Design, User Experience, and Usability. Practice and Case Studies Feb 21 2022 The four-volume set LNCS 11583, 11584, 11585, and 11586 constitutes the proceedings of the 8th International Conference on Design, User Experience, and Usability, DUXU 2019, held as part of the 21st International Conference, HCI International 2019, which took place in Orlando, FL, USA, in July 2019. The total of 1274 papers and 209 posters included in the 35 HCII 2019 proceedings volumes was carefully reviewed and selected from 5029 submissions. DUXU 2019 includes a total of 167 regular papers, organized in the following topical sections: design philosophy; design theories, methods, and tools; user requirements, preferences emotions and personality; visual DUXU; DUXU for novel interaction techniques and devices; DUXU and robots; DUXU for AI and AI for DUXU; dialogue, narrative, storytelling; DUXU for automated driving, transport, sustainability and smart cities; DUXU for cultural heritage; DUXU for well-being; DUXU for learning; user experience evaluation methods and tools; DUXU practice; DUXU case studies.

Domain Knowledge for Interactive System Design Dec 07 2020 This book describes how domain knowledge can be used in the design of interactive systems. It includes discussion of the theories and models of domain, generic domain architectures and construction of system components for specific domains. It draws on research experience from the Information Systems, Software Engineering and Human Computer Interaction communities.

Strategic Requirements Analysis May 12 2021 One of the many important skills a business analyst needs in requirements discovery is the ability to effectively plan, conduct and manage a set of interviews to get the requirements right, be they strategic, operational or IT-oriented. In Strategic Requirements Analysis Dr Karl A. Cox offers a process, guidelines and ideas - that have been tried and tested in practice - for conducting interviews and shows you how to turn interview findings into strategic requirements models all on one page, to present to your clients, customers, team and supervisors.

Soft Computing for Problem Solving Nov 18 2021 This two-volume book presents the outcomes of the 8th International Conference on Soft Computing for Problem Solving, SocProS 2018. This conference was a joint technical collaboration between the Soft Computing Research Society, Liverpool Hope University (UK), and Vellore Institute of Technology (India), and brought together researchers, engineers and practitioners to discuss thought-provoking developments and challenges in order to select potential future directions. The book highlights the latest advances and innovations in the interdisciplinary areas of soft computing, including original research papers on algorithms (artificial immune systems, artificial neural networks, genetic algorithms, genetic programming, and particle swarm optimization) and applications (control systems, data mining and clustering, finance, weather forecasting, game theory, business and forecasting applications). It offers a valuable resource for both young and experienced researchers dealing with complex and intricate real-world problems that are difficult to solve using traditional methods.

IBM Power Systems Private Cloud with Shared Utility Capacity: Featuring Power Enterprise Pools 2.0 Apr 11 2021 This IBM® Redbooks® publication is a guide to IBM Power Systems Private Cloud with Shared Utility Capacity featuring Power Enterprise Pools (PEP) 2.0. This technology enables multiple servers in an to share base processor and memory resources and draw on pre-paid credits when the base is exceeded. Previously, the Shared Utility Capacity feature supported IBM Power E950 (9040-MR9) and IBM Power E980 (9080-M9S). The feature was extended in August 2020 to include the scale-out IBM Power servers that were announced on 14 July 2020, and it received dedicated processor support later in the year. The IBM Power S922 (9009-22G), and IBM Power S924 (9009-42G) servers, which use the latest IBM POWER9TM processor-based technology and support the IBM AIX®, IBM i, and Linux operating systems (OSs), are now supported. The previous scale-out models of Power S922 (9009-22A), and Power S924 (9009-42A) servers cannot be added to an enterprise pool. With the availability of the IBM Power E1080 (9080-HEX) in September 2021, support for this system as part of a Shared Utility Pool has become available. The goal of this book is to provide an overview of the solution's environment and guidance for planning a deployment of it. The book also covers how to configure IBM Power Systems Private Cloud with Shared Utility Capacity. There are also chapters about migrating from PEP 1.0 to PEP 2.0 and various use cases. This publication is for professionals who want to acquire a better understanding of IBM Power Systems Private Cloud, and Shared Utility Capacity. The intended audience includes: Clients Sales and marketing professionals Technical support professionals IBM Business Partners This book expands the set of IBM Power documentation by providing a desktop reference that offers a detailed technical description of IBM Power Systems Private Cloud with Shared Utility Capacity.

