population was over the age of 65 in 1900. In the 1970 census, this proportion had grown to 10%.

Storytelling in Early Childhood Oct 16 2021 Storytelling in Early Childhood is a captivating book which explores the multiple dimensions of storytelling and story acting and shows how they enrich language and literacy learning in the early years. Foregrounding the power of children's own stories in the early and primary years, it provides evidence that storytelling and story acting, a pedagogic approach first developed by Vivian Gussin Paley, affords rich opportunities to foster learning within a play-based and language-rich curriculum. The book explores a number of themes and topics, including: the role of imaginary play and its dynamic relationship to narrative; how socially situated symbolic actions enrich the emotional, cognitive and social development of children; how the interrelated practices of storytelling and dramatisation enhance language and literacy learning, and contribute to an inclusive classroom culture; the challenges practitioners face in aligning their understanding of child literacy and learning with a narrow, mandated curriculum which focuses on measurable outcomes. Driven by an international approach and based on new empirical studies, this volume further advances the field, offering new theoretical and practical analyses of storytelling and story acting from complementary disciplinary perspectives. This book is a potent and engaging read for anyone intrigued by Paley's storytelling and story acting curriculum, as well as those practitioners and students with a vested interest in early years literacy and language learning. With contributions from Vivian Gussin Paley, Patricia 'Patsy' Cooper, Dorothy Faulkner, Natalia Kucirkova, Gillian Dowley McNamee and Ageliki Nicolopoulou.

Diachronic Studies in Romance Linguistics Apr 22 2022

Paying for the Past Feb 08 2021 All modern sentencing systems, in the US and beyond, consider the offender's prior record to be an important determinant of the form and severity of punishment for subsequent offences. Repeat offenders receive harsher punishments than first offenders, and offenders with longer criminal records are punished more severely than those with shorter records. Yet the vast literature on sentencing policy, law, and practice has generally overlooked the issue of prior convictions, even though this is the most important sentencing factor after the seriousness of the crime. In Paying for the Past, Richard S. Frase and Julian V. Roberts provide a critical and systematic examination of current prior record enhancements under sentencing guidelines across the US. Drawing on empirical data and analyses of guidelines from a number of jurisdictions, they illustrate different approaches to prior

record enhancements and the differing outcomes of those approaches. Roberts and Frase demonstrate that most prior record enhancements generate a range of adverse outcomes at sentencing. Further, the pervasive justifications for prior record enhancement, such as the repeat offender's assumed higher risk of reoffending or greater culpability, are uncertain and have rarely been subjected to critical appraisal. The punitive sentencing premiums for repeat offenders prescribed by US guidelines cannot be justified on grounds of prevention or retribution. Shining a light on a neglected but critically important topic, *Paying for the Past* examines the costs of prior record enhancements for repeat offenders and offers model guidelines to help reduce racial disparities and reallocate criminal justice resources for jurisdictions who use sentence enhancements.

Treating Trauma in Dialectical Behavior Therapy Apr 10 2021 Many DBT clients suffer from posttraumatic stress disorder (PTSD), but until now the field has lacked a formal, tested protocol for exactly when and how to treat trauma within DBT. Combining the power of two leading evidence-based therapies--and designed to meet the needs of high-risk, severely impaired clients--this groundbreaking manual integrates DBT with an adapted version of prolonged exposure (PE) therapy for PTSD. Melanie S. Harned shows how to implement the DBT PE protocol with DBT clients who have achieved the safety and stability needed to engage in trauma-focused treatment. In a convenient large-size format, the book includes session-by-session guidelines, rich case examples, clinical tips, and 35 reproducible handouts and forms that can be downloaded and printed for repeated use.

