Human Work in the Age of Smart Machines Mar 31 2020 A public policy leader addresses how artificial intelligence is transforming the future of labor—and what we can do to protect the role of workers. As computer technology advances with dizzying speed, human workers face an ever-increasing threat of obsolescence. In *Human Work In the Age of Smart Machines*, Jamie Merisotis argues that we can—and must—rise to this challenge by preparing to work alongside smart machines doing that which only humans can: thinking critically, reasoning ethically, interacting interpersonally, and serving others with empathy. The president and CEO of Lumina Foundation, Merisotis offers a roadmap for the large-scale, radical changes we must make in order to find abundant and meaningful work for ourselves in the 21st century. His vision centers on developing our unique capabilities as humans through learning opportunities that deliver fair results and offer a broad range of credentials. By challenging long-held assumptions and expanding our concept of work, Merisotis argues that we can harness the population's potential, encourage a deeper sense of community, and erase a centuries-long system of inequality.

The Illustrated Guide to Assistive Technology and Devices May 26 2022 This book is an illustrated guide to assistive technologies and devices (AT/AD). It chronicles the use of AT/AD - technology used by individuals with disabilities to perform functions that might otherwise be difficult or impossible. In general, AT can include mobility devices such as walkers and wheelchairs, as well as hardware, software, and peripherals that assist people with disabilities in accessing computers or other information technologies. Advanced AT has coincided with the advent of personal electronic devices that could be customized for use, such as computers and smart phones. For people with disabilities, AT includes simple gadgets for the home and office, electronic gadgets and complex computer systems for the workplace, mobility aids and accessible vans for getting around and modified equipment for lifestyle needs, such as talking ATMs and strobe light alarm systems. This book empowers people with disabilities to use assistive technologies to overcome some of their physical or mental limitations and have a more equal playing field. It includes real-life examples about how people with disabilities are using assistive technology (AT) to assist them in daily tasks, and discusses emotional issues related to AT/AD.

Intensive Reading Interventions for the Elementary Grades May 02 2020 Packed with easy-to-use tools and resources, this book presents intensive intervention strategies for K–5 students with severe and persistent reading difficulties. Filling a key need, the authors describe specific ways to further intensify instruction when students continue to struggle. Chapters address all the fundamental components of reading--phonological awareness, phonics and word recognition, reading fluency, oral language, language and reading comprehension, and writing to read. The authors discuss the design and implementation of intensive instruction and provide effective teaching techniques and activities. Grounded in the principles of data-based individualization, the book includes concrete recommendations for determining students' particular needs and monitoring their progress.

The Poetry Toolkit: The Essential Guide to Studying Poetry Feb 20 2022 With examples from an extensive range of poets from Chaucer to today, The Poetry Toolkit offers simple and clear explanations of key terms, genres and concepts that enable readers to develop a richer, more sophisticated approach to reading, thinking and writing about poems. Combining an easy-to-use reference format defining and illustrating key concepts, forms and topics, with in-depth practice readings and further exercises, the book helps students master the study of poetry for themselves. Now in its second edition, The Poetry Toolkit includes a wider range of examples from contemporary poetry and more

American poetry. In addition, an extended close reading section now offers practice comparative readings of the kind students are most likely to be asked to undertake, as well as readings informed by contemporary environmental and urban approaches. The book is also supported by extensive online resources, including podcasts, weblinks, guides to further reading and advanced study guides to reading poetry theoretically.

Cruising Guide to the Leeward Islands Jan 10 2021 Fair winds and fine cruising is author Chris Doyle's wish for readers of this popular, newly updated guide to the 10 island nations of this enchanting Caribbean chain. Doyle's background in research makes this volume rich in practical details; yet its tone is conversational. His is also an intimate knowledge, gathered from more than 20 years of live-aboard Caribbean cruising on his Carib 41 Helos, a former charterboat. The Leewards are a cultural and topographic mix, and Doyle addresses them by geographical grouping. The Renaissance Islands (St. Martin, St. Barts and Anguilla), an economically strong bareboating enclave, offer short cruising passages and a wide choice of anchorages. The Islands That Brush the Clouds - a volcanic chain strung between Saba and Montserrat - present cruisers with a variety of channels and terrain. Most broadly strewn are the Islands of Mountains and Mangroves, a patchwork chiefly of rugged rainforest and exotic fauna, guarded in spots by spectacular reefs. The southern Leewards in particular have cried for reliable charting. Doyle provides aid throughout, using GPS coordinates, a trove of charts and color maps. All are cross-referenced with the newly released Caribbean Yachting Charts, exactly detailed and available through Cruising Guide Publications. Spectacular photographs add a visual feast. Onshore accommodations, transportation, communications, entertainment and provisioning are also addressed throughout the guide, and in an exhaustive directory by island and service type.