Sodium Pyruvate Production from Glucose - Cost Analysis - Sodium Pyruvate E11A Aug 15 2021 This report presents a cost analysis of Sodium Pyruvate production from glucose. The process examined is a typical fermentation process. In this process, the fermentation product is pyruvic acid, which is recovered from fermentation broth using solvent extraction. The solution containing pyruvic acid is contacted with sodium hydroxide, forming Sodium Pyruvate product. This report was developed based essentially on the following reference(s): Keywords: Tartaric Acid Pyrolysis, 2-Oxopropanoic Acid, Acetic Acid

Journal of the Assembly, Legislature of the State of California Jun 28 2020

Butyraldehyde Production from Propylene and Syngas - Cost Analysis - Butyraldehyde E21A Sep 16 2021 This report presents a cost analysis of n-Butyraldehyde production from propylene and syngas. The process examined is similar to the LP OXO technology jointly developed by JM Davy and Union Carbide, employing Selector 10 catalyst. In this process, the production ratio of n- to iso-butyraldehyde in the oxo reaction is about 10. The n-Butyraldehyde is separated as the final product and the isobutyraldehyde is obtained as a by-product. This report was developed based essentially on the following reference(s): Keywords: Oxo Synthesis, Butanal, Synthesis Gas, H2, CO, Hydrogen, Carbon Monoxide, Johnson Matthey, Dow, LP Oxo, SELECTOR

Chloroprene Production from Butadiene - Cost Analysis - Chloroprene E11A Oct 17 2021 This report presents a cost analysis of chloroprene production from butadiene and chlorine. The process examined is a typical vapor phase butadiene chlorination process. In this process butadiene is first chlorinated producing two chlorinated isomers, 1,4-dichloro 2-butene and 3,4-dichloro 1-butene. In a second step, 1,4-isomers are isomerized to 3,4-dichloro 1-butene. This chemical is then dehydrochlorinated in the presence of caustic soda producing chloroprene and sodium chloride. This report was developed based essentially on the following reference(s): Keywords: Dupont, Chloroprene Rubber, Neoprene, Chlorination

Starting a Solo Law Firm 2021 Edition Jul 02 2020 Attorney Robert Schaller and the Schaller Law Firm offer young lawyers in Starting a Law Firm in 2020-2021 a must-have desk reference book for building a law firm. Lawyers should invest in their future! Young lawyers worked hard in college and again in law school. Now it is time to reap the rewards of the intensive legal training. Earn the profits deserved. Develop pride and earn respect from your peers. Any lawyer who possesses a heartfelt desire to build a respected legal career, along with the vision and drive to succeed, should read and embrace the steps set forth in this book. This book is dedicated to the young lawyers who are unfulfilled working as associates for other lawyers or who recently graduated from law school with the courage to "hang out a shingle" and start their own law firm. This book provides concrete guidance about issues the author wished someone had taught him before he started his own law firm. Some lawyers have the courage to open a solo-practice law firm. Other lawyers start a law firm with one or two other lawyers they know and trust. There is strength in numbers. It is appealing to young lawyers in particular to have a law school classmate or fellow associate nearby for support. Others establish an "affiliation" with an existing firm. Sometimes a lawyer needs another lawyer to brainstorm and bounce ideas around. Deciding whether to start a law firm is a tough decision. You gain the freedom described above, but you lose the security of working for an established firm as an associate. But is that freedom? In the short run, a young lawyer likes the security of knowing a paycheck is coming twice a month. But all private practice lawyers ultimately realize that they "eat what they kill." Therefore, the early shelter and protection offered by an established firm is lost after a few years when the developing lawyer is required to either leave the firm or develop a pool of clients that generate sufficient profits for the firm to justify the lawyer's salary. In essence, the lawyer has to develop the lawyer's own "profit center" or the lawyer's own "solo firm" within the firm. Either way, the lawyer has to know how to start a practice and thrive. This book will help striving lawyers get on the path to success. Testing Your Entrepreneurial Spirit: Answer the questions below to determine if you have what it takes to start a law firm. Lawyers who want to start their own firm should answer affirmatively to most of the questions below or should partner with another lawyer who answers affirmatively to most questions. 1. Do you have a passion to do something great with your career? 2. Do you want to build a business to create wealth for yourself and not someone else? 3. Can you visualize your definition of success? 4. Do you have the determination and resolve to achieve your definition of success? 5. Are you an independent person? 6. Are you self-confident (despite the humiliation of law school)? 7. Are you ambitious? 8. Are you self-motivated? 9. Are you a self-starter? 10. Are you decisive after studying the pros and cons of an issue? 11. Are you a problem-solver? 12. Do you have effective communication skills? 13. Can you set timetables and stick to them without procrastinating? 14. Do you have a dream to be your own boss? 15. Do you have a passion to help clients? 16. Are you cognizant of your strengths and weaknesses? 17. Do you know when it is time to seek guidance from a more experienced attorney? 18. Are you resilient to temporary setbacks? 19. Are you flexible when a course correction is recognized? 20. Can you view a temporarily setback as an opportunity for improvement? 21. Are you able to convince strangers that you know what you are talking about? 22. Do you have the desire to continuously study a particular substantive area of law? 23. Are you looking to build your future instead of looking for something to do until you can find another job? 24. Do you want to start a law firm by yourself, classmate, colleague, or more senior attorney?

