Du Bois as the official publication of the NAACP, is a journal of civil rights, history, politics, and culture and seeks to educate and challenge its readers about issues that continue to plague African Americans and other communities of color. For nearly 100 years, The Crisis has been the magazine of opinion and thought leaders, decision makers, peacemakers and justice seekers. The Poison King Aug 20 2019 A new account of one of Rome's most relentless but least understood foes. Claiming Alexander the Great and Darius of Persia as ancestors, Mithradates inherited a wealthy Black Sea kingdom at age fourteen after his mother poisoned his father. He fled into exile and returned in triumph to become a ruler of superb intelligence and fierce ambition. Hailed as a savior by his followers and feared as a second Hannibal by his enemies, he envisioned a grand Eastern empire to rival Rome. After massacring eighty thousand Roman citizens in 88 BC, he seized Greece and modern-day Turkey. Fighting some of the most spectacular battles in ancient history, he dragged Rome into a long round of wars and threatened to invade Italy itself. His uncanny ability to elude capture and surge back after devastating losses unnerved the Romans, while his mastery of poisons allowed him to foil assassination attempts and eliminate rivals.--From publisher description.

The little winemaker - A practical and Technical Guide to Winemaking Mar 19 2022

Bagging a degree in Oenology does not give you an instant comfortable place in the winemaking world. The daily manoeuvre in a winery requires know-how of the whole process and the minute details of the machines and gadgets used. This book gives an elaborate look and instructions into all that with the use of notes and graphics. Written and created by an Oenologist and Viticultural Engineer whose work in many countries for many years gave him the knowledge of all things winemaking and shared them all

in this book. It is written in an informal, even jesting voice and should be easy enough to be understood even by those who have no formal education in Oenology. ., It started with making notes on the job, and grew over years to this book. I am not a professional publisher, so please have indulge with maybe little errors here and there, (.though there shouldnt some be any more). This book is for everyone who wants to understand winemaking by a not overloaded scientific but didactly new way of easy explanations. This book is the `opposite` of the Handbook of Enology. I use colourful charts and 3D graphics, explaining also simple things, which other literature might classify as to infantil and to simple. To often the simple questions are the urgent essential ones. - Here I try to give simple answers. I don't think you will agree with everything in this book, as many technical answers are indeed more complex and complicated. But it has always been my goal to give a short understandable answer in the first place, rather than a long complicated and incomprehensible answer. Go to the wine cellar and in the stress of vintagge, stand in front of the tank and try to make wine with the Handbook of Enology. Then you will know what `The little Winemaker` is about. Better 95% and a simple answer, than 100% complete but a practically useless answer. Not only the way of winemaking is described in colourful easy to understand Flow charts. But also machines, like Plate filter, tank press and Barriques are nicely explained in its

functionality, by the use of 3D graphics. In virtual 3D cellars, it is shown how to actually set up hose lines for all steps like filtration etc.. Sample fermentation charts give you the opportunity to compare your fermentation, to see where you are and what to do or to expect next. Standard operations like Protein stabilisation or Chaptalisation, are not only described in words and theoretical descriptions, but it is in 3D graphics explained how the machines and hoses are actually assembled, and handled when doing the work. Aside from these classic steps in the production, special cases, like Rose, Ice Wine, rotten grapes, stuck ferments and many other interesting issues are discussed and given directions how to handle or solve it. - You study winemaking enology and viticulture, or you have just started the job, and you are still insecure, having still so many `simple` questions? - You have just decided to change your profession, make your passion to your profession, and you want to make wine? You need a speed - crash course in winemaking? - You are in the wine trading, and you have questions you had always wanted to know and understand? - You think the existing winemaking literature is far too complicated and does not really help you, and is also not enjoyable to read? ..then you must have this book. Its not only easy to understand, but also nice to look at and to read ..at least I hope. Any feedback and also hints for corrections are highly welcomed, for maybe a next part matching then vineyard management. I hope you

enjoy,...

