Workshops Proceedings of the 5th International Conference on Intelligent Environments Dec 26 2019 Advances in the engineering of sensing and acting capabilities distributed in wide range of specialized devices is providing at last an opportunity for the fundamental advances that computer science achieved in the past few decades to make an impact in our daily lives. This technical confluence is matched by a unique historical context where users are better informed (more aware of the benefits that technology can provide) and production of more complex systems is becoming more affordable. Sensors/actuators deployed in an environment (in this context it can be any physical space like a house, office, classroom, car, street, etc.) facilitate a link between an automated decision-making system connected to that technologically enriched space. This computing empowered environment enables the provision of an intelligent environment, i.e., "a digital environment that proactively, but sensibly, supports people in their daily lives". This is an active area of research which is attracting an increasing number of professionals (in academia and industry) worldwide. The prestigious 5th International Conference on Intelligent Environments (IE'09) is focused on the development of advanced intelligent environments and stimulates the discussion on several specific topics which are crucial to the future of the area. As part of that five workshops were supported as part of IE'09. This volume is the combined proceedings of those five workshops: Workshop on Digital Object Memories (DOMe'09), Workshop on RFID Technology: concepts, practices & solutions (RFID'09), Workshop on Artificial Intelligence Techniques for Ambient Intelligence (AITAmI'09), Workshop on Ethical Design of Ambient Intelligence (EDAmI'09), Workshop on Smart Offices and Other Workplaces (SOOW'09).

Law, Corporate Governance and Partnerships at Work Jan 07 2021 This book examines how businesses manage their labour systems, and particularly how they manage the complex interaction of various factors which give rise to instances of 'partnership' style relations between capital and labour within businesses. In pursuing this task, the book draws upon a new and extensive set of empirical data constructed by the authors, which examines the activities of business corporations in Australia, their outlooks and relationships with stakeholders, and relates these to two new and evolving theoretical frameworks based in political economy and law.

Evaluating Project Decisions Jan 27 2020 Effective decisions are crucial to the success of any software project, but to make better decisions you need a better decision-making process. In *Evaluating Project Decisions*, leading project management experts introduce an innovative decision model that helps you tailor your decision-making process to systematically evaluate all of your decisions and avoid the bad choices that lead to project failure. Using a real-world, case study approach, the authors show how to evaluate software project problems and situations more effectively, thoughtfully assess your alternatives, and improve the decisions you make. Drawing on their own extensive research and experience, the authors bridge software engineering theory and practice, offering guidance that is both well-grounded and actionable. They present dozens of detailed examples from both successful and unsuccessful projects, illustrating what to do and what not to do. *Evaluating Project Decisions* will help you to analyze your options and ultimately make better decisions at every stage in your project, including: Requirements-Elicitation, description, verification, validation, negotiation, contracting, and management over the software life cycle Estimates-Conceptual solution design, decomposition, resource and overhead allocation, estimate construction, and change management Planning-Defining objectives, policies, and scope; planning tasks, milestones, schedules, budgets, staff and other resources; and managing projects against plans Product-Proper product definition, development process management, QA, configuration management, delivery, installation, training, and field service Process-Defining, selecting, understanding, teaching, and measuring processes; evaluating process performance; and process improvement or optimization In addition, you will see how to evaluate decisions related to risk, people, stakeholder expectations, and global development. Simply put, you'll use what you learn here on every project, in any industry, whatever your goals, and for projects of any duration, size, or type.

The Global Politics of Combating Nuclear Terrorism Aug 26 2022 The most difficult challenge for a terrorist organization seeking to build a nuclear weapon or improvised nuclear device is obtaining fissile material, either plutonium or highly enriched uranium (HEU). Experts acknowledge that obtaining HEU, uranium that has been processed to increase the proportion of the U-235 isotope to over 20%, is the most difficult challenge facing a state or non-state actor seeking to build a nuclear explosive. The large stocks of HEU in civilian use, many not adequately protected, are thus one of the greatest security risks facing the global community at present. This book contains chapters examining the various uses for this material and

possible alternatives; the threat posed by this material; the economic, political and strategic obstacles to international efforts to end the use of HEU for commercial and research purposes; as well as new national and international measures that should be taken to further the elimination of HEU. This book was published as a special issue of *The Nonproliferation Review*.

[ABIA: South and Southeast Asian Art and Archaeology Index](#) Dec 18 2021 Volume Three offers 1643 annotated records on publications regarding the art and archaeology of South Asia, Central Asia and Tibet selected from the ABIA Index database at www.abia.net which were published between 2002 and 2007.

