Practical Practice: Menu Math - Life Skills - Chapter Slice Apr 21 2022 Life Skills | Practical Application | Menu Math Students Learn the Practical Application of a Wide Range of Math Skills Related to the Use of Menus Through the use of real-life story-problem scenarios, students get plenty of practice with analyzing the information in word problems and applying the correct math operations to solve the problems. Menu Math includes four pages of colorful, realistic images, photos and information for each menu. The corresponding word problems were designed to develop math proficiency and to help students understand why mastery of essential math skills is so important to success in the real world. Real-Life Menus include four different types of restaurants: Adagio, The Green Dragon, Golden Gate Grill, The Two Sombreros Questions Students are asked to use the four colorful menu pages for each restaurant to find the information they need in order to solve the math word problems. When solving a problem, students may need to use the answer from another problem on the same page. Problems progress in difficulty as students work through the questions for each menu. The first activity page introduces students to the contents of the menu pages by asking comprehension questions. Answering these questions will familiarize students with the information they will need to solve the word problems Skills A wide range of math skills is covered in this program. Students will solve word problems that involve addition, subtraction, multiplication, and division as well as money, time, measurement, percents, decimals, and fractions. Some of the word problems are simple, one-step problems while others involve multiple steps that require students to really think about the problem. Each activity page lists the math skills covered at the top of the page. Details Total of 90 Pages Includes: • 16 full-color menu pages • Activity Pages • Step-by-Step Learning Tools

Math 6-12 Tutor'S Practice Resource Aug 21 2019 This practice book is by no means a grade-level resource. This is a compilation of the resources I used for those who came to seek my help. It covers from fifth grade to late high school. It covers number systems from complex, imaginary, real, irrational, rational, integer, whole, and counting numbers. In geometry, it touches from lines, two lines making angles, three lines making the first polygon, to circles. Statistics averages, variance, standard deviation. And also normal distribution.

Mood Prep 101 Dec 25 2019 Our teenagers are suffering more than ever. College counseling centers are overwhelmed, parents are worried, and mental health issues are increasingly common in young people between the ages of 12 and 20. Parents are particularly concerned about how to help their kids achieve a safe, healthy, and fulfilling college experience in light of soaring rates of depression and anxiety in young people. Mood Prep 101: A Parent's Guide to Preventing Depression and Anxiety in College-Bound Teens answers the question most parents have - "What can we do?" - when it comes to college-bound teens who may be vulnerable to anxiety and depression. Written with humor and compassion by award-winning psychologist and psychotherapist Carol Landau, this timely book empowers parents by providing strategies for helping their children psychologically prepare for college and adulthood, as well as by addressing and alleviating the anxiety parents themselves may feel about kids leaving home for the first time. Young people need a solid foundation of parental support in order to succeed at college; as such, Landau shows parents how they can promote healthy communication and problem-solving skills, and how they can help young people learn to better regulate emotions and tolerate distress. Landau also describes stressors typical amongst college students, and explains how to identify vulnerabilities to anxiety and depression, including perfectionism, social isolation, and the feeling of being "different". The book outlines how a parent can help students find a therapist and suggests such evidence-based treatments as cognitive behavior therapy (CBT) and interpersonal therapy (IPT). Finally, the book sheds light on some of the risky behaviors commonly found on today's college campuses, such as substance use and unsafe sexual relationships, and how they can exacerbate or even trigger anxiety and depression in young people. Landau concludes by calling on parents and educators to back away from the stressful, competitive focus of the college admissions process and turn instead to the values of curiosity, collaboration and empathy.