Climate: Present, Past and Future (Routledge Revivals) Dec 06 2020 First published in 1977, the second volume of *Climate: Present, Past and Future* covers parts 3 and 4 of Professor Hubert Lamb's seminal and pioneering study of climatology. Part 3 provides a survey of evidence of types of climates over the last million years, and of methods of dating that evidence. Through the earlier stages of the Earth's development the book traces what is known of the various geographies presented by the drifting continents and indicates what can be learnt about climatic regimes and the causes of climatic change. From the last ice age to the present our knowledge of the succession of climates is summarized, indicating prevailing temperatures, rainfalls, wind and ocean current patterns where possible. Part 4 considers events during the fifteen years prior to the book's initial publication, leading on to the problems of estimating the most probable future course of climatic development, and the influence of Man's activities on climate. Alongside the reissue of volume 1, this Routledge Revival will be essential reading for anyone interested in both the causes and workings of climate and in the history of climatology itself.

A History of South Africa Oct 04 2020 South Africa was born in war, has been cursed by crises and ruptures, and today stands on a precipice once again. This book explores the country's tumultuous journey from the Second Anglo-Boer War to 2021. Drawing on diaries, letters, oral testimony and diplomatic reports, Thula Simpson follows the South African people through the battles, elections, repression, resistance, strikes, insurrections, massacres, crashes and epidemics that have shaped the nation. Tracking South Africa's path from colony to Union and from apartheid to democracy, Simpson documents the influence of key figures including Jan Smuts, Nelson Mandela, Steve Biko, P.W. Botha, Thabo Mbeki and Cyril Ramaphosa. He offers detailed accounts of watershed events like the 1922 Rand Revolt, the Defiance Campaign, Sharpeville, the Soweto uprising and the Marikana massacre. He sheds light on the roles of Gandhi, Churchill, Castro and Thatcher, and explores the impact of the World Wars, the armed struggle and the Border War. Simpson's history charts the post-apartheid transition and the phases of ANC rule, from Rainbow Nation to transformation; state capture to 'New Dawn'. Along the way, it reveals the divisions and solidarities of sport; the nation's economic travails; and painful pandemics, from the Spanish flu to AIDS and Covid-19.

What to Say When You Talk to Your Self Mar 29 2020 "Powerful new techniques to program your potential for success"--Cover.

Terra Immortalis Sep 15 2021 *Terra Immortalis* is a fantasy role-playing game of imagination and adventure. The dead walk the earth, a mad god has doomed the planet, and you are the heroes in the planet's last hours. Are you up to the challenge?

Bilingual Language Acquisition Jul 21 2019 How do children develop bilingual competence? Do bilingual children develop language in the same way as monolinguals? Set in the context of findings on language development, this book examines the acquisition of English and Spanish by two brothers in the first six years of their lives. Based on in-depth and meticulous analyses of naturalistic data, it explores how the systems of both languages affect each other as the children develop, and how different levels of exposure to each language influence the nature of acquisition. The author demonstrates that the children's grammars and lexicons follow a developmental path similar to that of monolinguals, but that cross-linguistic interactions affecting lexical, semantic and discourse-pragmatic aspects arise in Spanish when exposure to it diminishes around the age of four. The first of its kind, this original study is a must-read for students and researchers in bilingualism, child development, language acquisition and language contact.

