No Place to Hide Apr 30 2020 THE INSIDE ACCOUNT OF THE EVENTS DOCUMENTED IN LAURA POITRAS'S CITIZENFOUR Glenn Greenwald's No Place to Hide is the story of one of the greatest national security leaks in US history. In June 2013, reporter and political commentator Glenn Greenwald published a series of reports in the Guardian which rocked the world. The reports revealed shocking truths about the extent to which the National Security Agency had been gathering information about US citizens and intercepting communication worldwide, and were based on documents leaked by former National Security Agency employee Edward Snowden to Greenwald. Including new revelations from documents entrusted to Greenwald by Snowden, this essential book tells the story of Snowden and the NSA and examines the far-reaching consequences of the government's surveillance program, both in the US and abroad. 'The first thing I do when I turn on the computer in the morning is go to Glenn Greenwald's blog. He is truly one of our greatest writers right now' Michael Moore 'The most important voice to have entered the political discourse in years' Bill Moyers Glenn Greenwald is the author of several US bestsellers, including *How Would A Patriot Act?*, and *A Tragic Legacy*. Acclaimed as one of the twenty-five most influential political commentators by The Atlantic, Greenwald is a former constitutional law and civil rights attorney. He has been a columnist for the Guardian since August 2012 and his work has appeared in numerous newspapers and political news magazines, including The New York Times and the Los Angeles Times.

Power Wars Mar 10 2021 Pulitzer Prize-winning journalist Charlie Savage's penetrating investigation of the Obama presidency and the national security state. Barack Obama campaigned on changing George W. Bush's "global war on terror" but ended up entrenching extraordinary executive powers, from warrantless surveillance and indefinite detention to military commissions and targeted killings. Then Obama found himself bequeathing those authorities to Donald Trump. How did the United States get here? In *Power Wars*, Charlie Savage reveals high-level national security legal and policy deliberations in a way no one has done before. He tells inside stories of how Obama came to order the drone killing of an American citizen, preside over an unprecedented crackdown on leaks, and keep a then-secret program that logged every American's phone calls. Encompassing the first comprehensive history of NSA surveillance over the past forty years as well as new information about the Osama bin Laden raid, *Power Wars* equips readers to understand the legacy of Bush's and Obama's post-9/11 presidencies in the Trump era.

[Transnational Advocacy Networks in the Information Society](#) Jul 14 2021 This book examines the role of transnational advocacy networks in enabling effective participation for individual citizens in the deliberative processes of global governance. Contextualized around the international conference setting of the United Nations-sponsored World Summit on the Information Society (WSIS) in 2003 and 2005, the book sees epistemic communities and information and communication technologies (ICTs) as critical to the effectiveness of this important organizational form. Historically, governments have dominated the official "conference diplomacy" surrounding these World Summits. However, reflecting the UN General Assembly resolution authorizing WSIS, transnational civil society and private sector organizations were invited to participate as official partners in a multistakeholder dialogue at the summit alongside the more traditional governments and international organizations. This book asks: are transnational advocacy networks active in the global information society influential partners in these global governance processes, or merely symbolic tokens—or pawns? Cogburn explores the factors that enabled some networks—such as the Internet Governance Caucus—to persist and thrive, while others failed, and sees linkages

with epistemic communities—such as the Global Internet Governance Academic Network—and ICTs as critical to network effectiveness.

American Surveillance Dec 27 2019 A nuanced history and analysis of intelligence-gathering versus privacy rights.

Cyber Security and Policy Nov 06 2020 A world without the advantages and convenience provided by cyberspace and the internet of things is now unimaginable. But do we truly grasp the threats to this massive, interconnected system? And do we really understand how to secure it? After all, cyber security is no longer just a technology problem; the effort to secure systems and society are now one and the same. This book discusses cyber security and cyber policy in an effort to improve the use and acceptance of security services. It argues that a substantive dialogue around cyberspace, cyber security and cyber policy is critical to a better understanding of the serious security issues we face.

How Numbers Rule the World Jan 08 2021 Numbers dominate global politics and, as a result, our everyday lives. Credit ratings steer financial markets and can make or break the future of entire nations. GDP drives our economies. Stock market indices flood our media and national debates. Statistical calculations define how we deal with climate change, poverty and sustainability. But what is behind these numbers? In *How Numbers Rule the World*, Lorenzo Fioramonti reveals the hidden agendas underpinning the use of statistics and those who control them. Most worryingly, he shows how numbers have been used as a means to reinforce the grip of markets on our social and political life, curtailing public participation and rational debate. An innovative and timely exposé of the politics, power and contestation of numbers.

