The Public Understanding of Assessment Apr 28 2020 Assessment of educational achievement, whether by traditional examinations or by teachers in schools, attracts considerable public interest, particularly when it is associated with 'high stakes' outcomes such as university entry or selection for employment. When the individual's results do not chime with their or their teachers' expectations, doubts creep in about the process of assessment that has arrived at this result. However, educational assessment is made up of many layers of complexity, which are not always clear to the general public, including teachers, students, and parents, and which are not easily understood outside of the expert assessment community. These layers may be organized in highly co-dependent relationships that include reliability, validity, human judgment, and errors, and the uses and interpretations of the various types of assessment. No-one could reasonably argue that the principles and complexities of educational assessment should be core learning in public education, but there is a growing realization that trust in the UK assessment system is under some threat as the media and others sensationalize or politicize any problems that arise each year. This book offers the first comprehensive overview of how the general public is considered to perceive and understand a wide variety of aspects of educational assessment, and how this understanding may be improved. This book was originally published as a special issue of the Oxford Review of Education.

Data Democracy Feb 25 2020 Data Democracy: At the Nexus of Artificial Intelligence, Software Development, and Knowledge Engineering provides a manifesto to data democracy. After reading the chapters of this book, you are informed and suitably warned! You are already part of the data republic, and you (and all of us) need to ensure that our data fall in the right hands. Everything you click, buy, swipe, try, sell, drive, or fly is a data point. But who owns the data? At this point, not you! You do not even have access to most of it. The next best empire of our planet is one who owns and controls the world's best dataset. If you consume or create data, if you are a citizen of the data republic (willingly or grudgingly), and if you are interested in making a decision or finding the truth through data-driven analysis, this book is for you. A group of experts, academics, data science researchers, and industry practitioners gathered to write this manifesto about data democracy. The future of the data republic, life within a data democracy, and our digital freedoms An in-depth analysis of open science, open data, open source software, and their future challenges A comprehensive review of data democracy's implications within domains such as: healthcare, space exploration, earth sciences, business, and psychology The democratization of Artificial Intelligence (AI), and data issues such as: Bias, imbalance, context, and knowledge extraction A systematic review of AI methods applied to software engineering problems

How to Read Texts Oct 03 2020 Now in its second edition, *How to Read Texts* introduces students to key critical approaches to literary texts and offers a practical introduction for students developing their own critical and close-reading skills. Written in a lively, jargon-free style, it explains critical concepts, approaches and ideas including: - Debates around critical theory - The role of history and context - The links between creativity and criticism - The relationship between author, reader and text. The new edition now includes guidance on analysing a range of multi-media texts, including film and online media as well as the purely literary. In addition to new practical examples, readings, exercises and 'checkpoints' that help students to build confidence in their own critical readings of both primary and secondary texts, the book now also offers guidance on writing fully-formed critical essays and tips for independent research. Comprehensively updated and revised throughout, *How to Read Texts* is an indispensable guide for students making the transition to university study.

The Oxford Handbook of Asian Business Systems Jun 18 2019 Much of the existing literature within the "varieties of capitalism " (VOC) and "comparative business systems " fields of research is heavily focused on Europe, Japan, and the Anglo-Saxon nations. As a result, the field has yet to produce a detailed empirical picture of the institutional structures of most Asian nations and to explore to what extent existing theory applies to the Asian context. The *Oxford Handbook of Asian Business Systems* aims to address this imbalance by exploring the shape and consequences of institutional variations across the political economies of different societies within Asia. Drawing on the deep knowledge of 32 leading experts, this book presents an empirical, comparative institutional analysis of 13 major Asian business systems between India and Japan. To aid comparison, each country chapter follows the same consistent outline. Complementing the country chapters are eleven contributions examining major themes across the region in comparative perspective and linking the empirical picture to existing theory on these themes. A further three chapters provide perspectives on the influence of history and institutional change. The concluding chapters spell out the implications of all these chapters for scholars in the field and for business practitioners in Asia. The

Handbook is a major reference work for scholars researching the causes of success and failure in international business in Asia.

Assessing Young Learners of English: Global and Local Perspectives Apr 09 2021 This volume documents international, national, and small-scale testing and assessment projects of English language education for young learners, across a range of educational contexts. It covers three main areas: age-appropriate 'can do statements' and task types for teaching and testing learners between the ages of 6 to 13; innovative approaches to self-assessment, diagnostic testing, self-perception, and computer-based testing; and findings on how young learners perform on vocabulary, listening, speaking, pronunciation, and reading comprehension tests in European and Asian contexts. Early language learning has become a major trend in English language education around the globe. As a result of the spread of teaching English to a growing number of young children, assessment of and for learning have emerged as key issues. In line with this development, there is a clear and emerging need to make early language programs accountable and to assess both the progress children make over time and to quantify their achievement at various stages of development. This volume informs stakeholders about the realistic goals of early language learning, their efficiency, and how much progress children make over time.