The Reality of Linguistic Rules Feb 26 2020 This volume presents a selection of the best papers from the 21st Annual University of Wisconsin-Milwaukee Linguistics Symposium. Researchers from linguistics, psychology, computer science, and philosophy, using many different methods and focusing on many different facts of language, addressed the question of the existence of linguistic rules. Are such rules best seen as convenient tools for the description of languages, or are rules actually invoked by individual language users? Perhaps the most serious challenge to date to the linguistic rule is the development of connectionist architecture. Indeed, these systems must be viewed as a serious challenge to the foundations of all of contemporary linguistics. Four broad themes emerged from the Milwaukee conference, corresponding to the four parts of the volume. Part I centers on arguments for the existence of symbolic rules in linguistic competence and performance. Part II contains arguments against symbolic rules, presenting connectionist models and other alternatives to the symbolic paradigm. Parts III and IV take up two issues that are central to a number of language researchers: Language acquisition and learnability, and modularity. These issues are addressed from within both rule-based and non-rule-based perspectives. Contributors: Farrell Ackerman, Michael Barlow, Catherine Best, David Corina, Roberta Corrigan, Kim Daugherty, Bruce Derwing, Jeff Elman, Alice Faber, John Goldsmith, Helen Goodluck, Neil Jacobs, Richard Janda, Brian Joseph, Michael Kac, Alan Kawamoto, Suzanne Kemmer, Susan Lima, Brian MacWhinney, Steven Pinker, Alan Prince, Gerald Sanders, Hinrich Schutze, Mark Seidenberg, Royal Skousen, Nicholas Sobin, Joseph Stemberger, Gregory Stone, Ann Thyme, Robert Van Valin.

Practicum and Internship Aug 02 2020 Completely revised and updated, the fourth edition of *Practicum and Internship* carries on the tradition of the previous editions as a popular and highly useful textbook and resource guide. It continues to be a comprehensive resource for students and their supervisors throughout the counseling and psychotherapy process, providing thorough coverage of both the theoretical and practical aspects of the practicum and internship process. This text guides students through the important pre-professional training experiences, from the selection of an appropriate practicum site to the final evaluation of the internship. Organizing the content into four sections for clarity and ease of use, the authors discuss all the relevant information regarding the practicum experience, preparation for the internship, the internship experience and evaluation, and important ethical and legal considerations. New in this edition are a listing and description of the various counseling theories and techniques; a section on crisis intervention and response; detailed guidelines for school mental health consultation; and forms for evaluating performance, cognitive, and consulting skills. Forms are provided at the end of the book for the student's use in site selection, assessment, client treatment, and performance feedback and evaluation. These forms are also included in electronic format on an accompanying CD to allow students to modify and reuse them.

Form-Meaning Connections in Second Language Acquisition May 11 2021 Interdisciplinary essays and empirical studies, mostly based on the papers presented at the Form and Meaning Conference held in Chicago in 2002. It presents linguistic and cognitive approaches to second language acquisition, attempting to integrate external and internal issues in interlanguage development, while outlining directions for research.

Aging in the Past Dec 18 2021 Thanks to improved food, medicine, and living conditions, the average age of the population is increasing throughout the modern industrialized world. Yet, despite the recent upsurge of scholarly interest in the lives of older people and the blossoming of historical demography, little historical demographic attention has been paid to the lives of the elderly. A landmark volume, *Aging in the Past* marks the emergence of the historical demographic study of aging. Following a masterly explication of the new field by Peter Laslett, leading scholars in family history and historical demography offer new research results and fresh analyses that greatly increase our understanding of aging, historically and across cultures. Focusing primarily on post-Industrial Europe and the United States, they explore a range of issues under the broad topics of living arrangements, widowhood, and retirement and mortality. This important work provides a much-needed historical perspective on and suggests possible alternative solutions to the problems of the aged. Contributors: George Alter, Rudolf Andorka, Allen C. Goodman, Myron P. Gutmann, Michael R. Haines, E. A. Hammel, Tamara K. Hareven, Nancy Karweit, David I. Kertzer, Peter Laslett, Andrejs Plakans, Roger L. Ransom, Daniel Scott Smith, Richard Sutch, Peter Uhlenberg, Richard Wall, Charles Wetherell. This title is part of UC Press's Voices Revived program, which commemorates University of California Press's mission to seek out and cultivate the brightest minds and give them voice, reach, and impact. Drawing on a backlist dating to 1893, *Voices Revived* makes high-quality, peer-reviewed scholarship accessible once again using print-on-demand technology. This title was originally published in 1995.