The Distracted Mind May 09 2021 A “brilliant and practical” study of why our brains aren’t built for media multitasking—and how we can learn to live with technology in a more balanced way (Jack Kornfield, author of *The Wise Heart*) Most of us will freely admit that we are obsessed with our devices. We pride ourselves on our ability to multitask—read work email, reply to a text, check Facebook, watch a video clip. Talk on the phone, send a text, drive a car. Enjoy family dinner with a glowing smartphone next to our plates. We can do it all, 24/7! Never mind the errors in the email, the near-

miss on the road, and the unheard conversation at the table. In *The Distracted Mind*, Adam Gazzaley and Larry Rosen—a neuroscientist and a psychologist—explain why our brains aren't built for multitasking, and suggest better ways to live in a high-tech world without giving up our modern technology. The authors explain that our brains are limited in their ability to pay attention. We don't really multitask but rather switch rapidly between tasks. Distractions and interruptions, often technology-related—referred to by the authors as “interference”—collide with our goal-setting abilities. We want to finish this paper/spreadsheet/sentence, but our phone signals an incoming message and we drop everything. Even without an alert, we decide that we “must” check in on social media immediately. Gazzaley and Rosen offer practical strategies, backed by science, to fight distraction. We can change our brains with meditation, video games, and physical exercise; we can change our behavior by planning our accessibility and recognizing our anxiety about being out of touch even briefly. They don't suggest that we give up our devices, but that we use them in a more balanced way.

Die Samaritaner und die Bibel / The Samaritans and the Bible Jan 17 2022 Die samaritanischen Überlieferungen finden in der Bibelwissenschaft nach wie vor zu wenig Beachtung. Der vorliegende Band mit Beiträgen eines 2010 in Zürich abgehaltenen Symposiums stellt daher die Geschichte der Samaritaner und die Überlieferungen über sie in den biblischen Quellen einerseits und die Perspektiven auf die biblische, frühjüdische und frühchristliche Geschichte in den samaritanischen Quellen andererseits gegenüber. Die Beiträge reichen von der Bedeutung des Samaritanischen Pentateuchs und dem Verhältnis des Garizim-Tempels zum Jerusalemer Tempel über die wechselseitigen Ursprungserzählungen, die samaritanische Geschichte in der Alexanderzeit, das Bild der Samaritaner im Neuen Testament und das Bild Jesu und der frühen Christen in samaritanischen Quellen bis hin zur antisamaritanischen Polemik der Rabbinen und den Religionsgesprächen in arabischer Zeit. Durch die wechselseitige Wahrnehmung biblischer bzw. frühjüdischer

und samaritanischer Quellen sollen neue Diskursräume eröffnet und Impulse für die weitere Analyse und Auswertung der samaritanischen Quellen gegeben werden.

Rather Negro Than Black The Creation of "an Inferior Race" by the Whites God made man in his image and the Feb 18 2022 Black or White are long since stopped being only skin-colors, but became digital programs with clear functions. The spiritual law says: "There is no coincident". 0,5 p% of people know that, 99.5% of people are consumers. They consume everything, question nothing, they believe only what they see, hear and feel and that blindly. Their knowledge is what is put in their heads. Important for them is security, a full belly and sex. Fun and consumption decorate their life. That everything which happens around them is following a reason is a fact they would fight, as with the words black and white. These 99.5% of people have never taken the time in questioning why they address themselves differently than they look. Why Blacks are not called brown and why Whites are not called beige? Look at yourself, look at your skin-color: Are you white? Like the color white? Or rather beige? Are you black or rather brown? Do you still think this is a coincidence? Ah, yes. Why did the light-colored people decide to call people either Black or White? All seems to be insignificant, right? But actually, there is a giant, clever and complex racist system, or rather program which is digitally installed into Black people, at work which has the

goal to provide White people with political, religious, cultural, psychological and business advantages by negatively steering Blacks sense of self, their thinking, their actions, their self-esteem. They steer that with the countless negative qualities and connotations the color black which has been purposefully created in the color black. One has to feel inferior, and the other superior. And it works fantastically for hundreds of years.
