Following Burke and Wills Across Australia Feb 18 2022 Every Australian has heard of Burke and Wills but few have travelled in their footsteps. In 2008, historian Dave Phoenix decided to walk across Australia from Melbourne to the Gulf of Carpentaria, following the track taken by the ill-fated Burke and Wills Expedition. Now you can follow them too. *Following Burke and Wills Across Australia* guides you on a road trip that follows one of history's great transcontinental journeys, sharing the explorers' experiences on the way. Maps lay out a route that takes you as close as possible to the Expedition's track. As you travel the outback roads, you can learn all the details of the day to day journey of the Expedition from the explorers' own words, and compare what you see with their descriptions of the country in 1860–61. Each chapter provides information about what to see now: the location and descriptions of the markers and memorials placed along the route over the 150 years since the Expedition, and places where you can stand where the explorers stood and look out over prospects they drew and described. The book is a perfect companion for those wanting to see outback Australia, and at the same time understand a journey that has attained mythic status in the history of Australian exploration. Even if you want to follow only part of the track, this is the book for you.

The Histories of the International Polar Years and the Inception and Development of the International Geophysical Year Sep 01 2020 *Annals of the International Geophysical Year, Volume I: The Histories of the International Polar Years and the Inception and Development of the International Geophysical Year* covers the significant contributions of remarkable scientific enterprises known as the First and Second International Polar Years. This book is organized into three parts encompassing 39 chapters. The first part deals with the First International Polar Year, its origin, planning, and program. Considerable chapters survey the accomplishments of numerous space expeditions from various countries, including Austria, Britain, Canada, Denmark, Finland, France, Germany, Georgia, Norway, Russia, Sweden, and United States. The second part is the French translation of the information presented in the first part. The third part highlights the achievements of the Second International Polar Year in the field of geophysics. This part specifically discusses the study of the aurora, based on visual observations and spectrographic evaluation. This book will prove useful to geophysicists and researchers in the allied fields.

Imagined Power Contested Apr 08 2021 This study shows how power was constructed, enacted, and contested by

discursive and non-discursive strategies and practices. It emphasizes the local and historic divergence of these processes and illustrates how Germans and Africans were able to produce exclusive power arenas but also engaged in a reciprocal extraversion of the respective power of the other. Stefanie Michels teaches at the University of Cologne, Germany.

Backpacker Apr 20 2022 Backpacker brings the outdoors straight to the reader's doorstep, inspiring and enabling them to go more places and enjoy nature more often. The authority on active adventure, Backpacker is the world's first GPS-enabled magazine, and the only magazine whose editors personally test the hiking trails, camping gear, and survival tips they publish. Backpacker's Editors' Choice Awards, an industry honor recognizing design, feature and product innovation, has become the gold standard against which all other outdoor-industry awards are measured.

The Nez Perce Indians and the Opening of the Northwest Jul 31 2020 This is the story of the so-called Inland Empire of the Northwest, that rugged and majestic region bounded east and west by the Cascades and the Rockies, from the time of the great exploration of Lewis and Clark to the tragic defeat of Chief Joseph in 1877. Explorers, fur traders, miner, settlers, missionaries, ranchers and above all a unique succession of Indian chiefs and their tribespeople bring into focus one of the permanently instructive chapters in the history of the American West.

The Prepper Next Door Nov 03 2020 A book for practical preppers (those planning for emergencies or disasters). Discusses food storage, water purification and collection, sanitation, first-aid, bug-out bags, bug-out vehicles, home and self-defense, firearms and shooting, providing lights and utilities, and aspects of home construction. --
AUTHOR BIO Charlie Palmer became a prepper back in the early 1980s when he first read The Survivor newsletter. Today he recommends people make modest preparations for natural disasters and other emergencies. His interests include do-it-yourself repairs, shooting, welding, machining, and outdoor survival.

Spirits of Falajen Feb 24 2020 As the Pahl'Kiar advance their forces to reclaim their empire, the Resarians, who have laid claim to Sariadne, push back. A young woman named Brisethi Sen Asel enlists in the Resarian Dominion military to fight for her country, determined to face any and all challenges, even from within.