[Julie Blyfield](#) Sep 22 2019 Julie Blyfield is one of Australia's leading contemporary jewellers. Her work has consistently kept pace with investigations of location, identity and cross-cultural understanding, and involves an innovative engagement with traditional jewellery and metalwork techniques sourced from all over the world.

[Transbordering Latin Americas](#) Jun 12 2021 This book examines transborder Latin American sociocultural and spatial conditions across the globe and at different scales, from gendered and racialized individuals to national and transnational organizations. Gathering scholars from the "spatial sciences"—architecture, urban design, urban planning, and geography—as well as sociology, anthropology, history, and economics, the volume explores these transbordering practices of place making and community building across cultural and nation-state borders, examining different agents (individuals, ethnic and cultural groups, NGOs, government agencies) that are engaged in transnational/transborder living and city-making practices, reconceiving notions of state, identity, and citizenship and showing how subjected populations resist, adapt, or coproduce transnational/transborder projects and, in the process, help shape and are shaped as transborder subjects.

Software Engineering and Formal Methods Feb 08 2021 This book constitutes revised selected papers from the workshops collocated with the SEFM 2014 conference on Software Engineering and Formal Methods, held in Grenoble, France, in September 2014. The 26 papers included in this volume were carefully reviewed and selected from 49 submissions. They are from the following workshops: the 1st Workshop on Human-Oriented Formal Methods - From Readability to Automation, HOFM 2014, the 3rd International Symposium on Modelling and Knowledge Management Applications - Systems and Domains, MoKMaSD 2014, the 8th International Workshop on Foundations and Techniques for Open Source Software Certification, Open Cert 2014, the 1st Workshop on Safety and Formal Methods, SaFoMe 2014 and the 4th Workshop on Formal Methods in the Development of Software, WS-FMDS 2014.

On the Move to Meaningful Internet Systems 2006: OTM 2006 Workshops Sep 27 2022 This two-volume set LNCS 4277/4278 constitutes the refereed proceedings of 14 international workshops held as part of OTM 2006 in Montpellier, France in October/November 2006. The 191 revised full papers presented were carefully reviewed and selected from a total of 493 submissions to the workshops. The first volume begins with 26 additional revised short or poster papers of the OTM 2006 main conferences.

Euro-Par 2008 Workshops - Parallel Processing Mar 21 2022 Parallel and distributed processing, although within the focus of computer science research for a long time, is gaining more and more importance in a wide spectrum of applications. These proceedings aim to demonstrate the use of parallel and distributed processing concepts in different application fields, and attempt to spark interest in novel research directions to parallel and high-performance computing research in general. The objective of these workshops is to specifically address researchers coming from university, industry and governmental research organizations and application-oriented companies in order to close the gap between purely scientific research and the applicability of the research ideas to real-life problems. Euro-Par is an annual series of international conferences dedicated to the promotion and advancement of all aspects of parallel and distributed computing. The 2008 event was the 14th issue of the conference. Euro-Par has for a long time been eager to attract colocated events sharing the same goal of promoting the development of parallel and distributed computing, both as an industrial technique and an academic discipline, extending the frontier of both the state of the art and the state of the practice. Since 2006, Euro-Par has been offering researchers the chance to colocate advanced technical workshops back-to-back with the main conference.

Human Trafficking, Human Misery May 11 2021 This volume takes a global perspective and uses first-hand accounts and stories to examine the problem of human trafficking in its various manifestations around the world.

Euro-Par 2007 Workshops: Parallel Processing Apr 22 2022 Parallel and distributed processing, although within the focus of computer science research for a long time, is gaining more and more importance in a wide spectrum of applications. These proceedings aim to demonstrate the use of parallel and distributed processing concepts in different application fields, and attempt to spark interest in novel research directions to advance the embracing model of high-performance computing research in general. The objective of these workshops is to specifically address researchers coming from university, industry and governmental research organizations and application-oriented companies, in order to close the gap between purely scientific research and the applicability of the research ideas to real-life problems. Euro-Par is an annual series of international conferences dedicated to the promotion and advancement of all aspects of parallel and distributed computing. The 2007 event was the 13th issue of the conference. Euro-Par has for a long time been eager to attract colocated events sharing the same goal of promoting the development of parallel and distributed computing, both as an industrial technique and an academic discipline, extending the frontier of both the state of the art and the state of the practice. Since 2006, Euro-Par offers researchers the chance to colocate advanced technical workshops back-to-back with the main conference. This is for a mutual benefit: the workshops can take advantage of all technical and social facilities which are set up for the conference, so that the organizational tasks are kept to a minimal level; the conference can rely on workshops to experiment with specific areas of research which are not yet mature enough, or too specific, to lead to an official, full-fledged topic at the conference.

