The Hangman and His Wife Jun 18 2019 An astonishing journey into the heart of Nazi evil: a portrait of one of the darkest figures of Hitler's Nazi elite—Reinhard Heydrich, the designer and executor of the Holocaust, chief of the Reich Main Security, including the Gestapo—interwoven with commentary by his wife, Lina, from the author's in-depth interviews. He was called the Hangman of the Gestapo, the "butcher of Prague," with a

reputation as a ruthlessly efficient killer. He was the head of the SS, and the Gestapo, second in command to Heinrich Himmler. His orders set in motion the Kristallnacht pogrom of 1938 and, as the lead planner of Hitler's Final Solution, he chaired the Wannsee Conference, at which details of the murder of millions of Jews across Nazi-occupied Europe were toasted with cognac. In *The Hangman and His Wife*, Nancy Dougherty, and, following her death, Christopher Lehmann-Haupt, masterfully explore who Heydrich was and how he came to be, and how he came to do what he did. We see Heydrich from his rarefied musical family origins and his ugly-duckling childhood and adolescence, to his sudden flameout as a promising Naval officer (he was forced to resign his Naval commission after dishonoring the office corps by having sex with the unmarried daughter of a shipyard director and refusing to marry her). Dougherty writes of his seemingly hopeless job prospects as an untrained civilian during Germany's hyperinflation and unemployment, and his joining the Nazi party through the attraction to Nazism of his fiancée, Lina von Osten, and her father, along with the rumor shadowing him of a strain of Jewishness inherited from his father's side. And we follow Heydrich's meteoric rise through the Nazi high command—from SS major, to colonel to brigadier general, before he was thirty, deputy to Heinrich Himmler, expanding the SS, the Gestapo, and developing the Reich's plans for

Research in Communication Sciences and Disorders Aug 01 2020 Research in Communication Sciences and Disorders: Methods for Systematic Inquiry, Fourth Edition is a comprehensive yet comprehensible text meant for instructors and students of research methods in the field of communication sciences and disorders. This forward-thinking book reflects the movement toward evidence-based practice in speech-language pathology and audiology. The authors ensure that the concepts associated with evidence-based practice are integrated throughout the chapters. Rather than treating empirical research and searching for clinical evidence as separate topics, this text presents both as different applications of a process of scientific inquiry. The order of the chapters reflects the steps a researcher or clinician might complete when conducting an investigation. Also included are features that help students be more active in learning the material. Each chapter has a set of review questions or case scenarios that can be used as homework, as probe questions in class, or as a basis for group activities.
