Second Language Vocabulary Acquisition Apr 21 2022 This book offers readers a basic grounding in L2 vocabulary acquisition. In addition, it provides theoretical analyses and empirical data regarding Chinese learners of English: their specific learning difficulties, needs, strategies, etc. The book provides an overview of the research in L2 vocabulary acquisition in the last two decades. Linguistic, psycholinguistic, socio-cultural, neurolinguistic, and corpus linguistics analyses are considered. The book constructs a comprehensive framework for Computer Assisted Vocabulary Learning (CAVL). This is achieved by providing an overview of vocabulary learning in CALL and then proposing a big framework within which most vocabulary learning programs can be conceptualized. The author then gives a detailed account of how Chinese learners approach English vocabulary learning. She provides an up-to-date picture of the overall situation regarding the language policies adopted, the traditional, orthodox approach to language learning, and the recent reforms implemented in Chinese universities. General and specific vocabulary learning difficulties encountered by Chinese learners are documented and analysed and empirical studies are reported.

Chemistry (Teacher Guide) Nov 04 2020 This book was created to help teachers as they instruct students through the Master's Class Chemistry course by Master Books. The teacher is one who guides students through the subject matter, helps each student stay on schedule and be organized, and is their source of accountability along the way. Essential Latin Vocabulary Jun 23 2022 This book is designed to help beginning and intermediate students master the vocabulary necessary to read real Latin with fluency and comprehension. It also serves as a resource for instructors and tutors. The text presents 1,425 words that allow a student to comprehend about 95 percent of all the vocabulary they will ever see in an actual Latin text. The terms found in the present book have been culled from statistical analyses of the works of more than two hundred authors in order to identify the core vocabulary. Were students to start out by learning the 25 most common words on this list, an astonishing 29 percent of all the vocabulary ever needed would be at their command. If a student masters the 300 most frequent words in this list, well over half of all the vocabulary necessary for fluent reading will be theirs. The goal of the book is to provide the student with the most efficient way to learn vocabulary. Chapters 1 and 2, in particular, are designed for drill, review, and study. The first chapter draws together all words that share the same grammatical classification. For example, all third declension neuter nouns are brought together in one place, with their definitions. By listing the vocabulary in grammatical groups, all the words that share a set of endings are assembled for the student: vocabulary and endings thus reinforce each other. Furthermore, each list of terms is broken down into groups of five words for ease in drawing up vocabulary lists to work with. Within the grammatical lists, each part of speech is preceded by an account of how the terms within are distributed. A student thus quickly learns that while there are 413 verbs that need to be mastered, well over one-third of these (157) are found in the third conjugation, while only about one per-cent (21) will be found in the fourth conjugation. With such information, independent students or instructors can prioritize their study and assignments more appropriately. In the second chapter, large parts of the vocabulary, with their attendant definitions, are regrouped by topics. A student who wishes, therefore, to focus on nature, human emotions, or military issues, will find such vocabulary conveniently grouped together. Chapter three lists the vocabulary terms from the most frequently occurring words to the least frequent. Students or instructors who wish to lean more heavily on the most (or least!) frequently occurring terms within their drills and studies can thus consult this frequency list. After the frequency list, the fourth chapter presents an alphabetical index of the terms. Two final chapters close the text. The first is a list of endings and paradigms for nouns, adjectives and verbs. Complete paradigms and endings are given for review. The final chapter provides the student with an additional one hundred words that are uniquely common in the Latin of the Middle Ages. These one hundred words, if added to the mix, would give the student a Mediaeval vocabulary that would match the efficiency of the Classical vocabulary that is the main focus of the book. For the effort of learning an additional one hundred words, another 1,000 years of Latin texts open up before the student. As a whole, then, this book offers the vocabulary that forms the core of one thousand seven hundred years of Latin literature. If the goal is to learn to read Latin with joy and ease, then the vocabulary terms in this book are one of the major keys to success. By learning these terms, a student's vocabulary should be ready to tackle the Latin of any era from the Classical period to the Renaissance.

Academic Vocabulary in Learner Writing Mar 08 2021 Academic vocabulary is in fashion, as witnessed by the increasing number of books published on the topic. In the first part of this book, Magali Paquot scrutinizes the concept of 'academic vocabulary' and proposes a corpus-driven procedure based on the criteria of keyness, range and evenness of distribution to select academic words that could be part of a common-core academic vocabulary syllabus. In the second part, the author offers a thorough analysis of academic vocabulary in the International Corpus of Learner English (ICLE) and describes the factors that account for learners' difficulties in academic writing. She then focuses on the role of corpora, and more particularly, learner corpora, in EAP material design. It is the first monograph in which Granger's (1996) Contrastive Interlanguage Analysis is used to compare 10 ICLE learner sub-corpora, in order to distinguish between linguistic features that are shared by learners from a wide range of mother tongue backgrounds and unique features that may be transfer-related.

Lexical Errors and Accuracy in Foreign Language Writing Jun 11 2021 Lexical errors are a determinant in gaining insight into vocabulary acquisition, vocabulary use and writing quality assessment. Lexical errors are very frequent in the written production of young EFL learners, but they decrease as learners gain proficiency. Misspellings are the most common category, but formal errors give way to semantic-based lexical errors as proficiency increases, likewise, the direct influence of the L1 also reduces in favour of more elaborated transfer mechanisms and L2 influence. The different categories of lexical errors indicate the stage of learning. This book uses a study of young EFL learners to suggest that lexical accuracy is a crucial component of writing assessment, and that lexical errors are useful in predicting writing quality.
