<u>The Grammar of Knowledge</u> Aug 15 2021 The Grammar of Knowledge offers both a linguistic and anthropological perspective on the expression of information sources, as well as inferences, assumptions, probability and possibility, and gradations of doubt and beliefs in a range of languages. The book investigates twelve different languages, from families including Tibeto-Burman, Nakh-Dagestani, and Austronesian, all of which share the property of requiring the source of information to be specified in every sentence. In these languages, it may not be possible to say merely that 'the man went fishing'. Instead, the source of evidence for the statement must also be specified, usually through the use of evidential markers. For example, it may be necessary to indicate whether the speaker saw the man go fishing; has simply assumed that the man went fishing; or was told that he went fishing by a third party. Some languages, such as Hinuq and Tatar, distinguish between first-hand and non first-hand information sources; others, such as Ersu, mark three distinct types of information - directly required, inferred or

assumed, and reported. Some require an even greater level of specification: Ashéninka Perené, from South America, has a specific marker to express suspicions or misgivings. Like others in the series, the book illustrates and examines these aspects of language in different cultural and linguistic settings. It will interest linguists of all persuasions as well as linguistically-minded anthropologists.

Foundations of English Grammar Apr 11 2021 As its subtitle puts it, Foundations of English grammar is intended for university students and advanced learners. Thus it positions itself between grammars for the general public, which must shy away from calling on linguistic concepts, and major scholarly descriptions of English, which are definitely beyond the grasp of someone without previous linguistic knowledge. Foundations does not presuppose that: it explains all the linguistic concepts it uses. But since it is primarily intended for university students, these concepts are fairly sophisticated, and they come from a wide range of linguistic schools. Foundations is neither a contrastive grammar (systematically comparing English with Dutch) nor a normative one (though it will signal disputed usages that are current). It is a descriptive grammar of modern, living English, concentrating on British English, with brief discussions of important American English features. In this sixth edition, eight chapters have been revised, some very extensively: roughly, those on the noun phrase, on verbal complementation, and on the complex sentence.New grammatical concepts have been introduced and others have been defined more sharply, most obviously in chapter zero, which explains the basic framework, but elsewhere as well. When possible, explanations have been simplified, when necessary, they have been made more precise. Recent changes in the English language have been

accounted for, in grammar as well as in usage. A noticeable change in all revised chapters is that the examples, many of which had to be made up in the pre-computer age, are now all real-life examples, culled mainly from the world-wide web. Though conceived first and foremost as a textbook, Foundations has always been and remains eminently serviceable as a reference grammar, thanks to its detailed tables of contents (each chapter has its own), its extensive index and its many cross references.

Grammar in Action Aug 03 2020 Grammar in Action is a new workbook series designed for students in the first three years of secondary school. It will help them to learn, understand and put into practice the skills needed to provide a strong foundation for their language and writing development. Each book contains twenty units. In each unit, each aspect of grammar is covered in two parts: In Focus - this double-page spread teaches students about grammar, punctuation and writing skills in the traditional way. A concise explanation is provided, followed with examples of usage and a series of graded exercises. In Context - this double-page spread explores a particular grammar point in the context of a piece of writing. This allows students to see how grammar functions in context and encourages them to reflect on how it helps to enhance and shape the writing. Finally, students use what they have learned by applying it to their own writing. A range of creative suggestions and writing tasks is provided.

A Higher Sanskrit Grammar, for the Use of Schools and Colleges Jan 20 2022 The present grammar has been prepared with a view to meet the growing educational need of university students. The author has done his best to bring the present grammar up to the requirements of the students. In writing the various chapters of this book, the author has closely followed Pannini, as

explained by Bhattoji Diksita. Many of the rules given here are translations of the relevant Sutras of Panini. The original Sutras are given in footnotes, where necessary. Sandhis and declensions are fully treated; compounds which dominate classical Sanskrit literature have received special attention; formation of feminine bases has been illustrated; Taddhita affixes have been arranged in an alphabetical order. A special feature of the present grammar is the chapter on the Conjugation of Verbs. The general rules given are amply illustrated by examples. All the verbs which change their pada when preceded by particular prepositions are given in an alphabetical order. The chapter on Syntax contains almost everything given in the first 20 chapters of author's Guide to Sanskrit Composition; the chapter on Prosody is based on the Chandomanjari and the Vrttaratnakara. The author has spared no pains to make the book as useful and as complete as possible.

