whole-brain fractionated radiation therapy in patients with solitary metastases. Multicenter studies, methods to evaluate our data, grading scales, and novel irradiation approaches, together with technological improvements, characterize the new drive in this direction and form an important part of this book. It provides a vital source of scientific information on radiobiology, vascular malformation radiosurgery, benign and malignant brain tumor radiosurgery, extracranial radiosurgery, technological developments in radiosurgery, complication avoidance, and economic issues. This book should be read by physicians and scientists interested in neurosurgery, radiation oncology, medical physics, neuroradiology, and neurology, in order to remain current with important developments in the field and their impact on the management of brain disease.

Handbook of Footwear Design and Manufacture

Feb 09 2021 Handbook of Footwear Design and Manufacture, Second Edition, is a fully updated,

expanded guide on the theories, processes, methodologies and technologies surrounding the footwear supply chain. Topics discussed include engineering design methodology, reducing manufacturing waste, footwear advertisement, emerging imaging technology, advice on the optimization of manufacturing processes for productivity, and summaries of the latest advances from researchers around the globe. This updated edition also includes coverage of sizing and grading based on different footwear styles and methods, AI based personalization and customization, emerging models for online footwear shopping (involving data mining), and new methods for foot data analysis and representation. Covers many exciting new developments, such as AR/VR, additive manufacturing, customization of footwear, new last design methods, and green footwear. Addresses the entire footwear design and manufacture supply chain. Explains new methods for foot data analysis and representation.

Grading for Equity Sep 28 2022 “Joe Feldman shows us how we can use grading to help students become the leaders of their own learning and lift the veil on how to succeed. . . . This must-have book will help teachers learn to implement improved, equity-focused grading for impact.” --Zaretta Hammond, Author of *Culturally Responsive Teaching & The Brain* Crack open the grading conversation Here at last—and none too soon—is a resource that delivers the research base, tools, and courage to tackle one of the most challenging and emotionally charged conversations in today’s schools: our inconsistent grading practices and the ways they can inadvertently perpetuate the achievement and opportunity gaps among our students. With *Grading for Equity*, Joe Feldman cuts to the core of the conversation, revealing how grading practices that are accurate, bias-resistant, and motivational will improve learning, minimize grade inflation, reduce failure rates, and become a lever for creating

stronger teacher-student relationships and more caring classrooms. Essential reading for schoolwide and individual book study or for student advocates, *Grading for Equity* provides A critical historical backdrop, describing how our inherited system of grading was originally set up as a sorting mechanism to provide or deny opportunity, control students, and endorse a “fixed mindset” about students’ academic potential—practices that are still in place a century later A summary of the research on motivation and equitable teaching and learning, establishing a rock-solid foundation and a “true north” orientation toward equitable grading practices Specific grading practices that are more equitable, along with teacher examples, strategies to solve common hiccups and concerns, and evidence of effectiveness Reflection tools for facilitating individual or group engagement and understanding As Joe writes, “Grading practices are a mirror not just for students, but for us as their teachers.” Each

one of us should start by asking, “What do my grading practices say about who I am and what I believe?” Then, let’s make the choice to do things differently . . . with *Grading for Equity* as a dog-eared reference.

Principles of Medical Education Dec 19 2021

Fundamentals of Diagnostic Radiology Jan 28 2020 This fully revised edition of *Fundamentals of Diagnostic Radiology* conveys the essential knowledge needed to understand the clinical application of imaging technologies. An ideal tool for all radiology residents and students, it covers all subspecialty areas and current imaging modalities as utilized in neuroradiology, chest, breast, abdominal, musculoskeletal imaging, ultrasound, pediatric imaging, interventional techniques and nuclear radiology. New and expanded topics in this edition include use of diffusion-weighted MR, new contrast agents, breast MR, and current guidelines for biopsy and intervention. for the innovative concept of Total Manufacturing Assurance (TMA) and the holistic means by which such assurance can be attained. In fulfilling this objective, this textbook discusses the management and engineering techniques and tools, required to achieve TMA. Using a holistic approach to manufacturing operations, Total Manufacturing Assurance: Controlling Product Quality, Reliability, and Safety, Second Edition focuses on analytics and performance assessment, along with Industry 4.0 and the role it plays in advanced manufacturing. The textbook covers strategic planning, innovation, and engineering economics, as well as the manufacturing process, materials, and operations. Product manufacturing system reliability, maintainability, availability, quality, and safety, along with financial issues in decision-making and engineering analysis, are all captured in this new edition. Students at undergraduate and graduate levels studying engineering