The Expeditions of Zebulon Montgomery Pike Jun 10 2021 "The Expeditions of Zebulon Montgomery Pike" is an account of the two expeditions of the American explorer Zebulon Montgomery Pike to headwaters of the Mississippi River, through Louisiana territory and in New Spain, written from his memory after the Spanish authorities had confiscated his journals. In the summer of 1805 general James Wilkinson, appointed Governor of the Upper Louisiana Territory, ordered Pike to locate the source of the Mississippi River, explore the northern portion of the newly created Louisiana Territory, and expel Canadian fur traders illegally trading in the borders of the United States. After he returned from this first expedition, Wilkinson almost immediately ordered him to mount a second expedition, this time to explore, map, and find the headwaters of the Arkansas and Red rivers. Additional objectives of this exploratory expedition into the southwestern part of the Louisiana Territory were to evaluate natural resources and establish friendly relations with Native Americans. Pike's second expedition crossed the Rocky Mountains into what is now southern Colorado, which led to his capture by the Spanish colonial authorities near Santa Fe, who sent Pike and his men to Chihuahua (present-day Mexico), for interrogation. Later in 1807, Pike and some of his men were escorted by the Spanish through Texas and released near American territory in Louisiana. This carefully crafted e-arknow ebook is formatted for your eReader with a functional and detailed table of contents.

Sci-tech Archives and Manuscript Collections Jun 22 2022 Here is a fascinating book that describes selected collections of sci-tech archives and manuscripts. Librarians will gain valuable information on the ways in which sci-tech archival material is being handled and preserved in various institutions and organizations. Sci-Tech Archives and Manuscript Collections is a helpful guide that also describes ways in which these often unique and irreplaceable materials are organized so they can be searched and used. Corporate, academic, and governmental organizations are represented, and some attention is given to the international scene. Topics include a description of the American Museum of Natural History collection, a survey of archival materials at zoos and aquariums, a description of the efforts of the American Institute of Physics Center for History of Physics to develop the international Catalog of Sources for History of Physics and Allied Sciences.

Rainy Lake House Jun 17 2019 "Exiles in Indian Country weaves together the biographies of three men who cast their fortunes with the Western fur trade in the first quarter of the nineteenth century. John Tanner was a 'white Indian' who was taken captive and raised by Ottawa, and lived among the Ottawa and Ojibwa for thirty years, hunting across the northern forests and plains of present-day Ontario, Manitoba, and northern Minnesota. Dr. John McLoughlin fled the law in Quebec at the age of eighteen to work for the Hudson's Bay Company in the Lake Superior region during its two decades of war with the North West Company. Major Stephen H. Long explored the northern borderlands in a time when the United States aimed to take over British-Indian trade in its new western territories. The three men met at the HBC's Rainy Lake House near the Boundary Waters in 1823 after Tanner was badly wounded while trying to take his daughters out of Indian country, to save them from being raped by the white

traders. Foregrounding this incident, Theodore Catton examines the events leading up to this fateful encounter through a Rashomon-like tale about the British-American-Indian frontier. Through these three colliding vantage points, the book describes the world of the fur trade: American, British, and Indian; imperial, capital, and labor; explorer, trader, and hunter. In its competing viewpoints, *Exiles in Indian Country* deftly crafts one grand narrative out of three and reveals the perilous lives of the white adventurers and their Indian families who lived on the fringe--truly the hands of empire"--Provided by publisher.

The Worst Journey in the World Jul 19 2019 Published in 1922 by an expedition survivor, this riveting adventure classic recounts Scott's ill-fated expedition to the South Pole. "A masterpiece." — The New York Review of Books.

Encounter, Transformation and Identity Mar 07 2021 Bringing together key historical and innovative ethnographic materials on the peoples of the South-West Province of Cameroon and the Nigerian borderlands, this volume presents critical and analytical approaches to the production of ethnic, political, religious, and gendered identities in the region. The contributors examine a range of issues relating to identity, including first encounters and conflict as well as global networking, trans-national families, enculturation, gender, resistance, and death. In addition to a number of very striking illustrations of ethnographic and material culture, this volume contains key maps from early German sources and other original cartographical materials.

