[Farbatlas der Histopathologie](#) Feb 08 2021 Es ist nicht immer einfach, einen Neuling in die Grundlagen der pathologischen Histologie einzuführen. Im deutschen Studienplan ist zu diesem Zweck ein eigenes Praktikum vorgesehen, bei dem der Student mit dem Objekt, dem histologischen Präparat, unmittelbar in Berührung kommt. Leider ist es heute, da Semesterkurse mit 150 bis 200 Hörern an der Tagesordnung sind, nicht mehr möglich, den Studierenden eine eigene Präparatesammlung in die Hand zu geben: Wollte man nämlich jedem Studierenden bloß 150 Präparate mitgeben, so würde das pro Jahr die Herstellung von 2 x 200 X 150, das heißt 60000 Präparaten bedeuten. Dazu fehlt heute Zeit, Geld und vor allem Personal. Außerdem weiß man aus Erfahrung, daß diese Präparate zwar nach der Ablegung des Exams fein säuberlich aufgehoben, aber kaum je mehr angesehen werden - ich selbst schließe mich bei dieser Feststellung nicht aus. Trotzdem wäre es aber gut, wenn jene charakteristischen histologischen Bilder, deren Grundzüge der Studierende im Praktikum kennengelernt hat, auch weiter vor seinem geistigen Auge lebendig blieben und sich evtl. nach den Bedürfnissen des Tages erweiterten und vermehrten. Hier kann nun das vorliegende Werk einspringen, indem es Erinnerungen wachhält und in der einmal erlernten Sprache der pathologischen Histologie neue Bilder beibringt und erläutert. Kein Buch, keine noch so naturgetreue Abbildung wird zwar jemals die Anschauung eines Präparates unter dem Mikroskop ersetzen können, aber unter allen den möglichen Behelfen erscheint der vorliegende Atlas als der beste Ersatz für das Präparat.