Big Data Sep 16 2021 An unimaginably vast amount of data is now generated by our online lives, including all our uploaded documents, social media traffic, online shopping, and even GPS data from our cars. At the same time, our ability to manage this data is becoming ever more sophisticated. In this Very Short Introduction, Dawn Holmes explains how big data is stored, analysed, and exploited by a variety of bodies, from large companies to organizations concerned with medical research. As big data transforms the way businesses operate, it simultaneously raises important ethical issues, as cases such as the Snowden affair and hacked smart devices have shown.

Harvard Law Review: Volume 128, Number 6 - April 2015 Feb 27 2020 The Harvard Law Review, April 2015, is offered in a digital edition. Contents include the annual Developments in the Law survey of a particular area of legal concern; this year's topic is Policing. Other contents include: • Article, "Consent Procedures and American Federalism," by Bridget Fahey • Essay, "Anticipatory Remedies for Takings," by Thomas W. Merrill • Book Review, "How a 'Lawless' China Made Modern America: An Epic Told in Orientalism," by Carol G.S. Tan Specific subjects studied in Developments in the Law—Policing are: Policing and Profit, Policing Students, Policing Immigrant Communities, and Considering Police Body Cameras. In addition, the issue features student commentary on Recent Cases, including such subjects as: the business judgment rule and mergers; whistleblowing under Dodd-Frank and extraterritoriality; senate redistricting in New York; postmortem rights of publicity; standing and overlap of various tests used; informing one who pleads No Contest of collateral consequences; exceptions to New York marriage license requirement for out-of-state marriages; exclusionary rule for violations of Posse Comitatus restrictions; and extending federal forced labor statute to conduct criminalized under state law. Finally, the issue features several summaries of Recent Publications. The Harvard Law Review is a student-run organization whose primary purpose is to publish a journal of legal scholarship. The Review comes out monthly from November through June and has roughly 2500 pages per volume. The organization is formally independent of the Harvard Law School. Student editors make all editorial and organizational decisions. This issue of the Review is Apr. 2015, the 6th issue of academic year 2014-2015 (Volume 128). The digital edition features active Contents, linked notes, and proper ebook and Bluebook formatting.

National Security, Leaks and Freedom of the Press Nov 25 2019 Written by a group of the nation's leading constitutional scholars, a deeply informed, thoughtful, and often surprising examination of who has First Amendment rights to disclose, to obtain, or to publish classified information relating to the national security of the United States. One of the most vexing and perennial questions facing any democracy is how to balance the government's legitimate need to conduct its operations—especially those related to protecting the national security—in secret, with the public's right and responsibility to know what its government is doing. There is no easy answer to this issue, and different nations embrace different solutions. In the United States, at the constitutional level, the answer begins exactly half a century ago with the Supreme Court's landmark 1971 decision in the Pentagon Papers case. The final decision, though, left many important questions unresolved. Moreover, the issue of leaks and secrecy has cropped up repeatedly since, most recently in the Edward Snowden and Chelsea Manning cases. In *National Security, Leaks and Freedom of the Press*, two of America's leading First Amendment scholars, Lee C. Bollinger and Geoffrey R. Stone, have gathered a group of the nation's leading constitutional scholars—including John Brennan, Eric Holder, Cass R. Sunstein, and Michael Morell, among many others—to delve into important dimensions of the current system, to explain how we should think about them, and to offer as many solutions as possible.

Managing Diversity and Inclusion Jan 28 2020 Written and edited by leading experts in the field, this authoritative account sets UK and European practices firmly within a global context. It offers an in-depth and contextual account of enduring, contemporary and cutting edge theories and approaches to diversity and inclusion management. With workforce demographics changing rapidly, high-profile cases of discrimination in the news and new legislation coming into force, it is

more crucial than ever that organisations understand and effectively manage workplace diversity – not only to increase business outcomes, but to create an inclusive workplace in a socially responsible manner. This second edition includes an engaging new chapter on social class and diversity, as well as a range of new mini case studies on contemporary issues and themes such as intersectionality and autism employment. Packed with learning features to encourage critical analysis and help you link theory to real-world practice, *Managing Diversity and Inclusion* offers an in-depth and contextual account of enduring and cutting edge discussions and approaches to diversity and inclusion management. Go online to access additional resources to support your study: <https://study.sagepub.com/syed2e>

World Almanac and Book of Facts 2014 Oct 17 2021 Get thousands of facts right at your fingertips with this updated resource. The World Almanac® and Book of Facts is America's top-selling reference book of all time, with more than 82 million copies sold. Published annually since 1868, this compendium of information is the authoritative source for all your entertainment, reference, and learning needs. The 2014 edition of The World Almanac reviews the events of 2013 and will be your go-to source for any questions on any topic in the upcoming year. Praised as a “treasure trove of political, economic, scientific and educational statistics and information” by The Wall Street Journal, The World Almanac® contains thousands of facts that are unavailable publicly elsewhere. The World Almanac® and Book of Facts will answer all of your trivia needs—from history and sports to geography, pop culture, and much more.

