Chemiluminescence in Analytical Chemistry Aug 24 2019 This volume details the theories, mechanisms, technologies and trends for solving qualitative and quantitative problems in diverse areas of analytical research - emphasizing physicochemical principles. It focuses on deriving simpler and more extensive chemiluminescence (CL) detectors reflecting miniaturization trends, including narrow-bore and capillary liquid chromatography versus high-performance liquid chromatography and miniaturized high-performance thin-layer chromatography. It also covers the sensitivity, selectivity, wide detection range and versatility of CL-based methodologies.

Atlas of Uterine Pathology May 02 2020 This Atlas of Uterine Pathology is comprehensive overview of the major pathologic processes that may be encountered in the uterine corpus and cervix. Each section is lavishly illustrated and covers normal histology as well as neoplastic and non-neoplastic diseases. Emphasis is placed on presenting the full morphologic and immunophenotypic spectrum of entities, including classical and variant pathology, in a manner that maximizes the utility of the information in routine diagnostic practice.

Immunology of the Female Genital Tract Jan 10 2021 This book systematically reviews and discusses recent studies and articles on the immunology of female genital tract tissue. The scope is broad, encompassing innate immune responses, adaptive (humoral and cell-mediated) immunity, the immunology of menstruation, the immunology of viral and bacterial infections, the immunology of normal and abnormal pregnancy, and immunological infertility. Throughout, tables and illustrations are judiciously used to facilitate understanding. Immunology of the Female Genital Tract will serve as an invaluable source of up-to-date information for all with an interest in this subject.

Chemicals from Microalgae Mar 12 2021 The production of chemicals from microalgae is becoming a significant area of biological research. Chemicals from Microalgae seeks to cover the various aspects that relate to the use of microalgae as a source of chemicals. The chapters discuss the occurrence and physiological role of these chemicals and concentrates on the methods aimed at enhancing their content, as well as large-scale algal biomass production and down-stream processing. This work, written by one of the true pioneers in the field describes the major algal chemicals of interest, namely pigments and lipids.

On Turner's Trail Aug 17 2021 "From a master historian, this is one of the most important contributions in recent years to American historiography. It adds to a penetrating analysis of the development of Turner's thought a searching consideration of the influence of his ideas, an investigation of the advocacy and criticism that they have sparked, and an estimate of their enduring importance. Handsomely produced and illustrated". -- Choice.

Between Pagan and Christian Aug 05 2020 Who and what was pagan depended on the outlook of the observer, as Christopher Jones shows in this fresh and penetrating analysis. Treating paganism as a historical construct rather than a fixed entity, Between Christian and Pagan uncovers the fluid ideas, rituals, and beliefs that Christians and pagans shared in Late Antiquity.

STATS Baseball Scoreboard, 1994 May 26 2022 "One of the undiscovered annual treasures of the American Sports Library" (Bill James), this unique book provides punchy analysis, state-of-the-art statistics, and easy-to-follow charts by John Grimwade of Sports Illustrated.

Gender, Violence, and Human Security Oct 31 2022 The nature of human security is changing globally: interstate conflict and even intrastate conflict may be diminishing worldwide, yet threats to individuals and communities persist. Large-scale violence by formal and informal armed forces intersects with interpersonal and domestic forms of violence in mutually reinforcing ways. *Gender, Violence, and Human Security* takes a critical look at notions of human security and violence through a feminist lens, drawing on both theoretical perspectives and empirical examinations through case studies from a variety of contexts around the globe. This fascinating volume goes beyond existing feminist international relations engagements with security studies to identify not only limitations of the human security approach, but also possible synergies between feminist and human security approaches. Noted scholars Aili Mari Tripp, Myra Marx Ferree, and Christina Ewig, along with their distinguished group of contributors, analyze specific case studies from around the globe, ranging from post-conflict security in Croatia to the relationship between state policy and gender-based crime in the United States. Shifting the focus of the term "human security" from its defensive emphasis to a more proactive notion of peace, the book ultimately calls for addressing the structural issues that give rise to violence. A hard-hitting critique of the ways in which global inequalities are often overlooked by human security theorists, *Gender, Violence, and Human Security* presents a much-needed intervention into the study of power relations throughout the world.

Analysis of Cosmetic Products Jul 28 2022 *Analysis of Cosmetic Products* advises the reader from an analytical chemistry perspective on the choice of suitable analytical methods for production monitoring and quality control of cosmetic products. In the format of an easy-to-understand compendium of published literature on the subject, this book will enable people working in the cosmetic industry or in research laboratories to: * become familiar with the main legislative and analytical literature on this subject and * learn about and choose suitable analytical procedures for production monitoring and control of cosmetic products, according to their composition. The first section of *Analysis of Cosmetic Products* covers various definitions and concepts relating to cosmetic products, current legislation in different countries and specific legislation on ingredients. The central body of the book addresses analytical methods for monitoring and quality control of cosmetic products with the fundamental objective being to enable reader's access to scientific reviews carried out by experts in analytical chemistry. The final section contains a small review of the alternative methods to using animals for cosmetic product evaluation. * An essential resource for those in the cosmetic industry and research laboratories, allowing you to become familiar with the main analytical literature * Up-to-date and exhaustive overviews of current knowledge dealing with cosmetic analysis, general concepts and legislation * Including tables and figures, designed to graphically communicate important information in an easy-to-understand format

Red Prometheus Dec 09 2020 This analysis of the relationship between science and totalitarian rule in one of the most technically advanced countries in the East bloc examines professional autonomy under dictatorship and the place of technology in Communist ideology. In Cold War-era East Germany, the German tradition of science-based technology merged with a socialist system that made technological progress central to its ideology. Technology became an important part of East German socialist identity--crucial to how Communists saw their system and how

citizens saw their state. In *Red Prometheus*, Dolores Augustine examines the relationship between a dictatorial system and the scientific and engineering communities in East Germany from the end of the Second World War through the 1980s. Drawing on newly opened archives and extensive interviews, Augustine looks in detail at individual scientists' interactions with the East German system, examining the effectiveness of their resistance against the party's totalitarian impulses. She explains why many German scientists and engineers who were deported to the Soviet Union after World War II returned to East Germany rather than defecting to the capitalist West, traces scientists' attempts to hold on to some aspects of professional autonomy, and describes challenges to their professional identity on the factory floor. Augustine examines the quality of science and technology produced under Communist rule, looking at failed research projects and clashing cultures of innovation. She looks at technological myth-building in science fiction and propaganda. She explores individual career strategies, including the role played by gender in high-tech professions, and the ways that both enterprises and individuals responded to increasing state and party control of research during the 1980s. We cannot understand the economic choices made by East Germany, Augustine argues, unless we understand the cultural values reflected in the East German belief in technology as indispensable to progress and industrial development.

The Forerunners Nov 27 2019 *The Forerunners* offers the first detailed history of the immigration of Dutch Jews to the United States and to the whole American diaspora. Robert Swierenga describes the life of Jews in Holland during the Napoleonic era and examines the factors that caused them to emigrate, first to the major eastern seaboard cities of the United States, then to the frontier cities of the Midwest, and finally to San Francisco. He provides a detailed look at life among the Dutch Jews in Boston, New York, Philadelphia, Baltimore, and New Orleans. Swierenga gathered materials from published local community histories, Jewish archival records and periodicals, synagogue records, and particularly, the Federal Population Census manuscripts from 1820 through 1900. He details the contributions and the leadership provided by the Dutch Jews and relates how they lost their "Dutchness" and their Orthodoxy within several generations of their arrival here and were absorbed into broader American Judaism.
