**Green Ash, Red Maple, Black Gum** Aug 14 2021 Michael Waters writes vivid, sensual poems that fuse our longings in this world with the human urge to glimpse whatever lies beyond. Waters' muse is Walt Whitman and, like much of Whitman's work, his poems challenge us to abide one another and embrace humanity's imperfections. Viewing curiosities in a medical museum, Waters asks: "How then can I forget/ these jars stuffed with the invisible/ masses who touch us in our dreams, who steep/ our yearnings in their milky waters?" These generous poems, crafted syllable by syllable, speak to love and loss, our foibles and shortcomings, and the possibility of aesthetic and spiritual transcendence.

**The Green and the Black** Feb 20 2022 Gary Sernovitz leads a double life. A typical New York liberal, he is also an oilman - a fact his left-leaning friends let slide until the word "fracking" entered popular parlance. "How can you frack?" they suddenly demanded, aghast. But for Sernovitz, the real question is, "What happens if we don't?" Fracking has become a four-letter word to environmentalists. But most people don't know what it means. In his fast-paced, funny, and lively book, Sernovitz explains the reality of fracking: what it is, how it can be made safer, and how the oil business works. He also tells the bigger story. Fracking was just one part of a shale revolution that shocked our assumptions about fueling America's future. The revolution has transformed the world with consequences for the oil industry, investors, environmentalists, political leaders, and anyone who lives in areas shaped by the shales, uses fossil fuels, or cares about the climate - in short, everyone. Thanks to American engineers' oilfield innovations, the United States is leading the world in reducing carbon emissions, has sparked a potential manufacturing renaissance, and may soon eliminate its dependence on foreign energy. Once again the largest oil and gas producer in the world, America has altered its balance of power with Russia and the Middle East. Yet the shale revolution has also caused local disruptions and pollution. It has prolonged the world's use of fossil fuels. Is there any way to reconcile the costs with the benefits of fracking? To do so, we must start by understanding fracking and the shale revolution in their totality. The Green and the Black bridges the gap in America's energy education. With an insider's

firsthand knowledge and unprecedented clarity, Sernovitz introduces readers to the shales - a history-upturning "Internet of oil" - tells the stories of the shale revolution's essential characters, and addresses all the central controversies. To capture the economic, political, and environmental prizes, we need to adopt a balanced, informed perspective. We need to take the green with the black. Where we go from there is up to us.

*Red Black and Green* Jul 25 2022 From the first slaves who rose up against their master in the early period of American history to the prominent modern figures such as Malcolm X, Elijah Muhammed, Eldridge Cleaver, Red, Black, and Green traces the origins, the struggles and the accomplishments of black nationalism. Its broad discussion of the ideology of black nationalism and of the conditions that gave rise to this ideology provides the foundation for a thorough account of the black nationalist movement in the peak years of its momentum, roughly the decade 1963 to 1973. The author deals both with specific milestones, such as Marcus Garvey's Universal Negro Improvement Association in the early twentieth century, and with the far-reaching implications of the movement for the black community and for the United States as a whole. He looks at the many facets of black nationalism - revolutionary nationalism, cultural nationalism, religious nationalism, and educational nationalism - analyses the relationship between this movement and liberation movements in general.

*Black Gods, Green Islands* Apr 22 2022 This is a collection of folk tales from the exotic island of Trinidad, woven out of the vivid legends that live in the minds of the island's handsome inhabitants. Witchcraft and curses that spell death hang in the air, with happiness always just a step away from disaster. The distinctions between man, nature, and the animal world blur and recede when a hunter shakes off the evil of the city and glides lithely into the forest, when a boa constrictor comes to the aid of a young married couple, or when a servant girl hears the beckoning call of the sea god. There is about these tales a dream quality—of women in white lace dresses, men in bright shirts and pantaloons, their sudden joys, and their no less sudden griefs. Moving in a rhythm of their own, streaked by the wild logic of pagan lore, these stories of a place in the Caribbean where fact and fancy entwine are enchanting. In an article in *Esquire Magazine* entitled "The Renaissance Man/1957" Helen Lawrenson wrote of Geoffrey Holder: Every once in a while there comes along a man so multi-talented in the arts that no one specific field can satisfy his creative energy... Newest and most promising of this type of exuberant virtuoso is an extraordinary young man named Geoffrey Holder, who...since he came to this country from his native Trinidad, has achieved recognition as a painter, actor, creative dancer, singer, choreographer, composer, librettist, costume designer, scenic designer, writer and photographer. Michael Myerberg, the theatrical entrepreneur...calls him "the greatest talent that; has appeared in recent years, with a fantastic intelligence...one of the truly great ones!" Assisted by Tom Harshman, a well-traveled freelance writer, Mr. Holder claims a permanent place in the world of writing with **BLACK GODS, GREEN ISLANDS**.

*Black and Green* Jun 24 2022 'An excellent book.' Irish Voice (New York) Ties between political activists in Black America and Ireland span several centuries, from the days of the slave trade to the close links between Frederick Douglass and Daniel O'Connell, and between Marcus Garvey and Eamon de Valera. This timely book traces those historic links and examines how the struggle for black civil rights in America in the 1960s helped shape the campaign against discrimination in Northern Ireland. The author includes interviews with key figures such as Angela Davis, Bernadette McAliskey and Eamonn McCann.

*Black and Green* Mar 21 2022 In *Black and Green*, Kiran Asher provides a powerful framework for reconceptualizing the relationship between neoliberal development and social movements. Moving beyond the notion that development is a hegemonic, homogenizing force that victimizes local communities, Asher argues that development processes and social movements shape each other in uneven and paradoxical ways. She bases her argument on ethnographic analysis of the black social movements that emerged from and interacted with political and economic changes in Colombia's Pacific lowlands, or Chocó region, in the 1990s. The Pacific region had yet to be overrun by drug traffickers, guerrillas, and paramilitary forces in the early 1990s. It was better known as the largest area of black culture in the country (90 percent of the region's population is Afro-Colombian) and as a supplier of natural resources, including timber, gold, platinum, and silver. Colombia's Law 70, passed in 1993, promised ethnic and cultural rights, collective land ownership, and socioeconomic development to Afro-Colombian communities. At the same time that various constituencies sought to interpret and implement Law 70, the state was moving ahead with large-scale development initiatives intended to modernize the economically backward coastal lowlands. Meanwhile national and international conservation organizations were attempting to protect the region's rich biodiversity. Asher explores this juxtaposition of black rights, economic development, and conservation—and the tensions it catalyzed. She analyzes the meanings attached to "culture," "nature," and "development" by the Colombian state and Afro-Colombian social movements, including women's groups. In so doing, she shows that the appropriation of development and conservation discourses by the social movements had a paradoxical effect. It legitimized the presence of state, development, and conservation agencies in the Pacific region even as it influenced those agencies' visions and plans.