Public Management Feb 21 2022 Managing in the public sector requires an understanding of the interaction between three distinct dimensions—administrative structures, organizational cultures, and the skills of individual managers. Public managers must produce results that citizens and their representatives expect from their government while fulfilling their constitutional responsibilities. In *Public Management: Thinking and Acting in Three Dimensions*, authors Carolyn J. Hill and Laurence E. Lynn, Jr. argue that one-size-fits-all approaches are inadequate for dealing with the distinctive challenges that public managers face. Drawing on both theory and detailed case studies of actual practice, the authors show how public management that is based on applying a three-dimensional analytic framework—structure, culture, and craft—to specific management problems is the most effective way to improve the performance of America’s unique scheme of governance in accordance with the rule of law. The book educates readers to be informed citizens and prepares students to participate as professionals in the world of public management.

Mega-Regional Trade Agreements: CETA, TTIP, and TiSA Apr 23 2022 The Comprehensive Economic and Trade Agreement between the EU and Canada (CETA), proposed Transatlantic Trade and Investment Partnership between the EU and the US (TTIP), and the plurilateral Trade in Services Agreement (TiSA) between the EU and 22 other States have sparked a great deal of academic and public interest. This edited collection brings together leading experts in the field of international economic law to address the legal complexities of these treaties and provide an explanation of their core principles. In the first two chapters, this book examines changing conceptions of international economic law and the main motivations for negotiating mega-regional agreements. In nine further contributions, international experts examine sectoral issues such as the trade, investment, and dispute settlement procedures envisaged in these 'mega-regional' agreements. The book goes on to consider the progress made in intellectual property protection, the problems associated with data protection, human rights, labour, and environmental standards, issues of transparency and legitimacy, and the relationship between CETA, TTIP, and TiSA on the one hand and EU law on the other. It concludes with four chapters that discuss globalization and other fundamental questions surrounding these mega-regional agreements from economic, political science, and legal perspectives.

Indonesia's Ascent Jul 22 2019 This volume explores the domestic and transnational considerations associated with Indonesia's ascent, referring to its rise in terms of hard and soft power and its likely trajectory in the future. The range of contributors analyse economic resources, religious harmony, security, regional relations, leadership and foreign policy.

Privacy, Law Enforcement, and National Security Oct 05 2020 Developed from the casebook *Information Privacy Law*, this short paperback contains key cases and materials focusing on privacy issues related to government surveillance and national security. It can be used as a supplement to general criminal procedure courses, as it covers electronic surveillance law and national security surveillance extensively, topics that many criminal procedure casebooks don't cover in depth. New to the Third Edition: *Carpenter v. United States* *United States v. Basaaly Saeed Moalin* Other topics covered include: Fourth Amendment Third Party Doctrine Metadata, sensory enhancement technology Video surveillance, audio surveillance, location tracking, and GPS Electronic surveillance law and computer searches ECPA, CALEA, USA-PATRIOT Act, FISA Foreign intelligence and NSA surveillance

Global Governance, Human Rights and International Law Jan 20 2022 This book offers a stimulating introduction to the links between areas of global governance, human rights global economy and international law. By drawing on a range of diverse subject areas, Errol P. Mendes argues that the foundations of global governance, human rights and international law are undermined by a conflict or ‘tragic flaw’, where insistence on absolute conceptions of state sovereignty are pitted against universally accepted principles of justice and human rights resulting in destructive self-interest for both the state and the global community. The book explores how human rights and international law are applied in some of the critical institutions

of global governance and in the operations of the global private sector, and how States, institutions and global civil society struggle to fight this 'tragic flaw'. The book is brought up to date by considering developments in the role of the IMF, the World Bank, bilateral investment treaties; the likely failure of the Doha round of WTO negotiations; the legacy of the 2008 financial crisis; and the role of the International Criminal Court and the evolving Responsibility to Protect doctrine in international peace and security crises in the Middle East, Central and West Africa among other regions of the world. With its intensely interdisciplinary approach, this book motivates new thinking in the realm of global governance and international law, and promotes the development of new strategies for negotiating between conflicting leadership and organisational values within global institutions. The book will be of great interest and use to students and researchers of public international law, international relations and political science, business and human rights, global governance and international trade and economic law.