Teaching History Sep 03 2020 Against a background of controversy surrounding the teaching of history, this reader gathers the current thoughts of the leading practitioners. The development of school history up to the national curriculum and beyond is traced, and the main issues concerning history teachers today are examined. These issues include access to history, the definition of 'British' history in a multicultural society, gender and the place of history with the humanities. Progression and attainment are discussed as is the development of pupil's historical understanding, and practical approaches to teaching history to 11-18 level pupils are explored.

Voila! 1 Teacher's Book Nov 24 2019 Covers the objectives of the National Framework for Modern Foreign Languages and the latest teaching requirements. Includes all the answers to the Students' Book and Worksheets' activities, the transcript for the listening material, teaching notes and support to implement the National Framework for teaching French.

Telicity in the Second Language Nov 17 2021 Annotation Slabakova (U. of Iowa) examines the second language acquisition of English telicity marking by native speakers of Bulgarian. Particular attention is paid to subtle differences between English and Slavic telic and atelic sentences. Slabakova contends that Vendler's lexical classes of verbs can be represented in four phrase structure templates, where lexical properties of the verb and of the object compositionally determine telicity. The text is a revised version of the author's Ph.D. thesis (1997, McGill U.) Annotation c. Book News, Inc., Portland, OR (booknews.com).

Oxford Read and Discover: Level 4: Wonders of the Past Activity Book Jun 12 2021 Additional reading, writing, and grammar practice for each chapter of the reader Consolidation activities A book review Answers to the activities can be found on the teacher's website

The Skills Training Manual for Radically Open Dialectical Behavior Therapy Jul 01 2020 Radically open dialectical behavior therapy (RO DBT) is a groundbreaking, transdiagnostic treatment model for clients with difficult-to-treat overcontrol (OC) disorders, such as anorexia nervosa, chronic depression, and obsessive-compulsive disorder (OCD). Written by the founder of RO DBT, Thomas Lynch, this is the first and only session-by-session training manual to help you implement this evidence-based therapy in your practice. As a clinician, you're familiar with dialectical behavioral therapy (DBT) and its success in treating clients with emotion dysregulation disorders. But what about clients with overcontrol disorders? OC has been linked to social isolation, aloof and distant relationships, cognitive rigidity, risk aversion, a strong need for structure, inhibited emotional expression, and hyper-perfectionism. And yet—perhaps due to the high value our society places on the capacity to delay gratification and inhibit public displays of destructive emotions and impulses—problems linked with OC have received little attention or been misunderstood. Indeed, people with OC are often considered highly successful by others, even as they suffer silently and alone. RO DBT is based on the premise that psychological well-being involves the confluence of three factors: receptivity, flexibility, and social-connectedness. RO DBT addresses each of these important factors, and is the first treatment in the world to prioritize social-signaling as the primary mechanism of change based on a transdiagnostic, neuroregulatory model linking the communicative function of human emotions to the establishment of social connectedness and well-being. As such, RO DBT is an invaluable resource for treating an array of disorders that center around overcontrol and a lack of social connectedness—such as anorexia nervosa, chronic depression, postpartum depression, treatment-resistant anxiety disorders, autism spectrum disorders, as well as personality disorders such as avoidant, dependent, obsessive-compulsive, and paranoid personality disorder. In this training manual, you'll find an outline of RO DBT, including history, research, and how it differs from traditional DBT. You'll also find a session-by-session RO DBT outpatient treatment protocol, with sections that outline the weekly, one-hour individual therapy sessions and weekly two-and-a-half hour skills training classes that occur over a period of approximately thirty weeks. This includes instructor guidelines and user-friendly worksheets. The feasibility, acceptability, and efficacy of RO DBT is evidence-based and informed by over twenty years of translational treatment development research. This important manual—along with its companion book, *Radically Open Dialectical Behavior Therapy* (available separately), distills the essential components of RO DBT into a workable program you can start using right away to improve treatment outcomes for clients suffering with OC.