Grammar and the Advanced Learner Aug 23 2019 How do we learn a second language? Is it necessary to study grammar or is it enough just to be exposed to and use the language we want to learn? Is the learning of a second language similar to or fundamentally different from first language learning? These questions are dealt with in Grammar and the Advanced Learner. The purpose of the book is to find out whether the old question of the usefulness of grammar study can be answered by current theories and research results in the field of second language acquisition. A study of a group of Swedish university students of English forms the basis of the discussion. Most research concerns earlier stages of learning and it is therefore interesting to consider the problems of advanced learners to whom some of the generally accepted theories may not be applicable. Not only the learning process but also teaching methods have received the attention of theorists and researchers. Some of their research on methods and their proposals for teaching grammar are presented and discussed. Can linguists supply answers to the questions that

teachers are confronted with in their classrooms? Grammar and the Advanced Learner places the advanced learner in focus but it also deals with second language acquisition theories and research from a general perspective. It should therefore be of interest not only to teachers of advanced learners but also to those who teach at earlier stages, and to adult learners of foreign languages who are curious about their own learning process.

The Grammar of Possession Feb 09 2021 The Grammar of Possession: Inalienability, incorporation and possessor ascension in Guaraní, is an exhaustive study of linguistic structures in Paraguayan Guaraní which are directly or indirectly associated with the semantic domain of inalienability. Constructions analyzed in the book include adnominal and predicative possessive constructions, noun incorporation, and possessor ascension. Examples are drawn from a rich data base that incorporate native speaker intuitions and resources in the construction of illustrative linguistic forms as well as the analysis of the communicative use of the forms under study. The book provides a complete picture of inalienability as a coherent integrated system of grammatical and semantic oppositions in a language that has received little attention in the theoretical linguistic literature. The analysis moves from general principles to specific details of the language while applying principles of Cognitive Grammar and Functional Linguistics. There is an explicit aim to uncover the particularities of form-meaning connections, as well as the communicative and discourse functions of the structures examined. Other approaches are also considered when appropriate, resulting in a theoretically informed study that contains a rich variety of considerations.

Now the Killgallons present a much anticipated sentence-composing grammar worktext for college writing. GRAMMAR FOR COLLEGE WRITING: A Sentence-Composing Approach presents a new and easier way to understand grammar: NOUN GROUP: The Naming Tools VERB GROUP: The Narrating Tools ADJECTIVE GROUP: The Describing Tools ADVERB GROUP: The Explaining Tools Within each group, using model sentences by authors, students learn and practice words, phrases, and clauses that share the group's function. Each tool is introduced with a clear definition and characteristics; practiced through six varied sentence-composing activities; then applied in an academic or creative composition that spotlights the tool. The Grammar of Causation and Interpersonal Manipulation Jul 02 2020 This volume presents fifteen original papers dealing with various aspects of causative constructions ranging from morphology to semantics with emphasis on language data from Central and South America. Informed by a better understanding of how different constructions are positioned both synchronically (e.g., on a semantic map) and diachronically (e.g., through grammaticalization processes), the volume affords a comprehensive up-to-date perspective on the perennial issues in the grammar of causation such as the distribution of competing causative morphemes, the meaning distinctions among them, and the overall form-meaning correlation. Morphosyntactic interactions of causatives with other phenomena such as incorporation and applicativization receive focused attention as such basic issues as the semantic distinction between direct and indirect causation and the typology of causative constructions.

A Grammar of Gaagudju Jun 01 2020 Gaagudju is a previously undescribed and now nearly extinct language of northern Australia. This grammar provides an overall description of the language. Australian languages generally show a high degree of structural similarity to one another. Gaagudju conforms to some of the common Australian patterns, yet diverges significantly from others. Thus while it has a standard Australian phonological inventory, its prosodic systems differ from those of most Australian languages, with stressed and unstressed syllables showing marked differences in realisation. Like many northern languages, it has complex systems of both prefixation and suffixation to nominals and verbs. Prefixation provides information about nominal classification (4 classes), mood, and pronominal cross-reference (Subjects, Objects, and Indirect Objects). Suffixation provides information about case, tense, and aspect. As in many languages, there is a clear distinction between productive and unproductive morphology. Gaagudju differs from most Australian languages in that a considerable amount of its morphology is unproductive, showing complex and irregular allomorphic variation. Gaagudju is like most Australian languages in that it may be described as a free word order language.

However, word order is not totally free and strictly ordered phrasal compounding structures are significant (e.g. in the formation of denominal verbs).

Modality in Grammar and Discourse Mar 30 2020 This volume brings together a collection of 18 papers that look into the expression of modality in the grammars of natural languages, with an emphasis on its manifestations in naturally occurring discourse. Though the individual contributions reflect a diversity of languages, of synchronic and diachronic foci, and of theoretical orientations — all within the broad domain of functional linguistics — they nonetheless converge around a number of key issues: the relationship between 'mood' and 'modality'; the delineation of modal categories and their nomenclature; the grounding of modality in interactive discourse; the elusive category 'irrealis'; and the relationship of modal notions and categories to other categories of grammar.