Outsourcing US Intelligence Oct 25 2019 In the 21st century, more than any other time, US agencies have relied on contractors to conduct core intelligence functions. This book charts the swell of intelligence outsourcing in the context of American political culture and considers what this means for the relationship between the state, its national security apparatus and accountability within a liberal democracy. Through analysis of a series of case studies, recently declassified documents and exclusive interviews with national security experts in the public and private sectors, the book provides an in-depth and illuminating appraisal of the evolving accountability regime for intelligence contractors.

China in the Xi Jinping Era Jun 25 2022 This book examines the driving forces behind national-level politics, changes to the judiciary, social control, economic reform, environmental protection, urban development, the management of ethnic relations, as well as foreign and security policy orientation in China under Xi Jinping. It explains Xi's ambition, examines the limitations he has to confront, and maps the direction of reform he pursues. The book starts off by examining how the consultative Leninist nature of the political system continues to shape politics and policy in China under Xi, and what the China dream Xi advocates actually entails domestically and beyond China. It ends by highlighting the megatrends that will prevail in the decade when Xi is expected to stay in power. The book also includes contributions from five Central Party School professors whose views are taken seriously by the Chinese leadership.

Free Speech After 9/11 Mar 22 2022 This volume examines and compares the changes in the appropriate parameters of freedom of speech in the counter-terrorism context since 9/11, focusing on the US, UK, and Australia.

No News without Secrets Aug 23 2019 Die Veröffentlichung von klassifiziertem Material führte nicht erst mit Wikileaks und den NSA-Enthüllungen durch Edward Snowden zu einer heißen Debatte. Sind solche Preisgebungen an die Öffentlichkeit tatsächlich eine Gefahr für die nationale Sicherheit oder doch vielmehr eine notwendige Reaktion auf übertriebene Intransparenz und Geheimhaltung? Wer sind die treibenden Kräfte hinter solchen Vorfällen und wie werden diese Geheimnisbrüche in der Öffentlichkeit bewertet und diskutiert? Fragen dieser Art lassen sich nicht in einem historischen Vakuum beantworten. Christoph Meister zeigt, wie Geheimnisbrüche und die Enthüllungen von klassifiziertem Material zwischen dem Ende des Zweiten Weltkriegs und dem Ende des Kriegs in Südostasien die USA bewegten. Dazu gehören neben bekannten Vorfällen wie der Veröffentlichung der Pentagon Papers oder den Watergate-Enthüllungen auch zahlreiche weitere Vorfälle, die hier zum ersten Mal gesammelt dargestellt werden.

Intelligence Feb 09 2021 This sixth edition now features a new two-colour interior design and Lowenthal's reliable and thorough updating. With recent developments in mind, he highlights new challenges facing the intelligence community, including the effects of the Snowden leaks in terms of collection and Congressional oversight, as well as discussing NSA programs, UAVs, and the impact of social media. All transnational issues have been updated, especially to reflect changes in the war on terror and with WMD. New analytic issues receive attention, including Big Data, multi-intelligence analysis, and shifting demands on the work force. A new oversight chapter gives extra scrutiny to the role of the FISA court, OMB, and GAO. Lowenthal also expands coverage of foreign intelligence services, to include more on services in each region of the world.

China's Many Dreams Dec 07 2020 China's new leader Xi Jinping has announced that the China Dream of great rejuvenation of the Chinese nation is now closer than ever. This book discusses the meaning and progress of Chinese national rejuvenation from multiple perspectives. It discusses critically China's progress towards becoming a strong, prosperous and well-governed country.

Privacy and Power Jun 20 2019 Edward Snowden's leaks exposed fundamental differences in the ways Americans and Europeans approach the issues of privacy and intelligence gathering. Featuring commentary from leading commentators, scholars and practitioners from both sides of the Atlantic, the book documents and explains these differences, summarized in these terms: Europeans should 'grow up' and Americans should 'obey the law'. The book starts with a collection of chapters acknowledging that Snowden's revelations require us to rethink prevailing theories concerning privacy and intelligence gathering, explaining the differences and uncertainty regarding those aspects. An impressive range of experts reflect on the law and policy of the NSA-Affair, documenting its fundamentally transnational dimension, which is the real location of the transatlantic dialogue on privacy and intelligence gathering. The conclusive chapters explain the dramatic transatlantic

differences that emerged from the NSA-Affair with a collection of comparative cultural commentary.