Textiles in Sport Jan 25 2020 The technical developments in the sports clothing industry has resulted in the use of functional textiles for highly-specialised performances in different sports. Developments include thermal and functional properties and coated and laminated clothes. With bio- and smart materials providing such a strong focus in the textile industry generally, companies are going for 'value-added' textiles, such as in-built sensors which monitor performance. In-built wear comfort is a growing market trend and includes clothing which improves the skin's performance. Written by a distinguished editor and a team of authors from the cutting edge of textile research, *Textiles in sport* discusses high-performance, high-function and intelligent textiles for sportswear. Invaluable for a broad range of readers Discusses high-performance, high-function and intelligent textiles for sportswear

Preservation and Conservation of Sci-tech Materials Aug 24 2022 Provides clear examples of projects and studies that have been made regarding current conservation and preservation efforts.

To the Ends of the Earth Jun 29 2020 Ranulph Fiennes has entered the public imagination as the intrepid explorer par excellence. Taunted by his wife over the challenge of the never-before attempted circumpolar navigation of the globe, he set off in 1979 on a gruelling 52,000 mile adventure. Together with fellow members of 21 SAS regiment, Fiennes left from Greenwich, travelling over land, passing through both ends of the polar axis. Completed over two years later, it was the first circumpolar navigation of the globe, and justifiably entered Fiennes into the record books. **TO THE ENDS OF THE EARTH** is the record of that journey. It captures the natural beauty of the landscapes they passed through, and the camaraderie that necessarily grows between men who had served in the British forces' elite regiment and were now throwing themselves into danger of a different sort. Time and again, the expedition found themselves in life-threatening situations, weaving through the pack ice of the Arctic Ocean or sharing a single sleeping bag to ward off the -40 degrees celsius Arctic night. The calm and measured approach which made Fiennes such a great expedition leader shines through **TO THE ENDS OF THE EARTH**, deftly recreating the last unexplored regions on earth. It is also a book which lays the foundations for what was to come for Fiennes, confirming a need to exist outside the comfortable norms the rest of us inhabit. As the expedition progresses, there is also a mounting sense of tension as attainment of the final goal also spells the end of the adventure. **TO THE ENDS OF THE EARTH** is a compelling account of one journey and Fiennes' drive to push himself to ever further extremes.

Report of an Expedition May 09 2021 In the true story reflected in Lt. Allen's journal, you will learn of the generosity of Alaskan Natives. Lt. Allen's party would not have survived without adapting to the customs of the Alaskans and following their trails. They also would have starved without the food from the Alaskan people. This was the longest exploration of unknown land at this time in the world. Many quests had tried to go inland, but had not returned. This was mainly due to their ill treatment of the Natives. Lt. Allen traveled in a small party and welcomed the help of the Alaskans. He writes here in his journal from a traveler's perspective, not from the traditional military aspect. They traveled through the heart of this great land called Alyeska. The three great rivers they traveled had been explored very little by miners or trappers. This was a land largely unexplored by white people, but where Natives had already lived for more than 10,000 years. Lt. Allen's journal is published here from the original journal published in 1887 to share with you who love to read of history and learn about Alaska. Enjoy the view of Alaska in the 1800s from Lt. Allen's journal descriptions of the land and the people.

Popular Science Sep 13 2021

The Honeys May 29 2020 From Ryan La Sala, the wildly popular author of *Reverie*, comes a twisted and tantalizing horror novel set amidst the bucolic splendor of a secluded summer retreat. Mars has always been the lesser twin, the shadow to his sister Caroline's radiance. But when Caroline dies under horrific circumstances, Mars is propelled to learn all he can about his once-inseparable sister who'd grown tragically distant. Mars's genderfluidity means he's often excluded from the traditions -- and expectations -- of his politically-connected family. This includes attendance at the prestigious Aspen Conservancy Summer Academy where his sister poured so much of her time. But with his grief still fresh, he insists on attending in her place. What Mars finds is a bucolic fairytale not meant for him. Folksy charm and sun-drenched festivities camouflage old-fashioned gender roles and a toxic preparatory rigor. Mars seeks out his sister's old friends: a group of girls dubbed the Honeys, named for the beehives they maintain behind their cabin. They are beautiful and terrifying -- and Mars is certain they're connected to Caroline's death. But the longer he stays at Aspen, the more the sweet mountain breezes give way to hints of decay. Mars's memories begin to falter, bleached beneath the relentless summer sun. Something is hunting him in broad daylight, toying with his mind. If Mars can't find it soon, it will eat him alive.