management, mechanical, industrial, and manufacturing engineering, as well as business students will find this new edition an invaluable instructional resource. At the same time, working professionals, including management, engineers, and others who are intimately involved in the manufacturing system sector will also find this textbook very useful in their day-to-day work. PowerPoint slides and a solutions manual are available to instructors for qualified course adoptions.

What If I'm Wrong? and Other Key Questions for Decisive School Leadership

Jun 20 2019 It can be difficult to think clearly and deeply when a decision must be made, especially for principals and other administrators barraged with information, questions, and demands on their time. When even the smallest mistake can negatively affect students and staff, strong decision-making skills are crucial. By focusing on key questions, however, school leaders can find a path through

the complex decisions they encounter every day. *What If I'm Wrong? and Other Key Questions for Decisive School Leadership* guides you past the pitfalls of split-second instinct, groupthink, prejudice, and the rush to judgment. Leadership coach and former principal Simon Rodberg pulls together true stories from his own experience, examples of a range of school issues, and the latest research in cognitive science into a five-question framework for school leaders to ask themselves when facing a decision: - What am I missing? - What's one small step? - Where's the trade-off? - Does it have to be this way? - What if I'm wrong? By prompting you to reflect on your own thought processes and cognitive blind spots, Rodberg's approach helps you build good habits of strategic decision making. Learn to navigate both tough dilemmas and everyday challenges as a decisive school leader.

guide introduces many proven models, strategies, examples, and methods to new generations of educators, emphasizing the essentials of good teaching.

Essential Orthopedics: Principles and Practice 2 Volumes Dec 27 2019 Essential Orthopedics: Principles & Practice is an extensive, illustrated guide to the field of orthopaedics. Principles and practice for shoulder, hip, spine, hand, foot and ankle are covered, including anatomy, physiology, pathology and diseases. Essential Orthopedics: Principles & Practice includes all modern research methodologies, such as biostatistics, advanced imaging and gene therapy. Enhanced by 2000 full colour illustrations this is a comprehensive resource for all interns, residents and orthopaedic surgeons.

Evaluation and Decision Models Aug 23 2019 1. 1 Motivations Deciding is a very complex and difficult task. Some people even argue that our ability to make decisions in complex situations is the main feature that distinguishes us from

animals (it is also common to say that laughing is the main difference). Nevertheless, when the task is too complex or the interests at stake are too important, it quite often happens that we do not know or we are not sure what to decide and, in many instances, we resort to a decision support technique: an informal one-we toss a coin, we ask an oracle, we visit an astrologer, we consult an expert, we think-or a formal one. Although informal decision support techniques can be of interest, in this book, we will focus on formal ones. Among the latter, we find some well-known decision support techniques: cost-benefit analysis, multiple criteria decision analysis, decision trees, . . . But there are many other ones, sometimes not presented as decision support techniques, that help making decisions. Let us cite but a few examples. • When the director of a school must decide whether a given student will pass or fail, he usually asks each teacher to assess the merits of the student by means of a grade. The director then sums the

grades and compares the result to a threshold. • When a bank must decide whether a given client will obtain a credit or not, a technique, called credit scoring, is often used.