Security in Cyberspace Jul 02 2020 Today, the Internet has become a source of information that no country or company can forgo. It is not only used to communicate or entertain, but most importantly to operate utilities and public services such as banking or air traffic. As the reliance on computer networks across societies and economies keeps growing, so do security risks in cyberspace - referred to as "cybersecurity." Cybersecurity means protecting information and control systems from those who seek to compromise them. It also involves actors, both malicious or protective, policies and their societal consequences. This collection of essays provides a better understanding of the risks, perceptions, and myths that surround cybersecurity by looking at it from three different levels of analysis: the sovereign state, the infrastructure and stakeholders of the Internet, and the individual. The essays explore such issues as information ownership, censorship, cyberwars, cyberterrorism, privacy, and rebellion, bringing together expert knowledge from computer science and the social sciences with case studies. It reviews existing policies and practices and discusses the threats and benefits of living in an increasingly networked world. This authoritative analysis of one of the most controversial and compelling security debates of the twenty-first century will appeal to scholars and practitioners interested in security, international relations and policymaking.

Jihadism Revisited Dec 19 2021 Studying Jihadism is an endeavor facing several problems. For many researchers and the reading public it is difficult to accept that Jihadists do have a theology of their own and not some kind of ideology. Understanding that a phenomenon of communication that is done to a large extent in Arabic is not to be understood if research is done communication translated into or written in English. Saying it is all out there in the Internet without understanding Internet communication will help to understand terrorist phenomena like Jihadism. Ignoring that there is Jihadism IS and al-Qa'ida will guarantee that research will not be able to see the broad range of Jihadism. Last but not least, research not interested in the technologies, practices, etc., Jihadists use to commit terrorist attacks, cannot claim to study Jihadism. The contributions in this book provide knowledge in all these fields: based on Arabic language sources, theological aspects, Internet communication, groups usually ignored, the role of infographics, technical aspects, and covert and intelligence actions.

Journalism and the Nsa Revelations May 24 2022 Edward Snowden's revelations about the mass surveillance capabilities of the US National Security Agency (NSA) and other security services triggered an ongoing debate about the relationship between privacy and security in the digital world. This discussion has been dispersed into a number of national platforms, reflecting local political realities but also raising questions that cut across national public spheres. What does this debate tell us about the role of journalism in making sense of global events? This book looks at discussions of these debates in the mainstream media in the USA, United Kingdom, France, Germany, Russia and China. The chapters focus on editorials, commentaries and op-eds and look at how opinion-based journalism has negotiated key questions on the legitimacy of surveillance and its implications to security and privacy. The authors provide a thoughtful analysis of the possibilities and limits of 'transnational journalism' at a crucial time of political and digital change.

Freedom of Information and National Security Jun 13 2021 Protecting sensitive national security information is among a government's most significant duties. However, this concept may be used to adversely limit the public's right to access to government-held information. Therefore, striking a reasonable balance between these competing interests is of great importance for any society. How important to the creation of such a balance is effective judicial review of government decisions denying public access to information on national security grounds? How should judicial review of these decisions be conducted? "Freedom of Information and National Security: A Study of Judicial Review under U.S. Law" seeks to answer these questions. It offers proposals for the improvement of judicial review of public bodies' decisions in the U.S. and provides suggestions for conducting effective judicial review in other countries.

Understanding Lone Actor Terrorism Mar 30 2020 This volume examines the lone actor terrorist phenomenon, including the larger societal trends which may or may not have led to their acts of terrorism. With lone actor terrorism becoming an increasingly common threat, the contributors to this volume aim to answer the following questions: What drives the actions of individuals who become lone actor terrorists? Are ideological and cultural issues key factors, or are personal psychological motives more useful in assessing the threat? Do lone actors evolve in a broader social context or are they primarily fixated loners? What response strategies are available to security services and law enforcement? What is the future outlook for this particular terrorist threat? Although these issues are frequently discussed, few books have taken a global perspective as their primary focus. While many books focus on lone actor terrorists in relation to terrorist groups, such as Al-Qaida and the Islamic State, few, if any, cover lone actors of all ideological backgrounds, including the variants of active shooters and malicious insiders in information security, such as Edward Snowden – with both of these latter categories constituting an important variant of lone actors. Utilising the expertise of academics and practitioners, the volume offers a valuable multidisciplinary perspective. This book will be of much interest to students of terrorism and counter-terrorism, political violence, criminology, security studies and IR.

