Uganda Nov 27 2019 This Technical Assistance Report discusses the findings and recommendations made by the IMF mission regarding monetary and foreign

exchange operations in Uganda, Bank of Uganda (BOU) recapitalization, and Bank of Uganda Act revision. The presence of sizable precautionary and involuntary reserves and excessive short-end volatility has weakened the transmission mechanism in Uganda. The key challenge remains to enhance monetary and fiscal policy coordination and to ensure that institutional and operational arrangements are robust and conducive to efficient monetary operations framework. The BOU should raise the effectiveness of the monetary and foreign exchange operations framework. To foster further market development there is need to anchor short-term interest rates by using various fine-tuning instruments to ensure improved operational efficiency and strengthen transmission of policy signals across the curve.

Chinese Capital Market Takeover and Restructuring Guide Jul 24 2019 Although several useful entry guides to China for business investors have appeared in recent years, this is the first book to focus on a business strategy that is becoming increasingly important – and attractive – to businesses in China: the takeover and restructuring of a listed company. This practice orientated book has an additional value, moreover, in that it fully takes into account not only the relevant regulations, most of which were promulgated or updated from 2005 to 2010, but also the actual structures and procedures of nearly ninety announced deals, right up to September 2010. In unprecedented details, the author, an experienced M&A lawyer, describes China specific takeover and restructuring cases involving foreign investors as well as state-owned shareholders on the Shanghai Stock Exchange, the Shenzhen Stock Exchange and 'ChiNext'. The presentation and analysis covers such elements as the following: the standard bids, such as tender offers, negotiated transfers, indirect takeovers and subscriptions for new shares; the special accesses available to a foreign investor such as qualifying as a 'strategic investor' or 'qualified foreign institutional investor' (QFII); the particular situations where 'state-owned shareholder' (SS) is involved or where a share exchange occurs, including where a foreign investor subscribes by injecting, or acquires indirectly via, its 'onshore foreign invested enterprise'; the basic restructuring approaches of a listed company – public offering and private placement; and the full meaning and significance of the 'substantial asset restructuring' (SAR), which may be asset purchases, disposals or swaps, or the SAR in special cases – merger or separation deals. The author's illustration of deal structures and step-by-step procedures, visualized in over 150 charts and checklists, gives the reader a clear

path to follow through what can seem like a forbiddingly difficult process – a path rendered more secure by the deal histories presented. For companies with operations in China, or considering such operations, as well as professionals advising on these companies, this book is a goldmine of crucially valuable information and guidance. There is nothing else available that comes close to its authority or expertise in this area.

An Evaluation of Proposals to Extend and Amend the Renegotiation Act of 1951
Oct 26 2019

Corporate Governance in Central Eastern Europe Jun 14 2021 Economic restructuring in Eastern Europe has added a new universe of firms to the pool of cases for study of managerial effectiveness. Yet, in the ideologically charged atmosphere of post-communist transitions, analysis of the functioning of East European firms is sometimes clouded by preoccupation with privatization issues -- whether ownership is held by banks, a state or public agency, foreign investors, or inside or outside shareholders. This volume focuses on the performance of firms as a measure of the effectiveness of corporate governance, and only then attempts to draw conclusions about the relative advantages of different ownership structures.