[Linguistic Minorities in Democratic Context](#) Nov 17 2021 This blends discussion of the role of language minorities in politics with examples of language policy in a range of national contexts. It discusses minority rights and language protection, the policies of the state in privileging powerful majorities, the opportunities and challenges of both devolution and globalization.

[Business Process Management Workshops](#) Mar 29 2020 This book constitutes the thoroughly refereed post-workshop proceedings of 6 international workshops held in Brisbane, Australia, in conjunction with the 5th International Conference on Business Process Management, BPM 2007, in September 2007. The 45 revised full papers presented were carefully reviewed and selected from more than 80 submissions to the following 6 international workshops: Business Process Intelligence (BPI 2007), Business Process Design (BPD 2007), Collaborative Business Processes (CBP 2007), Process-oriented Information Systems in Healthcare (ProHealth 2007), Reference Modeling (RefMod 2007), and Advances in Semantics for Web Services (semantics4ws 2007).

[How to Coach Teachers Who Don't Think Like You](#) Oct 28 2022 This how-to resource encourages teachers to write and reflect upon their practices in a unique approach to coaching that bridges content areas and honors distinctive learning styles.

The Genome Incorporated Feb 20 2022 The Genome Incorporated examines the proliferation of human genomics across contemporary media cultures. It explores questions about what it means for a technoscience to thoroughly saturate everyday life, and places the interrogation of the science/media relationship at the heart of this enquiry. The book develops a number of case studies in the mediation and consumption of genomics, including: the emergence of new direct-to-the-consumer bioinformatics companies; the mundane propagation of testing and genetic information

through lifestyle television programming; and public and private engagements with art and science institutions and events. Through these novel sites, this book examines the proliferating circuits of production and consumption of genetic information and theorizes this as a process of incorporation. Its wide-ranging case studies ensure its appeal to readers across the social sciences.

Handbook of Research on Technology Project Management, Planning, and Operations Apr 29 2020 "This book provides a compendium of terms, definitions and explanations of concepts, processes and acronyms that reflect the growing trends, issues, and applications of technology project management"--Provided by publisher.

The Archaeological and Forensic Applications of Microfossils: A Deeper Understanding of Human History The Archaeological and Forensic Applications of Microfossils Jun 19 2019 Microfossils are an abundant component of the sedimentary rock record. Their analysis can reveal not only the environments in which the rocks were deposited, but also their age. When combined, the spatial and temporal distribution patterns of microfossils offer enormous utility for archaeological and forensic investigations. Their presence can act as a geological 'fingerprint' and the tiniest fragment of material, such as a broken Iron Age potsherd, can contain a microfossil signature that reveals the geographical source of the materials under investigation. This book explores how microfossils are employed as tools to interpret human society and habitation throughout history. Examples include microfossil evidence associated with Palaeolithic human occupation at Boxgrove in Sussex, alongside investigations into human-induced landscape change during the Holocene. Further examples include the use of microfossils to provenance the source materials of Iron Age ceramics, Roman mosaics and Minoan pottery, in addition to their application to help solve modern murder cases, highlighting the diverse applications of microfossils to improving our understanding of human history.

Relational Contracting for Construction Excellence Aug 02 2020 Improved efficiency and effectiveness in the construction industry provide huge potential savings. Various forms of relational contracting such as partnering, alliancing, public private partnership (PPP), and joint venture are good examples of this. Relational Contracting for Construction Excellence presents the principles of relational contracting, practicalities and a series of short case studies. Principles begins with the fundamentals then covers development in major countries, definitions of relational contracting, their benefits, difficulties, critical success factors and key performance indicators. Practice includes the relational contracting approach and process in general, and significant factors which make workshops successful, at whatever stage of the process. A number of real-life case studies from the UK, USA, Australia, and Hong Kong are provided. Since the book draws on a combination of practical consultancy works and university research, a wide range of readers will find it useful, i.e. from industrial practitioners to undergraduate students.

UNESCO Cooperative Project on the Preservation of Documentary Heritage in Asia Oct 04 2020

Advances in Management Research Jul 21 2019 This book covers advancements across business domains in knowledge and information management. It presents research trends in the fields of management, innovation, and technology, and is composed of research papers that show applications of IT, analytics, and business operations in industry and in educational institutions. It offers a combination of scientific research methods and concepts, with contributions from globally renowned authors; presents various management domains from a number of countries for a global perspective; and provides a unique combination of topics and methods while giving insights on the management domain using a holistic approach. The book provides scholars with a platform to derive maximum utility in the area of management, research, and technology by subscribing to the idea of managing business through performance and management technology.