The New International Telecommunication Regulations and the Internet Nov 18 2021 This book provides a clear and thorough account of the process leading up to the revision of the International Telecommunication Regulations (ITRs) one of

the four treaties administered by the ITU. The author's inside view of the events and his legal analysis of the new ITRs, are different from that what has been aired in most other accounts to date. His systematic approach shows how much of the criticism of the WCIT-12 process and of the ITRs themselves, is unjustified. This book provides the most accurate view to date of what the ITRs really mean and of what really happened at WCIT-12, which was undoubtedly a key event in the history of telecommunication policy and which is likely to have significant long-term effects. The book covers in some detail the events leading to the non-signature of the treaty by a significant number of states, outlines possible consequences of that split between states, and offers possible ways forward. The book includes a detailed article-by-article analysis of the new ITRs, explaining their implications and concludes with recommendations for national authorities. It concludes with an analysis of events from the point of view of dispute resolution theory, offering suggestions for how to avoid divisive outcomes in the future. "This is an excellent book, and quite rich and comprehensive. The topic is important and the book will surely be of interest to regulators, diplomats, policy experts, and all those who participated in WCIT. The author is uniquely qualified to write an analysis of the new ITRs and an account of the Conference. This book will be a good reference for the next Plenipotentiary Conference to be held in 2014 which is going to discuss follow-up to WCIT-12." Naser al-Rashedi, United Arab Emirates. "This is an authoritative expert account of a moment of high significance for vital issues with respect to international networks." Professor Dan Schiller, University of Illinois. "This is an excellent and timely work." Professor Ian Walden, Queen Mary, University of London. "Interested persons, businesses and governments can draw their policies from the assessments of a telecommunications insider as presented in this book. The manifold arguments enlightening the interpretation of the provisions of the ITRs might become an invaluable guidance for those who apply the ITRs in the future." Professor Dr. Rolf H. Weber, University of Zurich.

Cyber Policy in China Aug 15 2021 Few doubt that China wants to be a major economic and military power on the world stage. To achieve this ambitious goal, however, the PRC leadership knows that China must first become an advanced information-based society. But does China have what it takes to get there? Are its leaders prepared to make the tough choices required to secure China's cyber future? Or is there a fundamental mismatch between China's cyber ambitions and the policies pursued by the CCP until now? This book offers the first comprehensive analysis of China's information society. It explores the key practical challenges facing Chinese politicians as they try to marry the development of modern information and communications technology with old ways of governing their people and conducting international relations. Fundamental realities of the information age, not least its globalizing character, are forcing the pace of technological change in China and are not fully compatible with the old PRC ethics of stability, national industrial strength and sovereignty. What happens to China in future decades will depend on the ethical choices its leaders are willing to make today. The stakes are high. But if China's ruling party does not adapt more aggressively to the defining realities of power and social organization in the information age, the 'China dream' looks unlikely to become a reality.

Critical Debates on Counter-Terrorism Judicial Review May 12 2021 An examination of the debates regarding whether judicial review is an effective and appropriate way to regulate counter-terrorism measures.

Exposed Apr 11 2021 Exploiting our boundless desire to access everything all the time, digital technology is breaking down whatever boundaries still exist between the state, the market, and the private realm. Bernard Harcourt offers a powerful critique of what he calls the expository society, revealing just how unfree we are becoming and how little we seem to care.

Ethical Issues and Citizen Rights in the Era of Digital Government Surveillance Jun 01 2020 Questions surrounding the concept of freedom versus security have intensified in recent years due to the rise of new technologies. The increased governmental use of technology for data collection now poses a threat to citizens' privacy and is drawing new ethical concerns. *Ethical Issues and Citizen Rights in the Era of Digital Government Surveillance* focuses on the risks presented by the usage of surveillance technology in the virtual public sphere and how such practices have called for a re-examination of what limits should be imposed. Highlighting international perspectives and theoretical frameworks relating to privacy concerns, this book is a pivotal reference source for researchers, professionals, and upper-level students within the e-governance realm.

America's Covert War in East Africa Jul 26 2022 Clara Usiskin has spent eight years investigating the "War on Terror" and its effects in the East and Horn of Africa, documenting hundreds of cases of rendition, secret detention and targeted killings. As a result of her work exposing abuses carried out by regional governments and their international partners, Clara was deported from Kenya and Uganda and is currently persona non grata in both countries. Her book sets out the historical background to today's covert war, including the early Somali jihads and British repression in colonial Kenya, through to the 1998 US Embassy Bombings in Nairobi and Dar es Salaam, and President Clinton's early rendition programme. *America's Covert War in East Africa* then looks at the US Military's new Africa Command, with its emphasis on counterterrorism, alongside increasing use of targeted killings by security forces in the region, and continued renditions and secret detention. Finally, Usiskin investigates the shorter and longer term consequences of such intensive militarisation, and the proliferation of surveillance and other technologies of control in East Africa and its surrounding waters, focussing in particular on their impact on vulnerable ethnic and religious groups in a highly volatile region.