Losing a Million Minds Feb 20 2022 Prepared at the request of several committees of Congress, this report discusses the medical, social, political, and financial aspects of dementia in the elderly and assesses the impact of these diseases on the Nation. The U.S. Office of Technology Assessment published this first government report on Alzheimer's disease in 1987.

Sleisenger and Fordtran's Gastrointestinal and Liver Disease Review and Assessment E-Book Dec 26 2019 Fully updated to include recent advances in the field, *Sleisenger and Fordtran's Gastrointestinal and Liver Disease Review and Assessment*, 11th Edition, prepares you for certification and recertification exams using an effective question-and-answer format that follows the ABIM blueprint. Every question reflects current standards of practice and simulates what you're likely to see on the exam. Use this review tool as a stand-alone resource, or combine it with the *Sleisenger and Fordtran's Gastrointestinal and Liver Disease* text for further information and study. Contains more than 1,000 board-style (vignette) questions that mimic the ABIM blueprint for the gastroenterology boards, including detailed rationales for each question. Questions are designed to test your medical knowledge, clinical reasoning, interpretation, and problem solving skills. Includes updated coverage of hepatitis B and C, Barrett's esophagus, colorectal cancer, and enteric microbiota and probiotics. Provides visual support with full-color images throughout, as well as helpful videos online. Features access to an online test component that offers both untimed study mode and timed assessment mode, with detailed answers for a complete interactive experience.

Transitions through the Labor Market Jun 24 2022 This volume contains seven original and innovative articles which analyze labor market transitions, how individuals progress from school to work, choose a particular occupation, move up the job ladder, and finally withdraw from the workforce to retirement. Investigations are done by race and gender; and social implications are examined.

Progression in Learning Jan 27 2020 Presents findings from part of the major British research program *Innovation and Change in Education: The Quality of Teaching and Learning* relating to the appropriate order of introducing activities in pre-school literacy and numeracy, science and mathematics, and the nature of history. Inspired by the new National Curriculum, which makes assumptions about how learning takes place in various subjects that are based on limited or non-existent research. Of interest to education researchers, curriculum developers, and teachers. No index. Annotation copyright by Book News, Inc., Portland, OR

Gender, Nature, and Nurture Mar 21 2022 Written by one of the foremost authorities in the field, this engaging text presents the latest scientific findings on gender differences, similarities, and variations--in sexuality, cognitive abilities, occupational preferences, personality, and social behaviors, such as aggression. The impact of nature and nurture on gender is examined from the perspectives of genetics, molecular biology, evolutionary theory, neuroanatomy, anthropology, sociology, and psychology. The result is a balanced, fair-minded synthesis of diverse points of view. Dr. Lippa's text sympathetically summarizes each side of the nature-nurture debate, and in a witty imagined conversation between a personified "nature" and "nurture," he identifies weaknesses in the arguments offered by both sides. His kaleidoscopic review defines gender, summarizes research on gender differences, examines the nature of masculinity and femininity, describes theories of gender, and presents a "cascade model," which argues that nature and nurture constitute the inseparable threads that weave together to form the complex tapestry known as gender. *Gender, Nature, and Nurture* applies the nature-nurture debate to such topical public policy questions as: *Should girls and boys be reared alike? *Should schools treat girls and boys alike, and is same-sex education beneficial or harmful to children? *Should mothers be granted custody of young children more often than fathers? *Is sexual violence a uniquely male problem that stems, in part, from biological roots? *Should corporations treat male and female employees differently? *Why is there a "gender gap" in political attitudes, and how can society encourage greater gender equity in leadership positions? *Should women and men serve equally in the military? This lively "primer" of gender research is an ideal book for courses on gender studies, the psychology of women or of men, and gender roles. Its wealth of up-to-date scientific information stimulates the professional reader; its accessible style captivates the student reader; and its forthright examination of the relation between scientific debate and public policy fascinates the general reader.