Audit Guide Mar 30 2020 This annual edition provides accountants and other financial professionals with assistance in understanding and applying the special considerations required in a single audit. It is an indispensable resource for auditors performing Yellow Book audits. This new edition provides up-to-date information and expert guidance on single audits and Uniform Guidance compliance audit requirements, including example auditor reports for both the reporting required under Government Auditing Standards and the Uniform Guidance compliance audit.

Project, Program, Change Jan 08 2021 This book gives managers an integrative approach to project, program, and change management. It describes the differences between change in projects versus programs with case studies in both areas and the different life cycles. While the project and change comprise much of the book, it is up to date with its emphasis on agile, scrum, and benefits. The book also describes methods to both initiate and manage a change and what must be done for success and business value.

Software Requirement Patterns Jul 26 2022 Learn proven, real-world techniques for specifying software requirements with this practical reference. It details 30 requirement "patterns" offering realistic examples for situation-specific guidance for building effective software requirements. Each pattern explains what a requirement needs to convey, offers potential questions to ask, points out potential pitfalls, suggests extra requirements, and other advice. This book also provides guidance on how to write other kinds of information that belong in a requirements specification, such as assumptions, a glossary, and document history and references, and how to structure a requirements specification. A disturbing proportion of computer systems are judged to be inadequate; many are not even delivered; more are late or over budget. Studies consistently show one of the single biggest causes is poorly defined requirements: not properly defining what a system is for and what it's supposed to do. Even a modest contribution to improving requirements offers the prospect of saving businesses part of a large sum of wasted investment. This guide emphasizes this important requirement need—determining what a software system needs to do before spending time on development. Expertly written, this book details solutions that have worked in the past, with guidance for modifying patterns to fit individual needs—giving developers the valuable advice they need for building effective software requirements

New Trends in Software Methodologies, Tools and Techniques May 24 2022 Software is the essential enabler for the new economy and science. It creates new markets and new directions for a more reliable, flexible, and robust society. It empowers the exploration of our world in ever more depth. However, software often falls short behind our expectations. Current software methodologies, tools, and techniques remain expensive and not yet reliable for a highly changeable and evolutionary market. Many approaches have been proven only as case-by-case oriented methods. This book presents a number of new trends and theories in the direction in which we believe software science and engineering may develop to transform the role of software and science in tomorrow's information society. This publication is an attempt to capture the essence of a new state of art in software science and its supporting technology. Is also aims at identifying the challenges such a technology has to master.

Crude Isophthalic Acid Production Process - Cost Analysis - IPA E21A Jul 14 2021 This report presents a cost analysis of Crude Isophthalic Acid production from m-xylene. The process examined is a typical oxidation process. In this process, p-xylene is oxidized to Isophthalic Acid. The Isophthalic Acid is then separated from the solvent as a Crude Isophthalic Acid (CIA). No further process for purification via hydrogenation is included in this process. This report was developed based essentially on the following reference(s): Keywords: Unsaturated Polyester, UPR, Phthalic Acid, Meta-Xylene, CIA

Congressional Record Jun 20 2019

User Requirements for Wireless Jun 25 2022 In most IT system development processes, the identification or elicitation of user requirements is recognized as a key building block. In practice, the identification of user needs and wants is a challenge and inadequate or faulty identifications in this step of an IT system development can cause huge problems with the final product. The elicitation of user requirements as such changes according to age groups;, to gender,; to cultural settings,; and into time; and experience in the use of the system/software. User requirements, therefore, cannot be used between projects, IT systems, and different software. That makes the elicitation of user requirements an inherent part of any software development project and a resourceful activity as well. This book provides insights to the process of identifying user requirements and to different types by describing varying case studies in which technologies or software has been developed. A variety of user requirements are provided illustrating the effect of changing the targeted user group with respect to age,; to the context and the different technologies or software as well as to the difference in viewpoint on ways of involving users in the elicitation process. Cases and user requirement elements discussed in the book include: User requirements elicitation processes for children, construction workers, and farmersUser requirements for personalized services of a broadcast companyVariations in user involvementPractical elements of user involvement and requirements elicitationUsable security requirements for design of privacy