Political Manipulation and Weapons of Mass Destruction Oct 29 2022 Concerns about CBRN (Chemical, Biological, Radioactive, Nuclear) weapons have featured prominently in both political debates and media reporting about the ongoing threat from al Qaeda since 9/11. This book provides a chronological account of al Qaeda's efforts to acquire a CBRN weapon capability, and the evolution of the al Qaeda leadership's approach to actually using CBRN weapons, set against the context of the politicisation of the threat of CBRN terrorism in US security debates. Ben Cole explores how the inherently political nature of terrorist CBRN threats has helped to shape al Qaeda's approach to CBRN weapons, and shows how the heightened political sensitivities surrounding the threat have enabled some governments to manipulate it in order to generate domestic and international support for controversial policies, particularly the 2003 invasion of Iraq. He assesses the relative success of the al Qaeda leadership's political approach to CBRN weapons, together with the relative success of efforts by the US, UK and Russian governments to exploit the al Qaeda CBRN threat for their wider political purposes. Shedding new light on al Qaeda's tactics and strategy, this book will be essential reading for scholars of terrorism and extremism studies.

Information Privacy Law Sep 04 2020 The Seventh Edition of Information Privacy Law has been revised to include the California Consumer Privacy Act, the GDPR, Carpenter, state biometric data laws, and many other new developments. A clear, comprehensive, and cutting-edge introduction to the field of information privacy law, Information Privacy Law contains the latest cases and materials exploring issues of emerging technology and information privacy, and the extensive background information and authorial guidance provide clear and concise introductions to various areas of law. New to the Seventh Edition: Additional Coverage or updates to: California Consumer Privacy Act Carpenter v. United States General Data Protection Regulation State biometric data laws New FTC enforcement actions, including Facebook Professors and students will benefit from: Extensive coverage of FTC privacy enforcement, HIPAA and HHS enforcement, standing in privacy lawsuits, among other topics. Chapters devoted exclusively to data security, national security, employment privacy, and education privacy. Sections on government surveillance and freedom to explore ideas. Extensive coverage of the NSA and the Snowden revelations and the ensuing regulation. Engaging approach to complicated laws and regulations such as HIPAA, FCRA, ECPA, GDPR, and CCPA.

Surveillance in Europe Sep 28 2022 Surveillance in Europe is an accessible, definitive and comprehensive overview of the rapidly growing multi-disciplinary field of surveillance studies in Europe. Written by experts in the field, including leading scholars, the Companion's clear and up to date style will appeal to a wide range of scholars and students in the social sciences, arts and humanities. This book makes the case for greater resilience in European society in the face of the growing pervasiveness of surveillance. It examines surveillance in Europe from several different perspectives, including: the co-evolution of surveillance technologies and practices the surveillance industry in Europe the instrumentality of surveillance for preventing and detecting crime and terrorism social and economic costs impacts of surveillance on civil liberties resilience in Europe's surveillance society. the consequences and impacts for Europe of the Snowden revelations findings and recommendations regarding surveillance in Europe Surveillance in Europe's interdisciplinary approach and accessible content makes it an ideal companion to academics, policy-makers and civil society organisations alike, as well as appealing to top level undergraduates and postgraduates.