Interdisciplinary Behavior and Social

Sciences Jan 08 2021 The human aspect plays an important role in the social sciences. The behavior of people has become a vital area of focus in the social sciences as well.

Interdisciplinary Behavior and Social Sciences contains papers that were originally presented at the 3rd International Congress on Interdisciplinary Behavior and Social Science 2014 (ICIBSoS 2014),

Governing through Standards: the Faceless

Masters of Higher Education Oct 05 2020 This book offers an empirical and theoretical account of the mode of governance that characterizes the Bologna Process. In addition, it shows how the reform materializes and is translated in everyday working life among professors and managers in higher education. It examines the so-called Open

Method of Coordination as a powerful actor that uses “soft governance” to advance transnational standards in higher education. The book shows how these standards no longer serve as tools for what were once human organizational, national or international, regulators. Instead, the standards have become regulators themselves – the faceless masters of higher education. By exploring this, the book reveals the close connections between the Bologna Process and the EU regarding regulative and monitoring techniques such as standardizations and comparisons, which are carried out through the Open Method of Coordination. It suggests that the Bologna Process works as a subtle means to circumvent the EU’s subsidiarity principle, making it possible to accomplish a European governance of higher education despite the fact that education falls outside EU’s legislative reach. The book’s research interest in translation processes, agency and power relations among policy actors positions it in

studies on policy transfer, policy borrowing and globalization. However, different from conventional approaches, this study draws on additional interpretive frameworks such as new materialism.

Fractures and Injuries of the Distal Radius and Carpus

Jun 01 2020 Recognized experts from around the world offer guidance on the treatment of distal radius fractures and carpal injuries. Practical and comprehensive, this user-friendly format features practical tips and potential pitfalls to optimize outcomes. The DVD contains videos of 44 techniques.

Teaching English Sep 23 2019 Teaching English covers all of the major issues and current trends in language learning and teaching, such as the trends toward empiricism, constructivism, differentiation, learner- and output-orientation, intercultural learning, and the use of multimedia. This book bridges the gap between the suggestions of theoretical approaches to foreign language teaching and the

practical needs of both the educators (regardless of the institutions they are teaching and the experiences they have gathered) as well as the students. It will help readers profit from the materials and reflected practices for use in their own classrooms. And lastly, the book offers optimal preparation for exams in university courses and in teacher-training seminars.

Statistics Using SPSS Sep 16 2021 Applied statistics text updated to be consistent with SPSS version 15, ideal for classroom use or self study.

Theory and Practice of Grading Writing, The Apr 23 2022 Explores grading strategies for English composition teachers that are consistent with modern discourse and pedagogical theories.

Tools for Teaching Mar 10 2021 This is the long-awaited update on the bestselling book that offers a practical, accessible reference manual for faculty in any discipline. This new edition contains up-to-date information on technology as well as expanding on the ideas and strategies

presented in the first edition. It includes more than sixty-one chapters designed to improve the teaching of beginning, mid-career, or senior faculty members. The topics cover both traditional tasks of teaching as well as broader concerns, such as diversity and inclusion in the classroom and technology in educational settings.

Hamric & Hanson's Advanced Practice Nursing - E-Book Aug 03 2020 Edited and written by a "Who's Who" of internationally known thought leaders in advanced practice nursing, Hamric and Hanson's Advanced Practice Nursing: An Integrative Approach, 7th Edition provides a clear, comprehensive, and contemporary introduction to advanced practice nursing today, addressing all major APRN competencies, roles, and issues. Thoroughly revised and updated, the 7th edition of this bestselling text covers topics ranging from the evolution of advanced practice nursing to evidence-based practice, leadership, ethical

Ohlmann's AN INTRODUCTION TO MANAGEMENT SCIENCE: QUANTITATIVE APPROACHES TO DECISION MAKING, 14E equips readers with a sound conceptual understanding of the role that management science plays in the decision-making process. The trusted market leader for more than two decades, the book uses a proven problem-scenario approach to introduce each quantitative technique within an applications setting. All data sets, applications, and screen visuals reflect the details of Excel 2013 to effectively prepare you to work with the latest spreadsheet tools.

Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version. *Therapeutic Management of Incontinence and Pelvic Pain* Jun 25 2022 This 2nd revised edition covers management and treatment of bladder and bowel dysfunctions in men and women, pelvic organ prolapse, issues concerning the elderly, neurologically impaired patients and

those with pelvic pain. New chapters cover quality of life, treatment of bladder and bowel dysfunction in children, the history of pelvic floor muscle exercise and manual therapy. The use of real-time ultrasound to evaluate pelvic floor muscle contractility is discussed, and a new section covers ethical issues in the management of incontinence. This is a useful reference and practical guide for health professionals dealing with incontinence and pelvic floor disorders.

Teaching of Art in Primary and Secondary Schools Feb 27 2020

Scouting and Scoring May 12 2021 An in-depth look at the intersection of judgment and statistics in baseball Scouting and scoring are considered fundamentally different ways of ascertaining value in baseball. Scouting seems to rely on experience and intuition, scoring on performance metrics and statistics. In Scouting and Scoring, Christopher Phillips rejects these simplistic divisions. He shows how both scouts and scorers rely on numbers, bureaucracy, trust,

and human labor to make sound judgments about the value of baseball players. Tracing baseball's story from the nineteenth century to today, Phillips explains that the sport was one of the earliest fields to introduce numerical analysis, and new methods of data collection were supposed to enable teams to replace scouting with scoring. But that's not how things turned out. From the invention of official scorers and Statcast to the creation of the Major League Scouting Bureau, Scouting and Scoring reveals the inextricable connections between human expertise and data science, and offers an entirely fresh understanding of baseball.

The Language of Ontology Aug 15 2021 Metaphysical and ontological debates, concerning what exists and the nature of reality, are perennial features of the philosophical landscape. However, some have argued that ontological debates are non-substantive, pointless, trivial, incoherent, or impossible. Debates about whether tables exist, for example,

or about the nature of reality, are taken to be in some way deficient. This has led to a burgeoning literature studying the nature of metaphysical and ontological disputes themselves. One major debate within this context concerns the language of ontology. The central question is whether the nature of language influences or limits our ability to engage productively in ontological disputes. While we typically think that our language describes the world, or at least can accurately describe the world, there have been many who have argued that the nature of language inherently influences and limits our attempts to understand the nature of reality—that our claims about what exists are, in fact, merely a reflection of how we happen to speak or think. *The Language of Ontology* collects chapters from established participants in the debate alongside new voices, to explore the range of issues relating to our ability or inability to get beyond the limits of our language.

The Bologna Reform in Ukraine Nov 18 2021 Through an in-depth examination of higher education actors and policy instruments in the case of the implementation of Bologna in Ukraine, this book aims to analyse the process of the Bologna reform in Ukraine and investigate Bologna as a case of Europeanisation in the post-Soviet context.

Liposuction Oct 25 2019 This superbly illustrated book covers all aspects of liposuction: anatomy, pathology, biochemistry, preoperative care, equipment, the full range of procedures, complications, postoperative care, outcomes, lipedema, and medical legal aspects. Compared with the successful first edition, the text has been extensively updated and many additional chapters included, with particular attention to recently introduced techniques. While new technology helps to improve results, experience, care, and skill on the part of the cosmetic surgeon are essential if optimal results satisfactory to the patient are to be achieved.

The contributors to this book have expended much time and effort to present the cosmetic and plastic surgeon with as much information as possible on the techniques and uses of liposuction for the purposes of cosmetic and non-cosmetic surgery. Liposuction: Principles and Practice will be of value for residents and fellows and for practicing and highly experienced surgeons in plastic surgery, cosmetic surgery, general surgery, and other subspecialties.