Time, Progress, Growth and Technology Aug 03 2020 This book addresses the current challenges of sustainable development, including its social, economic and environmental components. The author argues that we need to develop a new concept of time based on inter-generational solidarity, which focuses both on the long- and the short term. The evolution of man's notions of time are analyzed from prehistory to modern times, showing how these concepts shape our worldviews, our ecological paradigms and our equilibrium with our planet. Practical approaches to dealing with the major medium- and long term sustainability challenges of the 21st century are presented and discussed. This is a thought provoking and timely book that addresses the main global socioeconomic and environmental challenges facing the current and future generations, using science-based analysis and perspectives. It presents an historical narrative of the advent of progress, economic growth and technology, and discusses the structural changes needed to co-create sustainable pathways. It provides hope for our future on Earth, mankind's common home. António Guterres, Secretary-General of the United Nations This is an amazing, almost mind-boggling book. The author takes a look at the true whole, i.e., the development of the human enterprise since its very beginning. This enterprise is evidently a possibility under the boundary conditions of cosmological dynamics and natural evolution, but evidently also a highly improbable one. It is all but a miracle that the Earth system in its present form exists and happens to support a technical civilization. Will this civilization last long, will it transform itself into something even more exceptional, or will it perish in disgrace? Santos dares to address these grandest of all questions, equipped with a unique transdisciplinary wisdom drawing on physics, cybernetics, geology, biology, economics, anthropology, history, and philosophy. And he dares to dive into the deepest abysses of thinking, where categorial monsters like time and progress lurk. Thereby, he takes us on fascinating journey, during which we perceive and grasp things we have never seen and understood before. One of the best essays I have ever read. John Schellnhuber, founding director of the Potsdam Institute for Climate Impact Research (PIK) and former chair of the German Advisory Council on Global Change

Intelligence Elites and Public Accountability Aug 27 2022 This book provides a definitive overview of the relationships of

influence between civil society and intelligence elites. The secrecy surrounding intelligence means that publication of intelligence is highly restricted, barring occasional whistle-blowing and sanitised official leaks. These characteristics mean that intelligence, if publicised, can be highly manipulated by intelligence elites, while civil society's ability to assess and verify claims is compromised by absence of independent evidence. There are few studies on the relationship between civil society and intelligence elites, which makes it hard to form robust assessments or practical recommendations regarding public oversight of intelligence elites. Addressing that lacuna, this book analyses two case studies of global political significance. The intelligence practices they focus on (contemporary mass surveillance and Bush-era torture-intelligence policies) have been presented as vital in fighting the 'Global War on Terror', enmeshing governments of scores of nation-states, while challenging internationally established human rights to privacy and to freedom from torture and enforced disappearance. The book aims to synthesise what is known on relationships of influence between civil society and intelligence elites. It moves away from disciplinary silos, to make original recommendations for how a variety of academic disciplines most likely to study the relationship between civil society and intelligence elites (international relations, history, journalism and media) could productively cross-fertilise. Finally, it aims to create a practical benchmark to enable civil society to better hold intelligence elites publicly accountable. This book will be of great interest to students of intelligence studies, surveillance, media, journalism, civil society, democracy and IR in general.

American Foreign Policy Sep 23 2019 Glenn Hastedt's clear and succinct introduction to the field prepares students to think about America's changing role in the world and to develop the critical thinking skills needed to participate in the debate about the conduct and content of American foreign policy. He begins by asking "What do we mean by foreign policy and what is the national interest?" Next, Hastedt looks to the past and examines the defining experiences that have helped to shape American foreign policy today. Third, he looks at how American foreign policy is made in the current hyperpartisan political climate. Here Hastedt examines the various institutions and how they come together to make policy, as well as the policy instruments available to decision makers. And finally, he encourages students to wonder, "What's next?" The eleventh edition reflects the latest headlines, including more extensive discussions of hybrid warfare, cyber wars, drones, and an assessment of Obama's foreign policy. There are new case studies on ISIS, authorization of force resolutions, women in combat, the climate agreement, the Iran nuclear agreement, Obama's opening to Cuba, and the future of COIN. And new Historical Lessons boxes feature the War Powers Act, the integration of the military, the Kyoto Agreement, NAFTA, and Afghanistan. This book is accompanied by a learning package designed to enhance the experience of both instructors and students: Test Bank. The Test Bank includes a variety of test questions and is available in either Word, PDF or Respondus formats. For every chapter in the text, the Test Bank includes a complete test with a variety of question types, including multiple choice, true false, and essay formats. Our Test Bank is most flexibly used in Respondus, test authoring software which is available in two forms. Check with your university to see if you have a site license to the full program, Respondus 4.0, which offers the option to upload your tests to any of the most popular course management systems such as Blackboard. If you don't have a Respondus license or do not care about having your tests in a course management system, you can use our test bank file in Respondus LE. The LE program is free and can be used to automate the process of creating tests in print format. • Visit the Respondus Test Bank Network to download the test bank for either Respondus 4.0 or Respondus LE. • If you prefer to use our Test Bank in Word or PDF, please Sign-In if you are a registered user, or Register then email us at textbooks@rowman.com. Companion Website. Accompanying the text is an open-access Companion Website designed to reinforce the main topics. For each chapter, flash cards and self-study quizzes help students master the information they learn in the classroom. Students can access the Companion Website from their computer or mobile device at textbooks.rowman.com/hastedt11e.