Die Munich Neuro Trauma Grading Scale MNTS
Jul 26 2022

Neurotrauma Dec 07 2020 Neurotrauma in Multiple Choice Questions is the FIRST review book to use the multiple-choice question format in neurosurgical trauma. Students of neurosurgery, the resident, the fellow, the younger neurosurgeon preparing for exams or practice, and even the later stage neurosurgeon are the target audience of this book. The information in this work is in accordance with

**Read Book Crct Grading Scale Free

the most up-to-date best practice evidence, with a style that mirrors the format adopted by the majority of local, regional, and international board examinations. The strategy and format of the questions provide a stepwise progression from definition to surgical decision-making, to a comprehensive and concise overview of neurological trauma.

Stroke, Part II: Clinical Manifestations and Pathogenesis Mar 22 2022 This volume

provides a comprehensive guide to the manifestations and pathogenesis involved with stroke, including advancements in research and a newfound understanding of the biochemical background of this cerebrovascular disorder. This intensive handbook is meant to give clinicians a source reference that will enable them to gain a thorough knowledge and understanding of the clinical features and management of the many neurological manifestations of stroke disorder. In addition, practitioners, clinicians, and researchers will

gain a better understanding of highly studied topics, including amongst others, the medical complications associated with stroke, chapters on anterior circulation and hemorrhagic stroke syndromes, stroke related psychiatric disorders, and other rare causes of stroke disorder.

Oxford Textbook of Neurological Surgery Jul 22 2019 Neurosurgery is a rapidly developing and technically demanding branch of surgery that requires a detailed knowledge of the basic neuro-sciences and a thorough clinical approach. The Oxford Textbook of Neurological Surgery is an up-to-date, objective and readable text that covers the full scope of neurosurgical practice. It is part of the Oxford Textbooks in Surgery series, edited by Professor Sir Peter Morris. The book is split into 20 overarching sections (Principles of Neurosurgery, Neuro-oncology of Intrinsic Tumours; Extra-axial Tumours and Skull Lesions; Cerebro-Pontine Angle Tumours; Sellar and Supra-Sellar Tumours; Posterior Fossa Tumours; Pineal tumours; Uncommon

Tumours and Tumour Syndromes; Neurotrauma and Intensive Care; Vascular Neurosurgery; Principles of Spinal Surgery; Spinal Pathology; Spinal Trauma; Peripheral Nerve Surgery; Functional Neurosurgery; Epilepsy; Paediatric Neurosurgery; Neurosurgery for Cerebrospinal Fluid Disorders and Neurosurgical Infection). Each section takes a dual approach with, 'Generic Surgical Management' chapters that focus on specific clinical problems facing the neurosurgeon (e.g. sellar/supra-sellar tumour, Intradural Spina Tumours etc.) and 'Pathology-Specific' chapters (e.g. Glioma, Meningeal Tumours, Scoliosis and Spinal Deformity, Aneurysm etc.). Where appropriate, this division provides the reader with easily accessible information for both clinical problems which present in a regional fashion and specific pathologies. The generic chapters cover aspects such as operative approaches, neuroanatomy and nuances. Specifically each chapter in the book incorporates several strands. Firstly the

fundamental neuroscience (anatomy, pathology, genetics etc.) that underlies the clinical practice. Secondly, a review of the requisite clinical investigations (e.g. angiography, electrodiagnostics, radiology). Thirdly, a thorough evidence based review of clinical practice. Following this a consideration of the key debates and controversies in the field with 'pro-' and 'con-' sections (e.g. minimally invasive spine surgery, microsurgical treatment of aneurysms) is provided. A summary of the key papers and clinical scales relevant to neurosurgery form the concluding part. The book is a 'one-stop' text for trainees and consultants in neurosurgery, residents, those preparing for sub-specialty exams and other professionals allied to surgery who need to gain an understanding of the field. It acts as both a point of reference to provide a focussed refresher for the experienced neurosurgeon as well as a trusted training resource.
